this book presents the concept of unstaging war as a strategic response to the failure of the discourse and institutions of peace this failure is explained by exploring the changing character of conflict in current and emergent global circumstances such as asymmetrical conflicts insurgencies and terrorism fry argues that this pluralisation of war has broken the binary relation between war and peace conflict is no longer self evident and consequentially the changes in the conditions nature systems philosophies and technologies of war must be addressed through a deep understanding of contemporary war fry explains why peace fails as both idea and process before presenting unstaging war as a concept and nascent practice that acknowledges conflict as structurally present and so is not able to be dealt with by attempts to create peace against a backdrop of

increasingly tense relations between global power blocs the beginnings of a new nuclear arms race and the ever increasing human and environmental impacts of climate change a more viable alternative to war is urgently needed unstaging war is not claimed as a solution but rather as an exploration of critical problems and an opening into the means of engaging with them

a powerful argument for new laws and policies regarding cyber security from the former us secretary of homeland security the most dangerous threat we individually and as a society face today is no longer military but rather the increasingly pervasive exposure of our personal information nothing undermines our freedom more than losing control of information about ourselves and yet as daily events underscore we are ever more vulnerable to cyber attack in this bracing book michael chertoff makes clear that our laws and policies surrounding the protection of personal information written for an earlier time need to be completely overhauled in the internet era on the one hand the collection of data more widespread by business than by government and impossible to stop should be facilitated as an ultimate protection for society on the other standards under which information can be inspected analysed or used must be significantly tightened in offering his compelling call for action chertoff argues that what is at stake is not only the simple loss of privacy which is almost impossible to protect but also that of individual autonomy the ability to make personal choices free of manipulation or coercion offering colourful stories over many decades that illuminate the three periods of data gathering we have experienced chertoff explains the complex legalities surrounding issues of data collection and dissemination today and charts a forceful new strategy that balances the needs of government business and individuals alike
