throughout the nineteenth century academies functioned as the main venues for the teaching promotion and display of art contemporary scholars have for the most part denigrated academic art calling it formulaic unoriginal and repetitious the contributors to art and the academy in the nineteenth century challenge this entrenched notion and consider how academies worldwide have represented an important system of artistic preservation and transmission their essays eschew easy binaries that have reigned in academia for more than half a century and that simply oppose the avant garde to academicism

most histories seek to understand modern africa as a troubled outcome of nineteenth century european colonialism but that is only a small part of the story in this celebrated book beautifully translated from the french edition the history of africa in the nineteenth century unfolds from the perspective of africans themselves rather than the european powers it was above all a time of tremendous internal change on the african continent great jihads of muslim conquest and conversion swept over west africa in the interior warlords competed to control the internal slave trade in the east

the sultanate of zanzibar extended its reach via coastal and interior trade routes in the north egypt began to modernize while algeria was colonized in the south a series of forced migrations accelerated spurred by the progression of white settlement through much of the century african societies assimilated and adapted to the changes generated by these diverse forces in the end the west's technological advantage prevailed and most of africa fell under european control and lost its independence yet only by taking into account the rich complexity of this tumultuous past can we fully understand modern africa from the colonial period to independence and the difficulties of today
