this book examines the potential impact of human rights in the way the law interacts with families traditionally family law has been dominated by consequentialist utilitarian themes the most notable example of this occurs in the law relating to children and the employment of the welfare principle this requires the court to focus on the welfare of the child as the paramount consideration hitherto the courts and to a certain extent family law academics have firmly rejected the use of the language of rights preferring the discretion and child centred focus of welfare however the incorporation of the european convention on human rights via the human rights act now requires family law to deal more clearly with the competing rights that family members can hold in addition it is clear that to date the courts have largely ignored or minimised the different demands that the hra imposes on the judiciary and in particular judicial reasoning this book challenges that view and suggests ways in which the family courts may improve their reasoning in this field no longer can cases be dealt with on the basis of a simple utilitarian calculation of what is in the best interests of the child and other family members greater transparency is required the book clarifies the different rights that family

members can hold and in particular identifies ways in which it may be possible to deal with the clash of rights between family members that will inevitably occur whether this requires an abandonment of the utilitarian nature of family law or a reworking of it is a theme that runs throughout the book
