energy is any type of energy generated by the sun solar energy is created by nuclear fusion that takes place in the sun fusion occurs when protons of hydrogen atoms violently collide in the sun s core and fuse to create a helium atom this

process known as a pp proton proton chain reaction emits an enormous

solar energy wikipedia Feb 24 2024 solar energy is radiant light and heat from the sun that is harnessed using a range of technologies such as solar power to generate electricity solar thermal energy including solar water heating and solar architecture

solar energy definition uses advantages facts britannica Jan 23 2024 2024 6 18 solar energy is the radiation from the sun capable of producing heat

causing chemical reactions or generating electricity the total amount of solar energy received on earth is vastly more than the world s current and anticipated

solar energy mit climate portal Dec 22 2023 2023 8 29 solar energy is a form of renewable energy in which sunlight is turned into electricity heat or other forms of energy we can use it is a carbon free energy source that once built produces none of the greenhouse gas emissions that are driving climate change
