International Financial Statistics, November 2010 2011-05 this book analyses and compares ceasefire agreements as part of peace processes in intrastate armed conflicts research repeatedly underscores the importance of ceasefire agreements in peace processes but suggests that they can influence such processes in fundamentally different ways however despite contradictory expectations remarkably few studies have so far been devoted to systematic and in depth analysis of ceasefire agreements in contemporary intrastate armed conflicts this book contributes to filling this gap by using a process oriented conflict dynamics approach to analyse and explain how ceasefire agreements are being influenced by and in turn influences the broader dynamics of peace processes empirically the book focuses on the armed conflicts in aceh indonesia and sri lanka based on document studies and 57 interviews with key actors it presents comparative insights and in depth knowledge about ceasefire agreements in different contextual settings the book problematizes the common assumption in the literature that ceasefire

agreements create momentum in peace processes and pave the way to peace and it provides a more nuanced analysis and understanding based on two empirical cases analysed within a comparative framework in contrast to conventional wisdom it demonstrates how ceasefires on the contrary also can have negative implications on peace processes this book will be of much interest to students of conflict resolution peace studies intra state conflict security studies and ir in general

2016-11-10 a review of the existing literature on the china india comparative theme conveys the distinct impression that the literature largely projects china and india as intrinsically competitive entities while much has been written on where and why china and india are contesting particularly from a political sense very little attention has been devoted to mutual collaboration whether existing or potential such possibilities are at their greatest in economics which will dominate the future china india relationship this book explores sino indian ties from a comparative economic perspective and argues that it is erroneous to visualise the ties either from exclusively competitive or collaborative perspectives the future relationship between the two countries will be characterised simultaneously by two c s competition and collaboration which are both linked to common challenges facing them arguing that while competition in the economic sphere is inevitable given their size and aspirations the book contends that negative externalities from competition will encourage both countries to collaborate and expand the scope of such collaboration the book s refreshing angle makes it a must read for those interested in sino indian relationship

Beyond the Divide 2015 the book is an interdisciplinary exploration of the complexities of popular culture as a category of public policy it approaches the notions of cultural policy and popular culture flexibly examining what each comes to mean explicitly or implicitly in relation to the other this generates a rich variety of approaches but also a number of identifiable commonalities we start from the proposition that popular culture is largely absent as an explicit category of arts policy and debate today the arts are still in practice construed in terms of elite culture despite claims to the contrary while artefacts such as popular music television fashion and so on are assumed to figure among the cultural or creative industries giving the popular a set of narrowly economic professional and commodity connotations and yet the popular is in a range of ways powerfully present as an implicit dimension of public policy and as a

catalyst of cultural practices and attitudes this apparent paradox underpins the proposal the book is a collaboration between two uk based institutions the university of leeds s popular cultures research network and the well established centre for cultural policy studies at the university of warwick this book was originally published as a special issue of international journal of cultural policy

China's Role in Global Economic Recovery 2014-06-11 in recent years the safety management field has placed leadership and commitment at the center of effective workplace health and safety programs at the same time personal liability for workplace health and safety has increased resulting in poor outcomes for individual managers discussing the minimum expectations that courts and tribunals have of managers management obligations for health and safety examines the relationship between those expectations and effective safety performance the book looks at safety management from the perspective of management obligations what expectations are placed on managers at all levels of an organization to ensure that the workplace and systems of work are safe and how are these expectations considered and analyzed by courts and public inquiries as importantly the book explores how management actions in relation to these obligations and expectations influence positively or negatively the safety performance of an organization with examples drawn from legal and quasi legal processes one of the more enlightening and thought provoking features of this book is the extensive use of cross examination taken from various proceedings no one person reacts the same to finding him or herself responsible for managing the aftermath of a death at work or having to deal with the immediate pressure of being subject to interviews and investigation by safety regulators much less the

drawn out experience of the legal process but one of the most constant reactions is why didn't anybody tell me about this stressing the importance of safety culture this book details the true nature of the expectations that are placed on managers by virtue of their obligation to provide a safe workplace

We Do Not Have Borders 2011 there has been a discernable calibration of chinese foreign policy since the ascension of xi jinping to the top leadership positions in china the operative term here is adjustment rather than renovation because there has not been a fundamental transformation of chinese foreign policy or setting up of a new kitchen in foreign affairs several continuities in chinese diplomacy are still evident the people's republic of china prc has not wavered from its overarching strategy of rising through peaceful development the prc is still an active participant and leader in or shaper of global and regional regimes even as it continues to push for reforms of the extant order towards an arrangement which it thinks will be less unjust and more equitable it seeks to better link up with the international track perhaps even more so under xi's stewardship yet amidst these continuities it is clear that there have been some profound shifts in china's foreign policy from the enunciation of strategic slogans such as the asian security concept and major country diplomacy with chinese characteristics the creation of the china led and initiated asian infrastructure investment bank the pursuit of xi's signature foreign policy initiative the one belt one road to a purportedly more assertive and resolute defense of china's maritime territorial interests in east asia examples of these foreign policy calibrations both patent and subtle abound in short this has not been a complete metamorphosis but there are real changes with important repercussions for china and the international system the burning questions then are what where how and why what are these key foreign policy adjustments where and how have these occurred in chinese diplomacy and what are the reasons or drivers that inform these changes this book seeks to capture these changes featuring contributions from academics think tank intellectuals and policy practitioners all engaged in the compelling business of china watching the book aims to shed more light on the calibrations that have

animated china s diplomacy under xi a leader who by most accounts is considered the most powerful chinese numero uno since deng xiaoping
