this book presents extensive new research findings on and new thinking about southeast asia in this interesting richly diverse but much understudied period it examines the wide and well developed trading networks explores the different kinds of regimes and the nature of power and security considers urban growth international relations and the beginnings of european involvement with the region and discusses religious factors in particular the spread and impact of christianity one key theme of the book is the consideration of how well developed southeast asia was before the onset of european involvement and how during the peak of the commercial boom in the 1500s and 1600s many polities in southeast asia were not far behind europe in terms of socio economic progress and attainments
