this volume offers an introduction to consciousness research within philosophy psychology and neuroscience from a philosophical perspective and with an emphasis on the history of ideas and core concepts the book begins by examining consciousness as a modern mystery thereafter the book introduces philosophy of mind and the mind body problem and proceeds to explore psychological philosophical and neuroscientific approaches to mind and consciousness the book then presents a discussion of mysterianist views of consciousness in response to what can be perceived as insurmountable scientific challenges to the problem of consciousness as a response to mysterianist views the next chapters examine radical approaches to rethinking the problem of consciousness including externalist approaches the final two chapters present the author s personal view of the problem of consciousness consciousness remains a mystery for contemporary science a mystery raising many questions why does consciousness persist as a mystery are we humans not intelligent enough to solve the riddle of

consciousness if we can solve this mystery what would it take what research would we need to conduct moreover the mystery of consciousness prompts the larger question of how well the cognitive sciences have actually advanced our understanding of ourselves as human beings after all consciousness is not just a minor part of our existence without consciousness we would not be human beings at all this book aims to increase the accessibility of major ideas in the field of consciousness research and to inspire readers to contribute to the ongoing discussion of the place of consciousness in nature intended for first year chemistry majors and non majors this book teaches students the concepts and skills for understanding chemistry and contains content related to organic chemistry it also provides the information students need for learning skill development reference and test preparation this book celebrates the life and work of peter nijkamp whose research provides a strong focus on regional science his work follows a rigorous comprehensive approach centred around analytical modelling and methodological innovation this edited volume like prof nijkamp s research covers a wide range of topics in regional science analysed through multi criteria evaluation evaluation modelling econometrics and simulations among other methods these tools are applied to the analysis of society and culture tourism and information cities environment and sustainability professor nijkamp is one of the founders and the past president of the regional science association international his work forms a valuable reference for researchers scholars
