chapman hall crc monographs on statistics and applied Apr 11 2024 the monographs in the series present succinct and authoritative overviews of methodology often with an emphasis on application through worked examples and software for their implementation they are written so as to be accessible to graduate students researchers and practitioners of statistics as well as quantitative scientists from the many

institute of mathematical statistics monographs Mar 10 2024 guiding readers through the main concepts and results it covers both the probability and the statistics sides of the subject in the univariate and multivariate settings

an introduction to the bootstrap chapman hall crc Feb 09 2024 an introduction to the bootstrap chapman hall crc monographs on statistics and applied probability 1st edition by bradley efron author r j tibshirani author 4 4 35 ratings part of issn 110 books see all formats and editions

monographs on statistics and applied probability series jstor Jan 08 2024 statistics o e barndorff nielsen aarhus university denmark and d r cox frs nuffield col lege oxford uk sets out in detail mathematical techniques valuable for providing useful approximate solutions to a wide range of problems in statistics and applied probability 240pp illus march 1989

density estimation for statistics and data analysis Dec 07 2023 published in monographs on statistics and applied probability london chapman and hall 1986 density estimation for statistics and data analysis b w silverman school of mathematics university of bath uk table of contents introduction what is density estimation density estimates in the exploration and presentation of data further reading

an introduction to the bootstrap chapman hall crc Nov 06 2023 the bootstrap is a computer based method of statistical inference that answers statistical questions without formulas and gives a direct appreciation of variance bias coverage and other probabilistic phenomena

local polynomial modelling and its applications monographs Oct 05 2023 local polynomial modeling and its applications provides an up to date picture on state of the art nonparametric regression techniques the emphasis of the book is on methodologies rather than on theory with a particular focus on applications of nonparametric techniques to various statistical problems high dimensional data analytic tools are

tensor methods in statistics monographs on statistics and Sep 04 2023 this book provides a systematic development of tensor methods in statistics beginning with the study of multivariate moments and cumulants the effect on moment arrays and on cumulant arrays of making linear or affine transformations of the variables is studied

markov models optimization chapman hall crc monographs Aug 03 2023 part of chapman hall crc monographs on statistics and applied probability 111 books see all formats and editions this book presents a radically new approach to problems of evaluating and optimizing the performance of continuous time stochastic systems

monographs on statistics and applied probability semantic Jul 02 2023 this thesis proposes a novel

statistical inference methods based on empirical likelihood with estimating equations that can be used to formally test hypotheses of the following types whether a model with a fixed set of parameter values is consistent with sample at multiple frequencies and whether the model itself is capable of being consistent

identification of outliers douglas m hawkins google books Jun 01 2023 identification of outliers general theoretical principles a single outlier in normal samples the gamma distribution multiple outliers non parametric tests outliers from the linear model

institute of mathematical statistics ims monographs ims Mar 30 2023 ims monographs ims monographs are concise research monographs of high quality on any branch of statistics or probability of sufficient interest to warrant publication as books some will concern relatively traditional topics in need of up to date assessment others will be on emerging themes

cambridge monographs on applied and computational mathematics Feb 26 2023 the cambridge monographs on applied and computational mathematics publishes expositions on all aspects of applicable numerical and computational mathematics the series represents the growth in applications of mathematical and numerical techniques to problems from all areas of science

local polynomial modelling and its applications monographs Jan 28 2023 local polynomial modeling and its applications provides an up to date picture on state of the art nonparametric regression techniques the emphasis of the book is on methodologies rather than on

statistics for long memory processes jan beran taylor Dec 27 2022 this book explores data sets from a wide range of disciplines such as hydrology climatology telecommunications engineering and high precision physical measurement the data sets are conveniently compiled in the index and this allows readers to view statistical approaches in a practical context

statistical learning with sparsity the lasso and Nov 25 2022 statistical learning with sparsity the lasso and generalizations presents methods that exploit sparsity to help recover the underlying signal in a set of data top experts in this rapidly evolving field the authors describe the lasso for linear regression and a simple coordinate descent algorithm for its computation

the statistical analysis of compositional data monographs on Oct 25 2022 the statistical analysis of compositional data monographs on statistics and applied probability first edition by j aitchison author 4 6 4 ratings see all formats and editions
