## Reconstructing the Middle East

2017-02-24

it is clear by now that the label arab spring has proven too simplistic to describe the uprisings that upended the political order of the arab world in late 2010 brutal crackdowns and civil conflict in syria libya and yemen dashed the hopes that peaceful democratic revolutions would sweep the region in other countries the departure of authoritarian leaders led to many false starts without producing democratic conclusions societies that had appeared united in opposition suddenly seemed fractious youth were once again banished to the political margins reconstructing the middle east examines the changes that happened within the region from 2010 and the long term challenges and opportunities they present featuring the work of authors with a diversity of perspectives most of whom hail from the region it addresses key issues of political economic and societal changes the role of young people and of the international community in addition the book deals with the questions of both political and economic reform and the intertwined nature of the two political reform that allows greater participation will fail to quell frustration if arabs continue to feel that their job prospects are bleak similarly arabs will not accept economic reform that restores growth but continues to fence off the political sphere this book offers a unique perspective on the uprisings by focusing on specific issue areas where change is needed and offering a roadmap for the long road towards state building and new social contracts based on political inclusion respect for pluralism and sustained economic growth as such it will be a valuable resource for students and scholars of middle east politics as well as those with an interest in the arab spring

the oxford handbook of law and anthropology is a ground breaking collection of essays that provides an original and internationally framed conception of the historical theoretical and ethnographic interconnections of law and anthropology each of the chapters in the handbook provides a survey of the current state of scholarly debate and an argument about the future direction of research in this dynamic and interdisciplinary field the structure of the handbook is animated by an overarching collective narrative about how law and anthropology have and should relate to each other as intersecting domains of inquiry that address such fundamental questions as dispute resolution normative ordering social organization and legal political and social identity the need for such a comprehensive project has become even more pressing as lawyers and anthropologists work together in an ever increasing number of areas including immigration and asylum processes international justice forums cultural heritage certification and monitoring and the writing of new national constitutions among many others the handbook takes critical stock of these various points of intersection in order to identify and conceptualize the most promising areas of innovation and sociolegal relevance as well as to acknowledge the points of tension open questions and areas for future development
