this book is the proceedings of the fourth international conference on quantitative logic and soft computing qlsc2016 held 14 17 october 2016 in zhejiang sci tech university hangzhou china it includes 61 papers of which 5 are plenary talks 3 abstracts and 2

full length talks qlsc2016 was the fourth in a series of conferences on quantitative logic and soft computing this conference was a major symposium for scientists engineers and practitioners to present their updated results ideas developments and applications in all areas of quantitative logic and soft computing the book aims to strengthen relations between industry research laboratories and universities in fields such as quantitative logic and soft computing worldwide as follows 1 quantitative logic and uncertainty logic 2 automata and quantification of software 3 fuzzy connectives and fuzzy reasoning 4 fuzzy logical algebras 5 artificial intelligence and soft computing 6 fuzzy sets theory and applications

Quantitative Logic and Soft Computing 2016

2017-10-05

the book covers a comprehensive overview of the theory methods applications and tools of cognition and recognition the book is a collection of best selected papers presented in the international conference on cognition and recognition 2016 iccr 2016 and helpful for scientists and researchers in the field of image processing pattern recognition and computer vision for advance studies nowadays researchers are working in interdisciplinary areas and the proceedings of iccr 2016 plays a major role to accumulate those significant works at one place the chapters included in the proceedings inculcates both theoretical as well as practical aspects of different areas like nature inspired algorithms fuzzy systems data mining signal processing image processing text processing wireless sensor networks network security and cellular automata

Proceedings of International

Conference on Cognition and Recognition

2016-06-11

this proceedings book presents recent research work and results in the area of communication and information technologies the chapters of this book contain the main well selected and reviewed contributions of scientists who met at the 12th international conference on computing and information technology ic2it held during 7th 8th july 2016 in khon kaen thailand the book is divided into three parts user centric data mining and text processing data mining algorithms and their applications and optimization of complex networks

Proceedings of the 2016 24th ACM SIGSOFT International Symposium on Foundations of Software Engineering

2016-06-13

the kes idt 2016 proceedings give an excellent insight into recent research both theoretical and applied in the field of intelligent decision making the range of topics explored is wide and covers

methods of grouping classification prediction decision support modelling and many more in such areas as finance linguistics medicine management and transportation this proceedings contain several sections devoted to specific topics such as specialized decision techniques for data mining transportation and project management pattern recognition for decision making systems new advances of soft computing in industrial and management engineering recent advances in fuzzy systems intelligent data analysis and applications reasoning based intelligent systems intelligent methods for eye movement data processing and analysis intelligent decision technologies for water resources management intelligent decision making for uncertain unstructured big data decision making theory for economics interdisciplinary approaches in business intelligence research and practice pattern recognition in audio and speech processing the keid conference is a well established international annual conference interdisciplinary in nature these two volumes of proceedings form an excellent account of the latest results and outcomes of recent research in this leading edge area

Intelligent Decision Technologies 2016

2016

the 11th international conference on cyber warfare and security iccws 2016 is being held at boston university boston usa on the 17 18th march 2016 the conference chair is dr tanya zlateva and the programme chair is professor virginia greiman both from boston university iccws is a recognised cyber security event on the international research conferences calendar and provides a valuable platform for individuals to present their research findings display their work in progress and discuss conceptual and empirical advances in the area of cyber warfare and cyber security it provides an important opportunity for researchers and managers to come together with peers to share their experiences of using the varied and expanding range of cyberwar and cyber security research available to them the keynote speakers for the

conference are daryl haegley from the department of defense dod who will address the topic control systems networks what s in your building and neal ziring from the national security agency who will be providing some insight to the issue of is security achievable a practical perspective iccws received 125 abstract submissions this year after the double blind peer review process there are 43 academic research papers 8 phd papers research papers 7 masters and 1 work in progress papers published in these conference proceedings these papers represent work from around the world including australia canada china czech republic district of columbia finland france israel japan lebanon netherlands pakistan russian federation saudi arabia south africa turkey united arab emirates uk usa

11th International Conference on Cyber Warfare and Security

2016-06-27

this book contains the refereed proceedings of the 19th international conference on business information systems bis 2016 held in leipzig germany in july 2016 the bis conference series follows trends in academia and business research thus the theme of the bis 2016 conference was smart business ecosystems this recognizes that no business is an island and competition is increasingly taking place between business networks and no longer between individual companies a variety of aspects is relevant for designing and understanding smart business ecosystems they reach from new business models value chains and processes to all aspects of analytical social and enterprise applications and platforms as well as cyber physical infrastructures the 33 full and 1 short papers were carefully reviewed and selected from 87 submissions they are grouped into sections on ecosystems big and smart data smart infrastructures process management business and enterprise modeling service science social media and applications

Business Information Systems

2018-06-18

this book of conference proceedings contains papers presented at the art and design international conference andic 2016 it examines the impact of cyberology also known as internet science on the world of art and design it looks at how the rapid growth of cyberology and the creation of various applications and devices have influenced human relationships the book discusses the impact of cyberology on the behaviour attitudes and perceptions of users including the way they work and communicate with a strong focus on how the cyberology world influences and changes the methods and works of artists this book features topics that are relevant to four key players artists intermediaries policy makers and the audience in a cultural system especially in the world of art and design it examines the development problems and issues of traditional cultural values identity and new trends in contemporary art most importantly the book attempts to discuss the past present and future of art and design whilst looking at some underlying issues that need to be addressed collectively

Proceedings of the Art and Design International Conference (AnDIC 2016)

2016-06-13

2016-07-04

this book constitutes the refereed proceedings of the 8th international conference on social computing and social media scsm 2016 held as part of the 18th international conference on human computer interaction hcii 2016 held in toronto on canada in july 2016 the total of 1287 papers and 186 posters presented at the hcii 2016 conferences were carefully reviewed and selected from 4354 submissions the papers thoroughly cover the entire field of human computer interaction addressing major advances in knowledge and effective use of computers in a variety of application areas the 43 contributions included in the scsm 2016 proceedings were organized in the following topical sections designing and developing social media users behaviour in social media social media policy politics and engagement social network analysis social media in learning and collaboration and enterprise social media

Social Computing and Social Media

2016-10-07

the 2016 international conference on computer science technology and application csta2016 were held in changsha china on march 18 20 2016 the main objective of the joint conference is to provide a platform for researchers academics and industrial professionals to present their research findings in the fields of computer science and technology the csta2016 received more than 150 submissions but only 67 articles were selected to be included in this proceedings which are organized into 6 chapters covering image and signal processing computer network algorithm and simulation data mining and cloud computing computer systems and application mathematics and management contents image and signal processing computer network and information security algorithm and simulation data mining and cloud computing computer system and application mathematics and management readership researchers and professionals in computer networks signal processing

Computer Science, Technology and Application

2016

this two volume set Incs 9658 and 9659 constitutes the thoroughly refereed proceedings of the 17th international conference on age information management waim 2016 held in nanchang china in june 2016 the 80 full research papers presented together with 8 demonstrations were carefully reviewed and selected from 266 submissions the focus of the conference is on following topics data mining spatial and temporal databases recommender systems graph data management information retrieval privacy and trust query processing and optimization social media big data analytics and distributed and cloud computing

ICPRAM 2016

2016-05-27

this book presents the proceedings of the 4th international conference on integrated petroleum engineering and geosciences 2016 icipeg 2016 held under the banner of world engineering science technology congress estcon 2016 at kuala lumpur convention centre from august 15 to 17 2016 it presents peer reviewed research articles on exploration while also exploring a new area shale research in this time of low oil prices it highlights findings to maintain the exchange of knowledge between researchers serving as a vital bridge builder between engineers geoscientists academics and industry

IKE 2016

2017-01-20

these proceedings comprise a selection of invited and contributed papers presented at the 15th international conference on x ray lasers icxrl 2016 held at the nara kasugano international forum japan from may 22 to 27 2016 this conference was part of an ongoing series dedicated to recent developments in the science and technology of x ray lasers and other coherent x ray sources with additional focus on supporting technologies instrumentation and applications the book showcases recent advances in the generation of intense coherent x rays the development of practical devices and their applications across a wide variety of fields it also discusses emerging topics such as plasma based x ray lasers 4th generation accelerator based sources and higher harmonic generations as well as other x ray generation schemes

Web-Age Information Management

2018-02-23

this volume presents the proceedings of the 12th international conference on the design of cooperative systems coop 2016 the conference is a venue for multidisciplinary research contributing to the design assessment and analysis of cooperative systems and their integration in organizations public venues and everyday life coop emerged from the european tradition of computer supported cooperative work cscw and cognitive ergonomics a collection of 22 papers and 4 workshop overviews are presented reflecting the variety of research activities in the field of the design of cooperative systems with a special emphasis on making together this collection offers a broad vision of collective working practices and cooperative design embracing the idea that design requires a deep understanding of collective activities involving both artefacts and social practices within a context the result is a rich and articulated debate that widens the design space towards the exploration of a variety of forms of participation and engagement in collaborative system design experienced researchers academics designers and practitioners who are interested in collaborative design theory and methods would be interested in the state of the art research and case studies this collection provides

ICIPEG 2016

2016-09-07

proceedings includes materials of the international scientific conference scientific research 2016 held in czech republic karlovy vary russia moscow 29 30 september 2016 the main objective of the conference the development community of scholars and practitioners in various fields of science conference was attended by scientists and experts from kazakhstan russia

2016

this book constitutes the refereed proceedings of the 22nd international conference on information and software technologies icist 2016 held in druskininkai lithuania in october 2016 the 61 papers presented were carefully reviewed and selected from 158 submissions the papers are organized in topical sections on information systems business intelligence for information and software systems software engineering information technology applications

Superalloys 2016

2016-09-29

this volume originates from the proceedings of a multidisciplinary conference techno societal 2016 in maharashtra india that brings together faculty members of various engineering colleges to solve indian regional relevant problems under the guidance of eminent researchers from various reputed organizations the focus is on technologies that help develop and improve society in particular on issues such as the betterment of differently abled people environment impact livelihood rural employment agriculture healthcare energy transport sanitation water education this conference aims to help innovators to share their best practices or products developed to solve specific local problems which in turn may help the other researchers to take inspiration to solve problems in their region on the other hand technologies proposed by expert researchers may find applications in different regions this back and forth process for local global interaction will help in solving local problems by global approach and help in solving global problems by improving local conditions

ESCS 2016

2016

the two volume set Incs 9981 and 9982 constitutes the refereed proceedings of the 15th international semantic conference iswc 2016 which was held in kobe japan in october 2016 the 75 full papers presented in these proceedings were carefully reviewed and selected from 326 submissions the international semantic conference is the premier forum for semantic research where cutting edge scientific results and technological innovations are presented where problems and solutions are discussed and where the future of this vision is being developed it brings together specialists in fields such as artificial intelligence databases social networks distributed computing engineering information systems human computer interaction natural language processing and the social sciences the research track solicited novel and significant research contributions addressing theoretical analytical empirical and practical aspects of the semantic the applications track

solicited submissions exploring the benefits and challenges of applying semantic technologies in concrete practical applications in contexts ranging from industry to government and science the newly introduced resources track sought submissions providing a concise and clear description of a resource and its expected usage traditional resources include ontologies vocabularies datasets benchmarks and replication studies services and software besides more established types of resources the track solicited submissions of new types of resources such as ontology design patterns crowdsourcing task designs workflows methodologies and protocols and measures

ECEL 2016 - Proceedings of the 15th European Conference on e- Learning

2017-06-16

this is an open access book the covid 19 pandemic has become a global issue have a great impact in almost all fields including in the economic social political cultural and education and has created social pressures community economy almost all over the country having trouble however this has consequences for declining economic growth has had an impact on social life including in countries in asean and especially in indonesia we are only at the beginning of the most challenging part which is how we will emerge out of this situation and return to a new normal these challenges highlight the importance of science technology and innovation as the decisive factors in any scenario of emergence from the crisis and economic recovery to eliminate covid 19 and find solutions to its effects are endeavored through research in various fields of sciences hopefully the cure can be found and the new situation can be adapted

2023-05-19

this book presents the proceedings of the 10th international parallel tools workshop held october 4 5 2016 in stuttgart germany a forum to discuss the latest advances in parallel tools high performance computing plays an increasingly important role for numerical simulation and modelling in academic and industrial research at the same time using large scale parallel systems efficiently is becoming more difficult a number of tools addressing parallel program development and analysis have emerged from the high performance computing community over the last decade and what may have started as collection of small helper script has now matured to production grade frameworks powerful user interfaces and an extensive body of documentation allow easy usage by non specialists

Techno-Societal 2016

2016-03-13

this book covers recent developments in the interdisciplinary fields of actuarial science quantitative finance risk and asset management the authors are leading experts from academia and practice who participated in innovations in insurance risk and asset management an international conference held at the technical university of munich in 2017 the topics covered include the mathematics of extreme risks systemic risk model uncertainty interest rate and hybrid models alternative investments dynamic investment strategies quantitative risk management asset liability

management liability driven investments and behavioral finance
this timely selection of topics is highly relevant for the financial
industry and addresses current issues both from an academic as
well as from a practitioner s point of view

The Semantic Web - ISWC 2016

2017-05-06

this book constitutes the refereed proceedings of the 5th
international conference on computational social networks csonet
2016 held in ho chi minh city vietnam in august 2016 the 30
revised full papers presented were carefully reviewed and
selected from 79 submissions the papers cover topics on common
principles algorithms and tools that govern social network
structures topologies functionalities social interactions security
and privacy network behaviors information diffusions and
influence social recommendation systems which are applicable to
all types of social networks and social media

Proceedings of the International Conference on Intellectuals' Global Responsibility (ICIGR 2022)

2018-09-14

this book constitutes the refereed proceedings of the 16th
industrial conference on advances in data mining icdm 2016 held
in new york ny usa in july 2016 the 33 revised full papers
presented were carefully reviewed and selected from 100
submissions the topics range from theoretical aspects of data
mining to applications of data mining such as in multimedia data
in marketing in medicine and in process control industry and
society
