(Read Only)

both the way we look at data through a dbms and the nature of data we ask a dbms to manage have drastically evolved over the last decade moving from text to images and to sound to a lesser extent visual representations are used extensively within new user interfaces powerful visual approaches are being experimented for data manipulation including the investigation of three dimensional display techniques similarly sophisticated data visualization techniques are dramatically improving the understanding of the information extracted from a database on the other hand more and more applications use images as basic data or to enhance the quality and richness of data manipulation services image management has opened a wide area of new research topics in image understanding and analysis the ifip 2 6 working group on databases strongly believes that a significant mutual enrichment is possible by confronting ideas concepts and techniques supporting the work of researcher and practitioners in the two areas of visual interfaces to dbms and dbms management of visual data for this reason ifip 2 6 has launched a series of conferences on visual database systems the first one has been held in tokyo 1989 vdb 2 was held in budapest 1991 this conference is the third in the series as the preceding editions the conference addresses researchers and practitioners active or interested in user interfaces human computer communication knowledge representation and management image processing and understanding multimedia database techniques and computer vision the recent fascination in finnish folklore studies with popular thought and the values and emotions encoded in oral tradition began with the realisation that the vast collections of the finnish folklore archives still have much to offer the modern day researcher these archive materials were not only collected by scholars but also by the ordinary rural populace interested in their own traditions by performers and their audiences with its myriad voices this body of source

material thus provides new avenues for the researcher seeking to penetrate popular thought what does oral tradition tell us about the way its performers think and feel what sorts of beliefs and ideas are transmitted in traditional songs and narratives perspectives from the study of mentalities and cultural cognition research provide a framework for investigating these issues this collection of articles works from the premise that the cultural models which shape mentalities give rise to manifest expressions of culture including folklore these models also become embedded in the representations appearing in folklore and are handed down from one generation to the next the topics of the book cover age old myths and world views concepts of witchcraft and the devil stretching back to the middle ages and the values and collective emotions of finnish and hungarian agrarian communities this text demonstrates why incorporating extensive knowledge that exists in poor rural areas into development of land and reform policies is essential for truly democratic social and economic transformation renewing development in sub saharan africa reviews the debates and brings together specialist contributions to provide a clear guide to the major complexities of african development they lay the foundation for designing a range of individual country specific policy sets in which the strategic components are prioritized according to each country s constraints and opportunities the emphasis of the book is on the identification of effective strategies that will enable individual countries to most effectively exploit their growth opportunities and to meet poverty reducing and other key equity objectives this study addresses the problems scrambling languagues provide for the existing syntactic theories by analyzing the interaction of semantic and discourse functional factors with syntactic properties of word order in this type of languagues and by discussing the implications of this interaction for universal grammar three interrelated goals are carefully followed in this work the first is to analyze the syntactic structure of persian a language which exhibits free word order with this analysis the author has accounted for the relative order of categorized expressions the motivation for their possible rearrangements and the grammatical results of those reorderings in this respect a broad range of major syntactic phenomena including object shift case extended projection principle epp binding and scope interpretation of quantifiers interrogative phrases adverbial phrases and negative elements are examined this monograph

is the first major theoretical work ever published on persian and therefore fills the existing gap by providing insight into the syntactic structure of this language the second goal is to connect these insights to similar linguistic properties in languages in which scrambling occurs e g german dutch hindi russian japanese and korean and to provide a deeper understanding of this group of genetically diverse but typologically related languages the final and principal goal is to situate the results of this work within the framework of the minimalist program mp the investigations in this study indicate that scrambling is not an optional rule and that certain principles of mp such as the minimal link condition are only seemingly violated in these languages furthermore it is shown that careful analysis of scrambling with respect to binding and scope relations and a reanalysis of the properties of a and a movements cast some doubts on the relevance of a typology of movement in natural language this book constitutes the refereed proceedings of the 1998 international conference on analytic tableaux and related methods tableaux 98 held in oisterwijk near tilburg the netherlands in may 1998 the volume presents 17 revised full papers and three system descriptions selected from 34 submissions also included are several abstracts of invited lectures tutorials and system comparison papers the book presents new research results for automated deduction in various non standard logics as well as in classical logic areas of application include software verification systems verification deductive databases knowledge representation and its required inference engines and system diagnosis who s who of canadian women is a guide to the most powerful and innovative women in canada celebrating the talents and achievement of over 3 700 women who s who of canadian women includes women from all over canada in all fields including agriculture academia law business politics journalism religion sports and entertainment each biography includes such information as personal data education career history current employment affiliations interests and honours a special comment section reveals personal thoughts goals and achievements of the profiled individual entries are indexed by employment of affiliation for easy reference published every two years who s who of canadian women selects its biographees on merit alone this collection is an essential resource for all those interested in the achievements of canadian women the principle of subsidiarity in catholic social thought implications

for social justice and civil society in nigeria provides a theoretical and practical framework for a just vision of society it focuses on how support for individuals and social groups in nigeria can foster the building of their communities through the practice of social justice social justice will ensure the building of trust across ethnic lines challenge corruption encourage accountability and servant leadership protect minority tribes from larger ones and promote grassroots self help tribal communal religious and non governmental associations as agents of positive social change and development these dynamics interact within a healthy federal structure that respects its constituent parts for the common good this volume is recommended as a graduate text for courses in theology religious education and social philosophy and for all interested in promoting the common good this book constitutes the proceedings of the 16th international conference on application and theory of petri nets held in torino italy in june 1995 the 26 revised refereed papers presented were selected from 73 submissions from 22 countries in addition there are abstracts or full papers of the three invited talks all theoretical and applicational aspects are addressed by the contributors coming from industry and academia this volume representatively documents the progress achieved in this application oriented area of research and development since the predecessor conference held one year earlier advanced modeling techniques are a necessary tool in order to design and manage manufacturing systems effectively this book contains a set of tutorial chapters on topics ranging from aggregate production planning to real time control including predictive and reactive scheduling flow management in assembly systems simulation of robotic cells design of manufacturing systems under uncertainty and a historical perspective on production management philosophies the book will be of interest both to researchers and practitioners including graduate students in manufacturing engineering and operations research the international symposium on practical aspects of declarative languages padl is a forum for researchers and practitioners to present original work emphasizing novel applications and implementation techniques for all forms of declarative concepts especially those emerging from functional logic and c straint languages declarative languages have been studied since the inception of computer science and continue to be a vibrant subject of investigation today due to their applicability in current application

domains such as bioinformatics network configuration the semantic telecommunications software etc the 6th padl symposium was held in dallas texas on june 18 19 2004 and was co located with the compulog americas summer school on computational logic from the submitted papers the program committee selected 15 for presentation at the symposium based upon three written reviews for each paper which were provided by the members of the program committee and additional referees two invited talks were presented at the conference the first was given by paul hudak yale university on an algebraic theory of polymorphic temporal media the second invited talk was given by andrew fallowland technologies and simon fraser university on supporting decisions in complex uncertain domains with declarative languages following the precedent set by the previous padl symposium the program committee this year again selected one paper to receive the most practical per award charts the ways that woman artists have represented themselves and their life stories accurate and reliable biographical information essential to anyone interested in the world of literature the international who's who of authors and writers offers invaluable information on the personalities and organizations of the literary world including many up and coming writers as well as established names with over 8 000 entries this updated edition features concise biographical information on novelists authors playwrights columnists journalists editors and critics biographical details of established writers as well as those who have recently risen to prominence entries detailing career works published literary awards and prizes membership and contact addresses where available an extensive listing of major international literary awards and prizes and winners of those prizes a directory of major literary organizations and literary agents a listing of members of the american academy of arts and letters this book examines the various ways in which some fragile states in the global south or states with limited statehood have adopted and adapted to processes of governance in their quests to address the socialized problems affecting their societies it tells the story of these states resilience in the societal adaptation to a liberalized notion of governance in addition to comparative case studies the book also analyzes the engendered interplay of culture economics and politics in the creation of people centric governance reforms the contributing authors shed light on weak states often constructive engagement in the promotion of state

governance under a variety of societal conditions adverse or otherwise and on their ability to remain resilient despite the complexities of the political and economic challenges they face this single volume affords instant access to more than 35 000 individual biographies of the people whose activities are shaping today s world among those profiled are prominent government figures high ranking military officers leaders of the largest corporations in each country heads of religious organizations pioneers in science the arts many more this volume contains the proceedings of the eurpoean conference on machine learning ecml 93 continuing the tradition of the five earlier ewsls european working sessions on learning the aim of these conferences is to provide a platform for presenting the latest results in the area of machine learning the ecml 93 programme included invited talks selected papers and the presentation of ongoing work in poster sessions the programme was completed by several workshops on specific topics the volume contains papers related to all these activities the first chapter of the proceedings contains two invited papers one by ross quinlan and one by stephen muggleton on inductive logic programming the second chapter contains 18 scientific papers accepted for the main sessions of the conference the third chapter contains 18 shorter position papers the final chapter includes three overview papers related to the ecml 93 workshops gender and welfare state regimes focuses on the interrelationships between aspects of the welfare state and labour market policies in structuring and transforming gender relations across a broad spectrum of countries the book examines the construction of gender in various government welfare policies and illustrates how the specific qualities of the welfare state reinforce or counteract gender inequalities the book argues that policy variation across the countries surveyed can be attributed to a variety of factors including differing strategies and demands of the women s movements the organisational strength of labour movements and industrial relations frameworks the constellation of parties supporting equality measure traditional values and state structures series gender and politics edited by professor karen beckwith at the department of political science college of wooster and professor joni lovenduski department of politics university of southampton extensive air showers are a very unique phenomenon in the more than six decades since their discovery by auger and collaborators we have learned a lot about

these extremely energetic events and gained deep insight into high energy phenomena particle physics and astrophysics in this tutorial reference manual and data book peter k f grieder provides the reader with a comprehensive view of the phenomenology and facts of the various types of interactions and cascades theoretical background experimental methods data evaluation and interpretation and air shower simulation he discusses astrophysical aspects of the primary radiation and addresses remaining puzzling questions that cannot yet be answered they remain as a challenge for present and future research in the field the book is split into two volumes volume i deals mainly with the basic theoretical framework of the processes that determine an air shower and ends with a summary of ways and means to extract information from air shower observations on the primary radiation it also presents a compilation of data of our current knowledge of the high energy portion of the primary spectrum and composition volume ii contains mainly compilations of data of experimental and theoretical nature as well as predictions from simulations of individual air shower constituents also included are chapters dedicated exclusively to special processes and detection methods extensive up to date reference lists appear at the end of each chapter researchers and students working in the field of cosmic ray detection and astroparticle physics will appreciate finding this book in their library the introduction and rapid spread of two eurasian mussel species dreissena polymorpha zebra mussel and dreissena rostriformis bugensis quagga mussel in waters of north america has caused great concern among industrial and recreational water users these invasive species can create substantial problems for raw water users such as water treatme this title is also available as an ebook explores class formation and elite struggles in post communist central europe coral reef fishes is the successor of the ecology of fishes on coral reefs this new edition includes provocative reviews covering the major areas of reef fish ecology concerns about the future health of coral reefs and recognition that reefs and their fishes are economically important components of the coastal oceans of many tropical nations have led to enormous growth in research directed at reef fishes coral reef fishes is much more than a simple revision of the earlier volume it is a companion that supports and extends the earlier work the included syntheses provide readers with the current highlights in this exciting science an up to

date review of key research areas in reef fish ecology with a bibliography including hundreds of citations most from the last decade
authoritative up to date provocative chapters written to suggest future research priorities an important companion and successor to the
ecology of fishes on coral reefs includes discussions of regulation of fish populations dispersal or site fidelity of larval reef fishes sensory
and motor capabilities of reef fish larvae and complexities of management of reef species and communities

both the way we look at data through a dbms and the nature of data we ask a dbms to manage have drastically evolved over the last decade moving from text to images and to sound to a lesser extent visual representations are used extensively within new user interfaces powerful visual approaches are being experimented for data manipulation including the investigation of three dimensional display techniques similarly sophisticated data visualization techniques are dramatically improving the understanding of the information extracted from a database on the other hand more and more applications use images as basic data or to enhance the quality and richness of data manipulation services image management has opened a wide area of new research topics in image understanding and analysis the ifip 2 6 working group on databases strongly believes that a significant mutual enrichment is possible by confronting ideas concepts and techniques supporting the work of researcher and practitioners in the two areas of visual interfaces to dbms and dbms management of visual data for this reason ifip 2 6 has launched a series of conferences on visual database systems the first one has been held in tokyo 1989 vdb 2 was held in budapest 1991 this conference is the third in the series as the preceding editions the conference addresses researchers and practitioners active or interested in user interfaces human computer communication knowledge representation and management image processing and understanding multimedia database techniques and computer vision

Myth and Mentality *2002-05-15*

the recent fascination in finnish folklore studies with popular thought and the values and emotions encoded in oral tradition began with the realisation that the vast collections of the finnish folklore archives still have much to offer the modern day researcher these archive materials were not only collected by scholars but also by the ordinary rural populace interested in their own traditions by performers and their

audiences with its myriad voices this body of source material thus provides new avenues for the researcher seeking to penetrate popular thought what does oral tradition tell us about the way its performers think and feel what sorts of beliefs and ideas are transmitted in traditional songs and narratives perspectives from the study of mentalities and cultural cognition research provide a framework for investigating these issues this collection of articles works from the premise that the cultural models which shape mentalities give rise to manifest expressions of culture including folklore these models also become embedded in the representations appearing in folklore and are handed down from one generation to the next the topics of the book cover age old myths and world views concepts of witchcraft and the devil stretching back to the middle ages and the values and collective emotions of finnish and hungarian agrarian communities

No More Tears *1997*

this text demonstrates why incorporating extensive knowledge that exists in poor rural areas into development of land and reform policies is essential for truly democratic social and economic transformation

Index of Conference Proceedings *1995*

renewing development in sub saharan africa reviews the debates and brings together specialist contributions to provide a clear guide to the major complexities of african development they lay the foundation for designing a range of individual country specific policy sets in which the strategic components are prioritized according to each country s constraints and opportunities the emphasis of the book is on the identification of effective strategies that will enable individual countries to most effectively exploit their growth opportunities and to meet poverty reducing and other key equity objectives

Monthly Catalogue, United States Public Documents 1995-03

this study addresses the problems scrambling languages provide for the existing syntactic theories by analyzing the interaction of semantic and discourse functional factors with syntactic properties of word order in this type of languages and by discussing the implications of this interaction for universal grammar three interrelated goals are carefully followed in this work the first is to analyze the syntactic structure of persian a language which exhibits free word order with this analysis the author has accounted for the relative order of categorized expressions the motivation for their possible rearrangements and the grammatical results of those reorderings in this respect a broad range of major syntactic phenomena including object shift case extended projection principle epp binding and scope interpretation of quantifiers interrogative phrases adverbial phrases and negative elements are examined this monograph is the first major theoretical work ever published on persian and therefore fills the existing gap by providing insight into the syntactic structure of this language the second goal is to connect these insights to similar linguistic properties in languages in which scrambling occurs e g german dutch hindi russian japanese and korean and to provide a deeper understanding of this group of genetically diverse but typologically related languages the final and principal goal is to situate the results of this work within the framework of the minimalist program mp the investigations in this study indicate that scrambling is not an optional rule and that certain principles of mp such as the minimal link condition are only seemingly violated in these languages furthermore it is shown that careful analysis of scrambling with respect to binding and scope relations and a reanalysis of the properties of a and a movements cast some doubts on the relevance of a typology of movement in natural language

Literacy Situation in Asia and the Pacific 1984

this book constitutes the refereed proceedings of the 1998 international conference on analytic tableaux and related methods tableaux 98 held in oisterwijk near tilburg the netherlands in may 1998 the volume presents 17 revised full papers and three system descriptions selected from 34 submissions also included are several abstracts of invited lectures tutorials and system comparison papers the book presents new research results for automated deduction in various non standard logics as well as in classical logic areas of application include software verification systems verification deductive databases knowledge representation and its required inference engines and system diagnosis

Status of the NOICC/SOICC Network 1987

who s who of canadian women is a guide to the most powerful and innovative women in canada celebrating the talents and achievement of over 3 700 women who s who of canadian women includes women from all over canada in all fields including agriculture academia law business politics journalism religion sports and entertainment each biography includes such information as personal data education career history current employment affiliations interests and honours a special comment section reveals personal thoughts goals and achievements of the profiled individual entries are indexed by employment of affiliation for easy reference published every two years who s who of canadian women selects its biographees on merit alone this collection is an essential resource for all those interested in the achievements of canadian women

Renewing Development in Sub-Saharan Africa *2005-06-29*

the principle of subsidiarity in catholic social thought implications for social justice and civil society in nigeria provides a theoretical and practical framework for a just vision of society it focuses on how support for individuals and social groups in nigeria can foster the building of their communities through the practice of social justice social justice will ensure the building of trust across ethnic lines challenge corruption encourage accountability and servant leadership protect minority tribes from larger ones and promote grassroots self help tribal communal religious and non governmental associations as agents of positive social change and development these dynamics interact within a healthy federal structure that respects its constituent parts for the common good this volume is recommended as a graduate text for courses in theology religious education and social philosophy and for all interested in promoting the common good

Sullivan's Judicial Profiles *2000*

this book constitutes the proceedings of the 16th international conference on application and theory of petri nets held in torino italy in june 1995 the 26 revised refereed papers presented were selected from 73 submissions from 22 countries in addition there are abstracts or full papers of the three invited talks all theoretical and applicational aspects are addressed by the contributors coming from industry and academia this volume representatively documents the progress achieved in this application oriented area of research and development since the predecessor conference held one year earlier

A Minimalist Approach to Scrambling *2008-08-22*

advanced modeling techniques are a necessary tool in order to design and manage manufacturing systems effectively this book contains a set of tutorial chapters on topics ranging from aggregate production planning to real time control including predictive and reactive scheduling flow management in assembly systems simulation of robotic cells design of manufacturing systems under uncertainty and a historical perspective on production management philosophies the book will be of interest both to researchers and practitioners including graduate students in manufacturing engineering and operations research

Monthly Catalog of United States Government Publications *1994*

the international symposium on practical aspects of declarative languages padl is a forum for researchers and practitioners to present original work emphasizing novel applications and implementation techniques for all forms of declarative concepts especially those emerging from functional logic and constraint languages declarative languages have been studied since the inception of computer science and continue to be a vibrant subject of investigation today due to their applicability in current application domains such as bioinformatics network configuration the semantic telecommunications software etc the 6th padl symposium was held in dallas texas on june 18 19 2004 and was co located with the compulog americas summer school on computational logic from the submitted papers the program committee selected 15 for presentation at the symposium based upon three written reviews for each paper which were provided by the members of the program committee and additional referees two invited talks were presented at the conference the first was given by paul hudak yale university on an algebraic theory of polymorphic temporal media the second invited talk was given by andrew fall dowland technologies and simon fraser university on supporting decisions in complex uncertain domains with declarative languages following the precedent set by the previous padl

symposium the program committee this year again selected one paper to receive the most practical per award

Automated Reasoning with Analytic Tableaux and Related Methods *2003-06-26*

charts the ways that woman artists have represented themselves and their life stories

Who's Who of Canadian Women, 1999-2000 *1999-06-01*

accurate and reliable biographical information essential to anyone interested in the world of literature the international who's who of authors and writers offers invaluable information on the personalities and organizations of the literary world including many up and coming writers as well as established names with over 8 000 entries this updated edition features concise biographical information on novelists authors playwrights columnists journalists editors and critics biographical details of established writers as well as those who have recently risen to prominence entries detailing career works published literary awards and prizes membership and contact addresses where available an extensive listing of major international literary awards and prizes and winners of those prizes a directory of major literary organizations and literary agents a listing of members of the american academy of arts and letters

Artists in Britain since 1945 *2006*

this book examines the various ways in which some fragile states in the global south or states with limited statehood have adopted and adapted to processes of governance in their quests to address the socialized problems affecting their societies it tells the story of these states resilience in the societal adaptation to a liberalized notion of governance in addition to comparative case studies the book also

analyzes the engendered interplay of culture economics and politics in the creation of people centric governance reforms the contributing authors shed light on weak states often constructive engagement in the promotion of state governance under a variety of societal conditions adverse or otherwise and on their ability to remain resilient despite the complexities of the political and economic challenges they face

Bibliography on the Hydrology of the Himalaya-Karakoram Region 1996

this single volume affords instant access to more than 35 000 individual biographies of the people whose activities are shaping today s world among those profiled are prominent government figures high ranking military officers leaders of the largest corporations in each country heads of religious organizations pioneers in science the arts many more

Wildlife Review 1993

this volume contains the proceedings of the european conference on machine learning ecml 93 continuing the tradition of the five earlier ewsls european working sessions on learning the aim of these conferences is to provide a platform for presenting the latest results in the area of machine learning the ecml 93 programme included invited talks selected papers and the presentation of ongoing work in poster sessions the programme was completed by several workshops on specific topics the volume contains papers related to all these activities the first chapter of the proceedings contains two invited papers one by ross quinlan and one by stephen muggleton on inductive logic programming the second chapter contains 18 scientific papers accepted for the main sessions of the conference the third chapter contains 18 shorter position papers the final chapter includes three overview papers related to the ecml 93 workshops

General Technical Report RM. 1996

gender and welfare state regimes focuses on the interrelationships between aspects of the welfare state and labour market policies in structuring and transforming gender relations across a broad spectrum of countries the book examines the construction of gender in various government welfare policies and illustrates how the specific qualities of the welfare state reinforce or counteract gender inequalities the book argues that policy variation across the countries surveyed can be attributed to a variety of factors including differing strategies and demands of the women s movements the organisational strength of labour movements and industrial relations frameworks the constellation of parties supporting equality measure traditional values and state structures series gender and politics edited by professor karen beckwith at the department of political science college of wooster and professor joni lovenduski department of politics university of southampton

The Principle of Subsidiarity in Catholic Social Thought 2010-11

extensive air showers are a very unique phenomenon in the more than six decades since their discovery by auger and collaborators we have learned a lot about these extremely energetic events and gained deep insight into high energy phenomena particle physics and astrophysics in this tutorial reference manual and data book peter k f grieder provides the reader with a comprehensive view of the phenomenology and facts of the various types of interactions and cascades theoretical background experimental methods data evaluation and interpretation and air shower simulation he discusses astrophysical aspects of the primary radiation and addresses remaining puzzling questions that cannot yet be answered they remain as a challenge for present and future research in the field the book is split into two volumes volume i deals mainly with the basic theoretical framework of the processes that determine an air shower and ends with a summary of ways and means to extract information from air shower observations on the primary radiation it also presents a compilation of

data of our current knowledge of the high energy portion of the primary spectrum and composition volume ii contains mainly compilations of data of experimental and theoretical nature as well as predictions from simulations of individual air shower constituents also included are chapters dedicated exclusively to special processes and detection methods extensive up to date reference lists appear at the end of each chapter researchers and students working in the field of cosmic ray detection and astroparticle physics will appreciate finding this book in their library

Florida Keys National Marine Sanctuary Comprehensive Management Plan, Monroe County 1996

the introduction and rapid spread of two eurasian mussel species dreissena polymorpha zebra mussel and dreissena rostriformis bugensis quagga mussel in waters of north america has caused great concern among industrial and recreational water users these invasive species can create substantial problems for raw water users such as water treatme

Application and Theory of Petri Nets 1995 1995-06-07

this title is also available as an ebook

Modeling Manufacturing Systems 1999-03-29

explores class formation and elite struggles in post communist central europe

La Rivista del Nuovo cimento 1994

coral reef fishes is the successor of the ecology of fishes on coral reefs this new edition includes provocative reviews covering the major areas of reef fish ecology concerns about the future health of coral reefs and recognition that reefs and their fishes are economically important components of the coastal oceans of many tropical nations have led to enormous growth in research directed at reef fishes coral reef fishes is much more than a simple revision of the earlier volume it is a companion that supports and extends the earlier work the included syntheses provide readers with the current highlights in this exciting science an up to date review of key research areas in reef fish ecology with a bibliography including hundreds of citations most from the last decade authoritative up to date provocative chapters written to suggest future research priorities an important companion and successor to the ecology of fishes on coral reefs includes discussions of regulation of fish populations dispersal or site fidelity of larval reef fishes sensory and motor capabilities of reef fish larvae and complexities of management of reef species and communities
