from the moment he was elected into the papacy pope francis has captured the attention of the world with his humility charisma and reformist spirit this one of a kind illustrated biography of the first jesuit pope offers more than 250 photographs and 50 removable documents from francis s life written by vatican radio reporter marie duhamel this intimate portrait includes his parents emigration from italy his birth as jorge mario bergoglio in 1936 his love of soccer and opera as a child the pneumonia that nearly cost him his life as a young adult his calling to the priesthood and his first encounter with poverty as a missionary in chile that would change his life duhamel chronicles francis s rise from priest to bishop to cardinal to the papacy and how along the way he impressed many people and alienated some with his courage to stand up to authority and his dedication to helping the poor enclosed documents such as his baptism certificate photographs from his childhood pages from a school notebook handwritten notes as pope and even a support card for his beloved san lorenzo soccer club further illuminate his life and create a lasting keepsake of this pope of the people

A Treatise on Astronomical Spectroscopy 1894

this volume contains seven chapters based on papers presented at a symposium on insect viruses held in conjunction with the 67th annual meeting of the american society for microbiology in new york n y on 30 april 4 may 1967 the symposium was organized to bring together outstanding workers interested in various areas of insect virology and allow an opportunity for a discussion of problems approaches and methods that would lead to further progress in basic and applied research one of the principal reasons for holding the symposium at this time was the feeling that the divergent areas of research up to now studied separately by entomologists medical and public health workers geneticists and plant pathologists would be brought together crossing the artificial borders and finding new exciting and inspiring vistas insect viruses provide a rare opportunity to get acquainted with the work and methods of investigators in such related and yet distant fields following the symposium a decision was made to publish the papers in a single volume extending the contents to provide a complete and scholarly review of each subject since viruses affecting insects have received little attention until recent years it was felt that a fully documented presentation of diverse areas of insect virology merited publication the invited authors all recognized authorities in their respective fields prepared their contributions in such a way that each is a concise unit

Psychiatrische en Neurologische Bladen 1898

down comes a deluge of sonorous hail or prone descending rain wide rent the clouds pour a whole flood and yet its flame unquenched th unconquerable lightning struggles through ragged and fierce or in red whirling balls and fires the mountains with redoubled rage black from the stroke above the smould ring pine stands a sad shattered trunk and stretched below a lifeless group the blasted cattle lie james thompson the seasons 1727 have been investigating ball lightning for more than two decades i published a ball lightning report in nature in 1976 that received worldwide publicity and i consequently many people wrote to me with accounts of their own experiences within a very short time i had accumulated about 200 firsthand accounts and the file has continued to grow

steadily since then several things impressed me few of those who wrote to me had any detailed foreknowledge of ball lightning at the time of their observation nonetheless once reports of other phenomena such as st elmo s fire had been eliminated the remaining descriptions were remarkably consistent furthermore nearly all who contacted me were keen to have an explanation of what they had seen and seemed entirely sincere

when richard goldschmidt coined the term intersexuality in 1915 he intended it to apply to normally dioecious species which exhibit some kind of mixture between male and female characters however as knowledge of the bewildering variability present in the sexual organization of members of the animal kingdom has increased the original meaning of the word has changed today many authors define intersexuality as the presence of both male and female characteristics or of intermediate sexual characteristics in a single individual 2 this more extensive and widely accepted concept justifies the title of our book among all the anatomical and physiological features of living organisms the reproductive system has a unique importance for the perpetuation of the species conversely reproductive processes are of little or no account for the viability of the individual therefore within the framework of general biology reproduction has all too often been looked at solely from the point of view of

genetics lively discussions about genotypic versus phenotypic sex determination long dominated the scientific literature on sexuality in animals this one sided emphasis has tended to obscure many important facets of an organism's ability to reproduce recent developments in current biological research have brought the classic problem of sex differentiation into focus again and the rapid progress being made in comparative endocrinology has added a new dimension to the study of reproductive biology

linda martz explores the major developments in the theory and practice of poor relief in sixteenth and seventeenth century spain

Memoir 1934

conceived as a series of more or less autonomous essays the present book critically exposes the initial developments of continuum thermo mechanics in a post newtonian period extending from the creative works of the bernoullis to the first world war i e roughly during first the age of reason and next the birth of the modern world the emphasis is rightly placed on the original contributions from the continental scientists the bernoulli family euler d alembert lagrange cauchy piola duhamel neumann clebsch kirchhoff helmholtz saint venant boussinesq the cosserat brothers caratheodory in competition with their british peers green kelvin stokes maxwell rayleigh love it underlines the main breakthroughs as well as the secondary ones it highlights the role of scientists who left essential prints in this history of scientific ideas the book shows how the formidable developments that blossomed in the twentieth century and perused in a previous book of the author in the same springer series continuum mechanics through the twentieth century springer 2013 found rich compost in the constructive foundational achievements of the eighteenth and nineteenth centuries the pre wwi situation is well summarized by a thorough analysis of treatises appell hellinger published at that time english translations by the author of most critical texts in french or german are given to the benefit of the readers

Pierre Bayle 2012-12-06

selected constants relative to semi conductors presents the physical constants of semiconductors in table form the values of the electronic properties of semiconductors presented in the table are parameters intended for use in theoretical and phenomenological equations relative to the band theory for these materials in addition to data specific to band structure the table also includes mobilities of electrons and holes and their variation with temperature data of a general physical character are also presented since the researcher very often finds use for values of this type the following quantities are given when available symmetry group and crystal parameters refractive index dielectric constant effective ionic charge work function photoemission work function piezoresistance coefficient elastic coefficients phonon temperature debye temperature magnetic susceptibility coefficient of linear expansion fusion temperature sublimation temperature specific heat at constant pressure latent heat of fusion latent heat of sublimation thermal conductivity disorder factor and density

Soil Survey of McPherson County Kansas 1983

this profusely illustrated book gives an exhaustive account of the principal types of soils of our planet the progressive descent of weathering fronts model recognized and

used by eminent international scientists is the guiding principle of choice to link the observations and to give the reader a synthetic and coherent view of the differentiat

Pope Francis 2016-10-18

this is the first book to deal comprehensively with spain s tectonic and sedimentary history over the past sixty or so million years during tertiary times spain had suffered compressional collision between france and africa and its atlantic and mediterranean coasts had been further modified by extensional rifting

Insect Viruses 2013-04-09

the contributions in this book were presented orally or as posters at the international volcanological congress held in new zealand from 1 to 9 february 1986 the centenary year of the tarawera eruption of 10 june 1886 more than 500 people from 29 countries attend ed the congress most of these works formed part of symposium 4 volcanic hazards prediction and assess ment convened by j h latter r r dibble d a swanson and c g newhall the collection represents over half of the published abstracts of symposium 4 together with three papers given at the symposium which lacked abstracts and two which were part of symposium 1 on pyroclastic flow deposits the contribu tions cover a good proportion of the volcanically active parts of the world with italy japan the west indies and the usa especially well represented mount erebus vulcano and rabaul are individual volcanoes which have been treated in particular detail unfor tunately there are no chapters in the book dealing with africa the atlantic islands except iceland hawaii central america except mexico or south america in spite of the major disaster at nevado del ruiz volcano in 1985

Ball Lightning 1999-10-31

the first volume of ladies in the laboratory provided a systematic survey and comparison of the work of nineteenth century american and british women in scientific research companion volumes focused on women scientists from western europe and the former british colonial territories of south africa australia new zealand and canada in ladies in the laboratory iv mary r s creese expands her scope to include the contributions of nineteenth century women of imperial russia many of these women believed that science was the key to social progress and the great advances in scientific research work in which russians had leading roles made scientific training especially attractive featuring biographical sketches of more than 120 women this volume covers individuals whose scientific research encompassed medicine chemistry zoology botany and paleontology organized into chapters by field the entries provide details about the personal backgrounds as well as professional achievements of these remarkable women a well organized blend of individual life stories and quantitative information this volume is for everyone interested in nineteenth century science the stories of these women make for fascinating reading and serve as a valuable source for those who want to learn more about the history of women in science and medicine as well as nineteenth century russian history

Mejor Del Diseño 2013-11

this book was written to provide my son frank and grand daughter shoshauni an account of my journey from the time i was a happy little girl in africa through the hardship that came with the loss of my dad during the french indochina conflict the years of

growing up in the west of france under the very restrictive conditions existing in the catholic system of education i was attending and the financial difficulties the country was faced with following several years of war the second part of my autobiography reflects on my carrier in california following my divorce after 6 years of marriage i went back to school received a bachelor and master degrees and became very successful at my job with one achievement after the other including department manager of the year and twice recipient of the president discretionary award my life is an example of how to overcome adversities when asked if given a choice would i change anything the answer is no my professional life was a constant challenge and feeling of achievement my private life is also rewarding due to my travels and my work as a volunteer sharing my knowledge with the local students
