the bestselling lpn lvn geriatric nursing textbook basic geriatric nursing 5th edition covers age appropriate nursing interventions in a variety of health care settings it includes the theories and concepts of aging covers expected physiologic and psychosocial changes and highlights delegation coordinated care end of life care patient teaching quality of life safety and home care this edition is updated with the latest issues and trends in geriatric nursing including changes to the health care system and demographics part of the popular lpn threads series gloria hoffman wold's text provides a clear and compassionate introduction to geriatric care complete coverage of key topics includes baby boomers and the impact of their aging on the health care system therapeutic communication cultural considerations spiritual influences evidence based practice in geriatric nursing and elder abuse restraints and ethical and legal issues in end of life care unique delegation leadership and management content is integrated throughout nursing process sections provide a framework for the discussion of the nursing care of the elderly patient as related to specific disorders unique a free study guide in the back of the book reinforces understanding with scenario based clinical activities and practice questions unique nursing

interventions are numbered and grouped according to health care setting e.g. acute care, extended care, home care. In a patient-centered approach, emphasizing the unique needs of the older adult, unique nursing care plans with critical thinking questions help in understanding how a care plan is developed, how to evaluate care of a patient, and how to apply your knowledge to clinical scenarios. Unique critical thinking boxes help you to assimilate and synthesize information. Clinical situation boxes present patient scenarios with lessons for appropriate nursing care. Patient sensitivity coordinated care boxes address such topics as restraints, elder abuse, and end-of-life care as related to responsibilities of nursing assistants and other health care workers who are supervised by LPN/LVNs. Unique complementary and alternative therapies boxes address specific therapies commonly used by the geriatric population for health promotion and pain relief. Cultural considerations boxes encourage culturally sensitive care of older adults. Unique patient teaching boxes highlight health promotion, disease prevention, and age-specific interventions. Unique LPN threads make learning easier, featuring an appropriate reading level, key terms with phonetic pronunciations, and text page references. Chapter objectives, special features boxes, and full-color art, photographs, and design.

## **An Introduction to Medical Terminology for Health Care 2016-08-04**

thoroughly revised and updated, the new edition of this definitive text explains how to care for neonates using the very latest methods of diagnosis and treatment. Rennie Robertson's textbook of neonatology, 5th edition, represents the state of the art on neonatal care, providing not only detailed pathophysiology and clinical chapters on every condition of the neonate but also comprehensive chapters on the psychosocial aspects of neonatology, such as handling perinatal death and ethical and legal aspects of neonatal care. Contributions from fetal medicine experts and obstetricians provide valuable peripheral information essential to the practice of neonatology. Rennie Robertson's textbook of neonatology, 5th edition, is the gold standard for neonatal care and will be an invaluable tool for everyone involved in the care of the neonate. It serves as an authoritative reference for practitioners, a valuable preparation tool for neonatal certification exams, and a useful resource for the entire neonatal care team. Improved illustration program throughout: color figures, line drawings will facilitate quick review and enhance comprehension. Major changes have been made to the chapters on genomics, screening, and a range of neurologic, respiratory, and cardiovascular disorders, including resuscitation and ventilation, chronic lung disease, periventricular leukomalacia. This book continues to provide the user with the latest clinically relevant applications in diagnosis and management to enable user to derive appropriate differential diagnosis and management plans. Latest advances in imaging techniques included: CT, cranial ultrasonography, MRI. There has been tremendous growth in the pace of development and refinement of imaging techniques. This book will ensure that the user is fully aware of their clinical applications. Incorporates the latest guidelines on clinical governance as recommended by RCPCH. Helps ensure implementation of appropriate management plans. Selected key references now included at end of each chapter. Experts carefully select the most important articles for further reading to facilitate further understanding research.
