this study portrays how louise erdrich s writing extends bakhtin s concepts of dialogism and the novel through an investigation of a selection of her works as well as her practices of writing co writing re writing and reading novels erdrich s hallmark dialogic literary style and practice encompasses writing a series of books re cycling protagonists narrators events themes and settings re writing previously published novels employing heteroglossia and polyglossia co authoring texts blogging about books translating different

epistemologies for different audiences and spotlighting families as the main thematic concern in dialogue with her own parenting experiences as depicted in her memoirs she writes a growing series of novels compost pile like capitalizing on former novels as well as adding new elements and new stories in the process thus a dialogic intra textual microcosm emerges erdrich suffuses her writing with an incessant quality of changing and becoming her novels resist closure while protagonists return and demand attention and the author answers dialogically by penning new tales erdrich s writing can be accessed because it concerns shared human experiences and relationships both their ambivalence and their beauty erdrich includes instead of alienating sympathizes instead of judging which makes her an internationally acclaimed author with her work crossing topographies epistemologies and identities

women and resistance in iran cowboy songs fetal alcohol syndrome the conquest of everest women settlers in natal what do these topics have in common the study of what used to be called commonwealth literature or the new literatures has by now come to be known as postcolonial study this collection of essays investigates the status of postcolonial studies today the contributors come from three generations the pioneers who introduced study of the new literatures into university english departments the next generation who refined and developed many of the theoretical positions embodied in postcolonial study and the next much younger generation who use the established practices of the discipline to investigate the application of this theory in a wide range of cultural contexts although the authors write from such different starting points a surprisingly similar set of images phrases and topics of concern emerge in their essays they return constantly to issues of difference and similarity the re examination of categories that often appear to be too rigidly defined in current postcolonial practices and to concepts of sharing experience ideas of home and even the use of land postcolonizing the commonwealth studies in literature and culture offers an intriguing analysis of

the state of postcolonial criticism today and of the application of postcolonial methods to a variety of texts and historical events it is an invaluable contribution to the current debate in both literary and cultural studies

when children are born with disabilities or become disabled in childhood parents often experience bewilderment they find themselves unexpectedly in another world without a roadmap without community and without narratives to make sense of their experiences the disabled child memoirs of a normal future tracks the narratives that have emerged from the community of parent memoirists who since the 1980s have written in resistance of their children's exclusion from culture though the disabilities represented in the genre are diverse the memoirs share a number of remarkable similarities they are generally written by white heterosexual middle or upper middle class able-bodied parents and they depict narratives in which the disabled child overcomes barriers to a normal childhood and adulthood apgar demonstrates that in the process of telling these stories which recuperate their children as productive members of society parental memoirists write their children into dominant cultural narratives about gender race and class by reinforcing and buying into these norms apgar argues special needs parental memoirs reinforce ableism at the same time that they're writing against it

some say the fetus is the tiniest citizen if so then the bodies of women themselves have become political arenas or recent cases suggest battlefields a cocaine addicted mother is convicted of drug trafficking through the umbilical cord women employees at a battery plant must prove infertility to keep their jobs a terminally ill woman is forced to undergo a cesarean section no longer concerned with conception or motherhood the new politics of fetal rights focuses on fertility and pregnancy itself on a woman's relationship with the fetus how exactly cynthia daniels asks does this affect a woman's rights are they different from a man's and how has the state helped determine the difference the answers rigorously pursued throughout this book give us a detailed look into the state's paradoxical role in gender politics as both a challenger of injustice and an agent of social control in benchmark legal cases concerned with forced medical treatment fetal protectionism in the workplace and drug and alcohol use and abuse daniels shows us state power at work in the struggle between fetal rights and women's rights these cases raise critical questions about the impact of gender on women's standing as citizens and about the relationship between state power and gender inequality fully appreciating the difficulties of each case the author probes the subtleties of various positions and their implications for a deeper understanding of how a woman's reproductive capability affects her relationship to state power in her analysis the need to defend women's right to self sovereignty becomes clear but so does the need to define further the very concepts of self sovereignty and privacy the intensity of the debate over fetal rights suggests the depth of the current gender crisis and the force of the feelings of social dislocation generated by reproductive politics breaking through the public mythology that clouds these debates at women's expense makes a hopeful beginning toward liberating woman's body within the body politic

you have to take the children away donald trump taking children argues that for four hundred years the united states has taken children for political ends black children native children latinx children and the children of the poor have all been seized from their kin and caregivers as laura briggs s sweeping narrative shows the practice played out on the auction block in the boarding schools designed to pacify the native american population in the foster care system used to put down the black freedom movement in the us s anti communist coups in central america and in the moral panic about crack babies in chilling detail we see how central

americans were made into a population that could be stripped of their children and how every us administration beginning with reagan has put children of immigrants and refugees in detention camps yet these tactics of terror have encountered opposition from every generation and briggs challenges us to stand and resist in this powerful corrective to american history

medical humanities and disability studies are disciplines at the cutting edge of innovative critical work in the study of health and disability but to date there has been no book length examination of the relationship between the two although each has emerged from different heritages they share many features from discussing the complexities of embodiment identifying processes of exclusion and championing user participation to a commitment to new forms of critical writing in disciplines explores the connections between the two disciplines in detail it presents a series of provocations about how they interact the forms their practice take and their strengths and weaknesses as working methods with a focus on life stories that give accounts of health and disability experiences it mixes creative and critical writing in an accessible manner aimed at a wide audience in both medical humanities and disability studies and across new humanities more widely the book asserts that both disciplines need to evaluate and challenge core assumptions if they are to remain critically relevant in the evolving study of social and cultural understanding of health and disability

until recently collaborative authorship has barely been considered by scholars when it has the focus has been on discovering who contributed what and who dominated whom in the relationship and in the writing in women coauthors holly laird reads coauthored texts as the realization of new kinds of relationship through close scrutiny of literary collaborations in which women writers have played central roles women coauthors shows how partnerships in writing between two women or between a woman and a man provide a paradigm of literary creativity that complicates traditional views of both author and text and makes us revise old habits of thinking about writing focusing on the social dynamics of literary production including the conversations that precede and surround collaborative writing women coauthors treats its coauthored texts as representations as well as acts of collaboration holly a laird discusses a wide array of partial and full coauthorships to reveal how these texts blur or remap often uncanny boundaries of self status race reason and culture that of the delany sisters and amy hill hearth on having our say lesbian couples whose lives and writings were intertwined including katherine bradley and edith cooper michael field and gertrude stein and alice b toklas and the native american wife and husband authors louise erdrich and michael dorris framed in time by the feminist and abolitionist movements of the mid nineteenth century and the ongoing social struggles surrounding gender race and sexuality in the late twentieth century the partnerships and texts observed in women coauthors explore collaboration as a path toward equity both socioliterary and erotic for the authors here who collaborate most fully with each other two are much better than one

while great strides have been made in documenting discrimination against women in america our awareness of discrimination is due in large part to the efforts of a feminist movement dominated by middle class white women and is skewed to their experiences yet discrimination against racial ethnic women is in fact dramatically different more complex and more widespread and without a window into the lives of racial ethnic women our understanding of the full extent of discrimination against all women in america will be woefully inadequate now in this illuminating volume karen anderson offers the first book to examine the lives of women in the

three main ethnic groups in the united states native american mexican american and african american women revealing the many ways in which these groups have suffered oppression and the profound effects it has had on their lives here is a thought provoking examination of the history of racial ethnic women one which provides not only insight into their lives but also a broader perception of the history politics and culture of the united states for instance anderson examines the clash between native american tribes and the u s government particularly in the plains and in the west and shows how the forced acculturation of indian women caused the abandonment of traditional cultural values and roles in many tribes women held positions of power which they had to relinquish subordination to and economic dependence on their husbands and the loss of meaningful authority over their children ultimately indian women were forced into the labor market the extended family was destroyed and tribes were dispersed from the reservation and into the mainstream all of which dramatically altered the woman s place in white society and within their own tribes the book examines mexican american women revealing that since u s job recruiters in mexico have historically focused mostly on low wage male workers mexicans have constituted a disproportionate number of the illegals entering the states placing them in a highly vulnerable position and even though mexican american women have in many instances achieved a measure of economic success in their families they are still subject to constraints on their social and political autonomy at the hands of their husbands and finally anderson cites a wealth of evidence to demonstrate that in the years since world war ii african american women have experienced dramatic changes in their social positions and political roles and that the migration to large urban areas in the north simply heightened the conflict between homemaker and breadwinner already thrust upon them changing woman provides the first history of women within each racial ethnic group tracing the meager progress they have made right up to the present indeed anderson concludes that while white middle class women have made strides toward liberation from male domination women of color have not yet found in feminism any political remedy to their problems
