over the course of performance car history and specifically muscle car history big block engines are
 particularly beloved and for good reason not only are they the essence of what a muscle car is but before
 modern technology and stroker engines they were also the best way to make a lot of horsepower all of
 the detroit manufacturers had their versions of big block engines and ford was no exception actually ford
 was somewhat unique in that it had two very different big block engine designs during the muscle car era
 the fe engine was a design pioneered in the late 1950s primarily as a more powerful replacement for the
 dated y block design because cars were becoming bigger and heavier and therefore necessitated more

power to move what started as torquey engines meant to move heavyweight sedans morphed into screaming high performance mills that won le mans and drag racing championships through the 1960s by the late 1960s the design was dated so ford replaced the fe design with the 385 series also known as the lima design which was more similar to the canted valve cleveland design being pioneered at the same time it didn't share the 1960s pedigree of racing success but the new design was better in almost every way it exists via ford motorsports offerings to this day in ford big block parts interchange ford expert and historian george reid covers both engines completely interchange and availability for all engine components are covered including cranks rods pistons camshafts engine blocks intake and exhaust manifolds carburetors distributors and more expanding from the previous edition of high performance ford parts interchange that covered both small and big block engines in one volume this book cuts out the small block information and devotes every page to the fe series and 385 big blocks from ford which allows for more complete and extensive coverage
