the world keeps turning to apocalypticism time is imagined as proceeding ineluctably to a catastrophic perhaps revelatory conclusion even when evacuated of distinctly religious content a broadly ecclesial structure persists in conceptions of our precarious life and our collective journey to an inevitable fate the extinction of the human species it is commonly believed that we are propelled along this course by human turpitude myopia hubris or ignorance and by the irreparable damage we have wrought to the world we inhabit yet this apprehension is insidious such

teleological convictions and crises laden narratives lead us to undervalue contingent hesitant and provisional forms of experience and knowledge the essays comprising this volume concern a range of writers engagements with apocalyptic reasoning extending from a reading of percy bysshe shelley s triumph of life to critiques of contemporary american novels they examine the ways in which end times reasoning can inhibit imaginative reflection blunt political advocacy or more positively provide a repertoire for the critique of complacency by gathering essays concerning a wide range of periods and literary dispositions this volume makes an important contribution to thinking about apocalypticism in literature but also as a social and political discourse this book was originally published as a special issue of *studia neophilologica*

Indonesia's vast legal system is often misunderstood due to its complexity and pluralism. It is an amalgamation of inherited Dutch civil and criminal codes, 76 years of national law development under both authoritarian and democratic administrations, as well as revivals of pre-colonial Islamic and customary adat law. As Indonesia's economy and population continue to grow to among the largest in the world, it has never been more important to understand how the country's laws are evolving. The world's third largest democracy and home to the largest Muslim population, Indonesia is a law-based nation but faces an array of challenges in the ongoing reformation of the legal system. Tackling corruption, protecting the environment, court reform, and implications of technological change are just a few of the issues. For 70 years, the Faculty of Law at Andalas University in Padang, West Sumatra, has been producing legal scholars and practitioners to help guide the development of Indonesia's legal system.

compiled by saldi isra this book is a collection of contributions from the law faculty s academic staff who identify and explain some of the major constitutional political social and economic issues within indonesia s changing legal landscape

in 1800 mexico city was the largest richest most powerful city in the americas its vibrant silver economy an engine of world trade then napoleon invaded spain in 1808 desperate to gain new spain s silver he broke spain s monarchy setting off a summer of ferment in mexico city

people took to the streets dreaming of an absent king seeking popular sovereignty and imagining that the wealth of silver should serve new Spain and its people until a military coup closed public debate. Political ferment continued while drought and famine stalked the land together they fueled the political and popular risings that exploded north of the capital in 1810. Tutino offers a new vision of the political violence and social conflicts that led to the fall of silver capitalism and Mexican independence in 1821. People demanding rights faced military defenders of power and privilege the legacy of 1808 that shaped Mexican history.

Scholars have used Levinas as a lens through which to view many authors and texts. Fields of endeavor and works of art yet no book-length work or dedicated volume has brought this thoughtful lens to bear in a sustained discussion of the works of Shakespeare. It should not surprise anyone that Levinas identified his own thinking as Shakespearean. The play *the thing* for both or put differently the observation of intersubjectivity is what may surprise and indeed delight all learned readers is to consider what we might yet gain from considering each in light of the other. Comprising leading scholars in philosophy and literature of Levinas and Shakespeare to see another thus is the first book-length work to treat both great thinkers. Lear, Hamlet, and Macbeth dominate the discussion however essays also address *Cymbeline*, *The Merchant of Venice*, and even poetry such as *Venus and Adonis*. Volume editors planned and contributors deliver a thorough treatment from multiple perspectives yet none intends this volume to be the last word on the subject rather they would have it be a provocation to further discussion an enticement for richer enjoyment and an invitation for deeper contemplation of Levinas and Shakespeare.

global issues such as climate change and the aftermath of the 2008 financial crisis have spurred interest in thinking about the history of the modern economy that goes beyond disciplinary economic history this book contributes to the cultural history of capitalism and its different regimes of productivity by pursuing the perspective of body history and by providing a global scope throughout modernity the body served as a fundamental albeit essentially changing linchpin for both the organization of economic practices and for intellectual reflections on the economy in

particular it was the pivotal interface to render notions of economic productivity intelligible the book explores this central thesis in a range of case studies drawing on source material from west africa europe mexico and the us framed by a theoretically informed introduction which also provides a conceptual history of notions of productivity and by an afterword that brings the approaches explored in this volume into dialogue with scholarship inspired by marx and foucault the individual chapters tackle the concept of productivity from a wide array of angles each illuminating the promises and problems of a cultural take on the history of economic productivity
