I recommend this text to anyone who has an abiding interest in not how we should make decisions but how in reality we do. Journal of Clinical Nursing: How do clinicians use formal knowledge in their practice? What other kinds of reasoning are used? What is the place of moral judgement in clinical practice? In the last decade the problem of clinical judgement has been reduced to the simple question: what works? However, before clinicians can begin to think about what works they must first address more fundamental questions such as: what's wrong or what sort of problem is this? The complex ways in which professionals negotiate the process of case formulation remain radically underexplored in the existing literature. This timely book examines this neglected area, drawing on the author's own detailed ethnographic and discourse analytic studies and on developments in social science. The book aims to reconstitute clinical judgement and case formulation as both practical moral and rational technical activities by making social scientific work more accessible and meaningful to professionals in practice. It develops the case for a more realistic approach to the many reasoning processes involved in clinical judgement. Clinical judgement in the health and welfare professions has been written for educators, managers, practitioners and advanced students in health and social care. It will also appeal to those with an interest in the analysis of institutional discourse and ethnographic research.

This book examines the ways in which North American indigenous identity has been reimagined, represented and negotiated in German, Croatian, Italian, Polish and Czech culture, employing a cross-disciplinary and comparative approach and drawing on a range of media from literature, comics and film to photography, painting and the performative arts across different historical and cultural backgrounds. It aims to both contribute innovative scholarship on indigenous studies in Europe and open a new avenue in the field by focusing on central European settings that have received little or no critical attention to date. The book's novelty also comes from its focus on the latest developments in the field, including the Ravensburger Winnetou controversy which swept across Europe in 2022, echoing the 2017 Canadian debate over indigenous appropriation and free speech. It seeks to provide a sound reference and lay the groundwork for future scholarship by opening up a conversation on how indigenous identities have been portrayed in central European literature and media texts. To this end, it not only addresses generalized expectations about North American indigenous people underlying central European public discourse and imagination but

also questions whether and to what extent some of the ingrained stereotypical views and practices such as hobbyism have been challenged in the face of indigenous resurgence rapidly changing media and information sharing realities and global cultural shifts the closing interview with métis playwright actor and director bruce sinclair underscores one of the book s key goals to spark an informed cross cultural dialogue that will reveal the mechanisms of as well as the contradictions and tensions inherent in the politics of indigenous representation in central european cultural industries and encourage central europeans to confront their own cultural assumptions and attitudes
