## **Monthly Catalogue, United States Public Documents**

1989

from the preface since federal funding is scarce for massive upgrades and or complete new wastewater treatment plants wwtp construction treatment plant operators superintendents managers city councils boards etc must get more creative on funding and coordinating process equipment replacements contained herein you will find hints tactics and procedures

aimed at getting the biggest bang for your public buck during the 1970s and 1980s through grants the federal government paid 80 of costs to build new or expanded wastewater treatment plants pumping stations and collection system renovations the majority of the grants were to upgrade primary treatment facilities to secondary and secondary to tertiary treatment status based on clean water act regulations if your facility was fortunate enough to receive grants you were in good shape for approximately 20 to 30 years depending on community growth rates since most wastewater treatment facilities are designed to last 20 years many of the new or expanded facilities in the 70 s and 80 s are reaching the end of their service life some may have reached it sooner due to growth beyond the expected rate inadequate preventive maintenance or design inadequacies when built now you have identified problems with insufficient aeration capacity equipment mechanical failure insufficient pump station capacity infrastructure deterioration etc and need to do something about it before you violate your npdes permit if you have not already this equipment seems very costly to replace because you now must pay 100 opposed to 20 with the grants many wwtp are in need of replacement and or upgraded equipment the equipment itself is typically about 25 to 50 of the total project cost this cannot be changed much however the remaining 50 to 75 engineering installation labor costs and project management may be whittled down dependent on how active and creative the project coordinator yourself wants to be in the process when epa funded 80 of project costs in prior years it was no big deal to have an open pocketbook attitude those days have changed forever and so have procurement procedures for projects a management guide to retrofitting wastewater treatment plants is geared towards the managerial and administrative scope of a lead operator superintendent facility manager type of wastewater individual all the junior college courses available practical operator experience and certification status will still not offer the opportunity to learn administrative and cost savings techniques similar to operating a business but soon your job may demand these skills this book is a handy reference for making the task of upgrading retrofitting wastewater process equipment easier and less costly it includes ideas for selling upgrade ideas to superiors pre and post project activities and certain management techniques useful for successful retrofitting or upgrading in past projects this book should prove helpful to those who find themselves involved in retrofitting their facility and need assistance on resolving facility problems including treatment plant operators superintendents managers city council members and boards it is also a valuable reference guide for municipal operations individuals who want to retain control of their facilities but don t quite know how it was written with the front line operator superintendent and manager in mind in common operator language in order to allow easier understanding it contains many tips and techniques which operators can implement immediately

## **Monthly Catalog of United States Government Publications**

1984

this book provides a solid overview of the important metallurgical concepts related to the microstructures of irons and steels and it provides detailed guidelines for the proper metallographic techniques used to reveal capture and understand microstructures this book provides clearly written explanations of important concepts and step by step instructions for equipment selection and use microscopy techniques specimen preparation and etching dozens

of concise and helpful metallographic tips are included in the chapters on laboratory practices and specimen preparation the book features over 500 representative microstructures with discussions of how the structures can be altered by heat treatment and other means a handy index to these images is provided so the book can also be used as an atlas of iron and steel microstructures

## **Physical Security Systems Handbook**

2005-11-21

the oldest and most respected martial arts title in the industry this popular monthly magazine addresses the needs of martial artists of all levels by providing them with information about every style of self defense in the world including techniques and strategies in addition black belt produces and markets over 75 martial arts oriented books and videos including many about the works of bruce lee the best known marital arts figure in the world
