Recommended Specification for Asphalt Varnish

1922

nsa is a comprehensive collection of international nuclear science and technology literature for the period 1948 through 1976 pre dating the prestigious inis database which began in 1970 nsa existed as a printed product volumes 1 33 initially created by doe s predecessor the u s atomic energy commission aec nsa includes citations to scientific and technical reports from the aec the u s energy research and development administration and its contractors plus other agencies and international organizations universities and industrial and research organizations references to books conference proceedings papers

patents dissertations engineering drawings and journal articles from worldwide sources are also included abstracts and full text are provided if available

Circular of the Bureau of Standards

1921

it is old news that we are in a new information age and it should come as no surprise that we need new information to help us change our old ways as clinical laboratory scientists physicians and technologists we need new ideas processes tools and technology to transform our healthcare laboratories from production testing operations into information management organisations our future is providing diagnostic and treatment information regardless where testing is performed and who performs the measurements to facilitate the transformation to an information management organisation this publication describes a reference information model for healthcare laboratories this model allows us to gain new insights into our operations and organisations and helps us to better define and understand our critical information processes along with the model they also provide the computer tools to support that transformation and facilitate the new information management organisation by coupling theory with technology they show us the nature of the new organization and start us on the path to the future
