in spite of their importance and potential societal impact there is currently no comprehensive source of information about vehicular ad hoc networks vanets cohesively integrating the state of the art in this emerging field vehicular networks from theory to practice elucidates many issues involved in vehicular networking including traffic eng

No Code Required 2010-05-21

no code required presents the various design system architectures research methodologies and evaluation strategies that are used by end users programming on the it also presents the tools that will allow users to participate in the creation of their own comprised of seven parts the book provides basic information about the field of end user programming part 1 points out that the firefox browser is one of the differentiating factors considered for end user programming on the part 2 discusses the automation and customization of the part 3 covers the different approaches to proposing a specialized platform for creating a new browser part 4 discusses three systems that focus on the customized tools that will be used by the end users in exploring large amounts of data on the part 5 explains the role of natural language in the end user programming systems part 6 provides an overview of the assumptions on the accessibility of the site owners of the content lastly part 7 offers the idea of the active end user an individual who is seeking new technologies the first book since 2 0 that covers the latest research development and systems

emerging from hci research labs on end user programming tools featuring contributions from the creators of adobe s zoetrope and intel s mash maker discussing test results implementation feedback and ways forward in this booming area

F-16

microprocessors increasingly control and monitor our most critical systems including automobiles airliners medical systems transportation grids and defense systems the relentless march of semiconductor process technology has given engineers exponentially increasing transistor budgets at constant recurring cost this has encouraged increased functional integration onto a single die as well as increased architectural sophistication of the functional units themselves additionally design cycle times are decreasing thus putting increased schedule pressure on engineers not surprisingly this environment has led to a number of uncaught design flaws traditional simulation based design verification has not kept up with the scale or pace of modern microprocessor system design formal verification methods offer the promise of improved bug finding capability as well as the ability to establish functional correctness of a detailed design relative to a high level specification however widespread use of formal methods has had to await breakthroughs in automated reasoning integration with engineering design languages and processes scalability and usability this book presents several breakthrough design and verification techniques that allow these powerful formal methods to be employed in the real world of high assurance microprocessor system design

Design and Verification of Microprocessor Systems for High-Assurance Applications 2010-03-02

efficiency and efficacy are crucial to the success of national and international business operations today with this in mind businesses are continuously searching for the information and communication technologies that will improve job productivity and performance and enhance communications collaboration cooperation and connection between employees employers and stakeholders the evolution of the internet in the business sector 1 0 to 3 0 takes a historical look at the policy implementation management and governance of productivity enhancing technologies this work shares best practices with public and private universities is developers and researchers education managers and business and web professionals interested in implementing the latest technologies to improve organizational productivity and communication

The Evolution of the Internet in the Business Sector 2014-11-30

usage mining is defined as the application of data mining technologies to online usage patterns as a way to better understand and serve the needs of web based applications because the internet has become a central component in information sharing and commerce having the ability to analyze user behavior on the web has become a critical component to a variety of industries usage mining techniques and

applications across industries addresses the systems and methodologies that enable organizations to predict web user behavior as a way to support website design and personalization of web based services and commerce featuring perspectives from a variety of sectors this publication is designed for use by it specialists business professionals researchers and graduate level students interested in learning more about the latest concepts related to web based information retrieval and mining

<u>Web Usage Mining Techniques and Applications Across Industries 2016-08-12</u>

in the digital era the internet has evolved into a ubiquitous aspect of modern society with the prominence of the dark understanding the components of the internet and its available content has become increasingly imperative the dark breakthroughs in research and practice is an innovative reference source for the latest scholarly material on the capabilities trends and developments surrounding the secrecy of the dark highlighting a broad range of perspectives on topics such as cyber crime online behavior and hacking this book is an ideal resource for researchers academics graduate students and professionals interested in the dark

The Dark Web: Breakthroughs in Research and Practice

2017-07-12

the origin of the intelligent virtual agents conference dates from a successful workshop on intelligent virtual environments held in brighton at the 13th european conference on artificial intelligence ecai 98 this workshop was followed by a second one held in salford in manchester in 1999 subsequent events took place in madrid spain in 2001 and irsee germany in 2003 and attracted participants from both sides of the atlantic as well as asia th this volume contains the proceedings of the 5 international working conference on intelligent virtual agents iva 2005 held on kos island greece september 12 14 2005 which highlighted once again the importance and vigor of the research field a half day workshop under the title socially competent iva s we are not alone in this virtual world also took place as part of this event iva 2005 received 69 submissions from europe north and south america africa and asia the papers published here are the 26 full papers and 14 short papers presented at the conference as well as one page descriptions of the 15 posters and the descriptions of the featured invited talks by prof justine cassell of northwestern university and prof kerstin dautenhahn of the university of hertfordshire we would like to thank a number of people that have contributed to the success of this conference first of all we thank the authors for their high quality work and their willingness to share their ideas

Intelligent Virtual Agents 2005-09-22

this open access book constitutes the proceedings of the 27th european symposium on programming esop 2018 which took place in thessaloniki greece in april 2018 held as part of the european joint conferences on theory and practice of software etaps 2018 the 36 papers presented in this volume were carefully reviewed and selected from 114 submissions the papers are organized in topical sections named language design probabilistic programming types and effects concurrency security program verification program analysis and automated verification session types and concurrency concurrency and distribution and compiler verification

Programming Languages and Systems 2018-04-14

this book constitutes the refereed proceedings of the 19th international conference on text speech and dialogue tsd 2016 held in brno czechrepublic in september 2016 the 62 papers presented together with 3 abstracts of invited talks were carefully reviewed and selected from 127 submissions they focus on topics such as corpora and language resources speech recognition tagging classification and parsing of text and speech speech and spoken language generation semantic processing of text and speech integrating applications of text and speech processing automatic dialogue systems as well as multimodal techniques and modelling

Text, Speech, and Dialogue 2016-09-02

this book constitutes the proceedings of the nine workshops that were organized in conjunction with the business information systems conference bis 2009 taking place in poznan poland on april 27 29 2009 the 34 papers presented were carefully reviewed and selected from 72 submissions in addition the volume contains the bis 2009 keynote speech and two invited speeches presented at the workshops lit and econom enterprise x 0 the topics covered are deepadw applications and economics of knowledge based technologies aktb econom service oriented architectures sds soa legal it lit social and 2 0 saw enterprise x 0 e learning eelt and enterprise systems in higher education eshe

Business Information Systems Workshops 2009-08-19

liu has written a comprehensive text on mining which consists of two parts the first part covers the data mining and machine learning foundations where all the essential concepts and algorithms of data mining and machine learning are presented the second part covers the key topics of mining where crawling search social network analysis structured data extraction information integration opinion mining and sentiment analysis usage mining query log mining computational advertising and recommender systems are all treated both in breadth and in depth his book thus brings all the related concepts and algorithms together to form an authoritative and coherent text the book offers a rich blend of theory and practice it is suitable for students researchers and practitioners interested in mining and data mining both as a

learning text and as a reference book professors can readily use it for classes on data mining mining and text mining additional teaching materials such as lecture slides datasets and implemented algorithms are available online

Web Data Mining 2011-06-25

presenting a comprehensive overview of the design automation algorithms tools and methodologies used to design integrated circuits the electronic design automation for integrated circuits handbook is available in two volumes the first volume eda for ic system design verification and testing thoroughly examines system level design microarchitectural design logical verification and testing chapters contributed by leading experts authoritatively discuss processor modeling and design tools using performance metrics to select microprocessor cores for ic designs design and verification languages digital simulation hardware acceleration and emulation and much more save on the complete set

Who's who in Health and Medicine in Myanmar 2005

verification of real time requirements in systems on chip becomes more complex as more applications are integrated predictable and composable systems can manage the increasing complexity using formal verification and simulation this book explains the concepts of predictability and composability and shows how to apply them to the design and analysis of a memory controller which is a key component in any real time system

EDA for IC System Design, Verification, and Testing 2018-10-03

many difficult scientific discovery tasks can only be solved in interactive ways by combining intelligent computing techniques with intuitive and adaptive user interfaces it is inevitable to use human intelligence in scientific discovery systems human eyes can capture complex patterns and relationships along with detecting the exceptional cases in a data set the human brain can easily manipulate perceptions to make decisions ambient intelligence is about this kind of ubiquitous and autonomous human interaction with information scientific discovery is a process of creative perception and communication dealing with questions like how do we significantly reduce information while maintaining meaning or how do we extract patterns from massive data and growing data resources originating from the sigchi workshop on ambient intelligence for scientific discovery this state of the art survey is organized in three parts new paradigms in scientific discovery ambient cognition and ambient intelligence systems many chapters share common features such as interaction vision language and biomedicine

<u>Cumulative List of Organizations Described in Section</u> 170 (c) of the Internal Revenue Code of 1954 2004

this book constitutes the refereed proceedings of the 16th scandinavian conference on image analysis scia 2011 held in ystad sweden in may 2011 the 74 revised full

papers presented were carefully reviewed and selected from 140 submissions the papers are organized in topical sections on multiple view geometry segmentation image analysis categorization and classification structure from motion and slam medical and biomedical applications 3d shape medical imaging

<u>Memory Controllers for Real-Time Embedded Systems</u> 2011-09-15

this volume constitutes the thoroughly refereed post conference proceedings of the 11th international conference on security and privacy in communication networks securecomm 2015 held in dallas tx usa in october 2015 the 29 regular and 10 poster papers presented were carefully reviewed and selected from 107 submissions it also presents 9 papers accepted of the workshop on applications and techniques in cyber security atcs 2015 the papers are grouped in the following topics mobile system and software security cloud security privacy and side channels and network security crypto protocol and model

<u>Ambient Intelligence for Scientific Discovery</u> 2005-02-09

paams the international conference on practical applications of agents and multi agent systems is an evolution of the international workshop on practical applications of agents and multi agent systems paams is an international yearly tribune to present to discuss and to disseminate the latest developments and the most important outcomes related to real world applications it provides a unique opportunity to bring multi disciplinary experts academics and practitioners together to exchange their experience in the development of agents and multi agent systems this volume presents the papers that have been accepted for the 2012 in the workshops workshop on agents for ambient assisted living workshop on agent based solutions for manufacturing and supply chain and workshop on agents and multi agent systems for enterprise integration this volume presents the papers that have been accepted for the 2012 in the workshops workshop on agents for ambient assisted living workshop on agent based solutions for manufacturing and supply chain and workshop on agents and multi agent systems for enterprise integration

Image Analysis 2011-05-16

this book is open access under a cc by licence the lncs 10805 and 10806 proceedings set constitutes the proceedings of the 24th international conference on tools and algorithms for the construction and analysis of systems tacas 2018 which took place in thessaloniki greece in april 2018 held as part of the european joint conference on theory and practice of software etaps 2018 the total of 43 full and 11 short papers presented in these volumes was carefully reviewed and selected from 154submissions the papers are organized in topical sections as follows part i theorem proving sat and smt i deductive verification software verification and optimization model checking and machine learning part ii concurrent and distributed systems sat and smt ii security and reactive systems static and dynamic program analysis hybrid and stochastic systems temporal logic and mu calculus 7th

Security and Privacy in Communication Networks 2016-01-23

this book contains a selection of refereed and revised papers of intelligent techniques and applications track and the special track on intelligent image processing and artificial vision track originally presented at the international symposium on intelligent systems technologies and applications ista august 10 13 2015 kochi india

Trends in Practical Applications of Agents and Multiagent Systems 2012-03-05

this proceedings book includes the results from the international conference on deep learning artificial intelligence and robotics held in malaviya national institute of technology jawahar lal nehru marg malaviya nagar jaipur rajasthan 302017 the scope of this conference includes all subareas of ai with broad coverage of traditional topics like robotics statistical learning and deep learning techniques however the organizing committee expressly encouraged work on the applications of dl and ai in the important fields of computer electronics electrical mechanical chemical textile engineering health care and agriculture business and social media and other relevant domains the conference welcomed papers on the following but not limited to research

topics deep learning applications of deep learning in various engineering streams neural information processing systems training schemes gpu computation and paradigms human computer interaction genetic algorithm reinforcement learning natural language processing social computing user customization embedded computation automotive design and bioinformatics artificial intelligence automatic control natural language processing data mining and machine learning tools fuzzy logic heuristic optimization techniques membrane based separation wastewater treatment process control etc and soft computing robotics automation and advanced control based applications in engineering neural networks on low powered devices human robot interaction and communication cognitive developmental and evolutionary robotics fault diagnosis virtual reality space and underwater robotics simulation and modelling bio inspired robotics cable robots cognitive robotics collaborative robotics collective and social robots and humanoid robots it was a collaborative platform for academic experts researchers and corporate professionals for interacting their research in various domain of engineering like robotics data acquisition human computer interaction genetic algorithm sentiment analysis as well as usage of ai and advanced computation in various industrial challenges based applications such as user customization augmented reality voice assistants reactor design product formulation synthesis embedded system design membrane based separation for protecting environment along with wastewater treatment rheological properties estimation for newtonian and non newtonian fluids used in micro processing industries and fault detection

Tools and Algorithms for the Construction and Analysis of Systems 2018-04-11

novel processing and searching tools for the management of new multimedia documents have developed multimedia information retrieval mir is an organic system made up of text retrieval tr visual retrieval vr video retrieval vdr and audio retrieval ar systems so that each type of digital document may be analysed and searched by the elements of language appropriate to its nature search criteria must be extended such an approach is known as the content based information retrieval cbir and is the core of mir this novel content based concept of information handling needs to be integrated with more traditional semantics multimedia information retrieval focuses on the tools of processing and searching applicable to the content based management of new multimedia documents translated from italian by giles smith the book is divided into two parts part one discusses mir and related theories and puts forward new methodologies part two reviews various experimental and operating mir systems and presents technical and practical conclusions gives a complete organic picture of mir and cbir proposes a novel conceptualisation around the ideas of information retrieval ir and digital document management in the context of library and information science lis relevant for both library and information science and information technology specialists

Intelligent Systems Technologies and Applications 2015-08-28

this book presents a collection of research papers that address the challenge of how to develop software in a principled way that in particular enables reasoning the individual papers approach this challenge from various perspectives including programming languages program verification and the systematic variation of software topics covered include programming abstractions for concurrent and distributed software specification and verification techniques for imperative programs and development techniques for software product lines with this book the editors and authors wish to acknowledge on the occasion of his 60th birthday the work of arnd poetzsch heffter who has made major contributions to software technology throughout his career it features articles on arnd s broad research interests including among others the implementation of programming languages formal semantics specification and verification of object oriented and concurrent programs programming language design distributed systems software modeling and software product lines all contributing authors are leading experts in programming languages and software engineering who have collaborated with arnd in the course of his career overall the book offers a collection of high quality articles presenting original research results major case studies and inspiring visions some of the work included here was presented at a symposium in honor of arnd poetzsch heffter held in kaiserslautern germany in november 2018

<u>Conference Proceedings of ICDLAIR2019</u> 2021-02-08

this open access two volume set lncs 12759 and 12760 constitutes the refereed proceedings of the 33rd international conference on computer aided verification cav 2021 held virtually in july 2021 the 63 full papers presented together with 16 tool papers and 5 invited papers were carefully reviewed and selected from 290 submissions the papers were organized in the following topical sections part i invited papers ai verification concurrency and blockchain hybrid and cyber physical systems security and synthesis part ii complexity and termination decision procedures and solvers hardware and model checking logical foundations and software verification

Multimedia Information Retrieval 2013-07-31

this book constitutes the refereed proceedings of the 24th international conference on logic programming iclp 2008 held in udine italy in december 2008 the 35 revised full papers together with 2 invited talks 2 invited tutorials 11 papers of the co located first workshop on answer set programming and other computing paradigms aspocp 2008 as well as 26 poster presentations and the abstracts of 11 doctoral consortium articles were carefully reviewed and selected from 177 initial submissions the papers cover all issues of current research in logic programming they are organized in topical sections on applications algorithms systems and implementations semantics and foundations analysis and transformations chrs and extensions implementations and systems answer set programming and extensions as well

as constraints and optimizations

Principled Software Development 2018-10-23

this book contains a selection of the best papers from webist 2008 the fourth international conference on information systems and technologies held in funchal madeira in 2008 organized by the institute for systems and technologies of information control and communication insticc and co sponsored by the wo flow management coalition wfmc the purpose of the webist series of conferences is to bring together researchers engineers and practitioners interested in the technological advances and business plications of web based information systems the series focuses on four main topic areas covering different aspects of web information systems including internet te nology web interfaces and applications society e business and e government and e learning webist 2008 received 238 paper submissions from more than 40 countries on all continents a double blind review process was enforced with the help of more than 200 experts from the international program committee each of them specialized in one of the main conference topic areas after reviewing 32 papers were selected to be published and presented as full papers and 64 additional papers describing work progress as short papers for oral presentation only furthermore 58 papers were p sented as posters the full paper acceptance ratio was 13 and the total oral paper acceptance ratio was 40 therefore we hope that you find the papers included in this book interesting and we trust they may represent a helpful reference in the future for all those who need to address any of the research areas mentioned above

this book introduces a research applications in intelligence it presents a number of innovative proposals which will contribute to the development of web science and technology for the long term future rendering this work a valuable piece of knowledge

Computer Aided Verification 2021-07-16

speed in acquiring the knowledge and skills to perform tasks is crucial yet it still ordinarily takes many years to achieve high proficiency in countless jobs and professions in government business industry and throughout the private sector there would be great advantages if regimens of training could be established that could accelerate the achievement of high levels of proficiency this book discusses the construct of accelerated learning it includes a review of the research literature on learning acquisition and retention focus on establishing what works and why this includes several demonstrations of accelerated learning with specific ideas plans and roadmaps for doing so the impetus for the book was a tasking from the defense science and technology advisory group which is the top level science and technology policy making panel in the department of defense however the book uses both military and non military exemplar case studies it is likely that methods for acceleration will leverage technologies and capabilities including virtual training cross training training across strategic and tactical levels and training for resilience and adaptivity this volume provides a wealth of information and guidance for those

interested in the concept or phenomenon of accelerating learning in education training psychology academia in general government military or industry

Logic Programming 2008-12-15

this unique new book uses a series of focussed questions comprehensive literature evaluations and structured grades of recommendation to provide evidence for the treatment of hematological disorders both malignant and benign with contributions from leading international experts who have a real understanding of evidence based medicine the book provides comprehensive reviews accompanied by clinical commentaries and recommendations on the best treatment regimes to adopt for individual patients the book is split into two sections the first examines the methodology underlying evidence based practice and the second concentrates on the clinical practice of hematology providing current best evidence to guide practice in a series of well defined clinical situations this clinical reference is an invaluable source of evidence based information distilled into guidance for clinical practice which will be welcomed by practitioners trainees and associated health professionals

Web Information Systems and Technologies 2009-04-30

principles and practice of travel medicine principles and practice of travel medicine this second edition of principles and practice of travel medicine has been extensively updated to provide a comprehensive description of travel medicine and is

an invaluable reference resource to support the clinical practice of travel medicine this new edition covers the many recent advances in the field including the development of new and combined vaccines malaria prophylaxis emerging new infections new hazards resulting from travel to long haul destinations health tourism and population movements the chapter on vaccine preventable diseases includes new developments in licensed vaccines as well as continent based recommendations for their administration there are chapters on the travel health management of high risk travellers including the diabetic traveller the immunocompromised those with cardiovascular renal neurological gastrointestinal malignant and other disorders psychological and psychiatric illnesses pregnant women children and the elderly with increasing numbers of ever more adventurous travellers there is discussion of travel medicine within extreme environments whilst the chapter on space tourism may well be considered the future in travel medicine principles and practice of travel medicine is an invaluable resource for health care professionals providing advice and clinical care to the traveller titles of related interest atlas of human infectious diseases heiman f l wertheim peter horby john p woodall 9781405184403 2012 infectious diseases a geographic quide eskild petersen lin h chen patricia schlagenhauf 9780470655290 2011 tropical diseases in travelers eli schwartz 9781405184410 2009 for more information on all our resources in infectious diseases please visit wiley com go infectiousdiseases

Advanced Techniques in Web Intelligence -1 2010-09-07

united arab emirates yearbooks

Accelerated Expertise 2013-08-15

the textbook at hand aims to provide an introduction to the use of automated methods for gathering strategic competitive intelligence hereby the text does not describe a singleton research discipline in its own right such as machine learning or mining it rather contemplates an application scenario namely the gathering of knowledge that appears of paramount importance to organizations e g companies and corporations to this end the book first summarizes the range of research disciplines that contribute to addressing the issue extracting from each those grains that are of utmost relevance to the depicted application scope moreover the book presents systems that put these techniques to practical use e g reputation monitoring platforms and takes an inductive approach to define the gestalt of mining for competitive strategic intelligence by selecting major use cases that are laid out and explained in detail these pieces form the first part of the book each of those use cases is backed by a number of research papers some of which are contained in its largely original version in the second part of the monograph

Evidence-Based Hematology 2009-01-30

the international symposium on distributed computing and artificial intel gence dcai 10 is an annual forum that brings together past experience current work and promising future trends associated with distributed computing artificial intelligence and their application to provide efficient solutions to real problems this symposium is organized by the biomedicine intelligent system and edu tional

technology research group bisite usal es of the university of lamanca the present edition has been held at the polytechnic university of lencia from 7 to 10 september 2010 within the congreso español de informática cedi 2010 technology transfer in this field is still a challenge with a large gap between academic research and industrial products this edition of dcai aims at contributing to reduce this gap with a stimulating and productive forum where these communities can work towards future cooperation with social and econo cal benefits this conference is the forum in which to present application of in vative techniques to complex problems artificial intelligence is changing our ciety its application in distributed environments such as internet electronic commerce environment monitoring mobile communications wireless devices distributed computing to cite some is continuously increasing becoming an e ment of high added value with social and economic potential both industry life quality and research these technologies are changing constantly as a result of the large research and technical effort being undertaken in universities companies

Principles and Practice of Travel Medicine 2013-02-25

this book constitutes the workshop proceedings of the 16th international conference on database systems for advanced applications dasfaa 2011 held in hong kong china in april 2011 the volume contains six workshops each focusing on specific research issues that contribute to the main themes of the dasfaa conference the first international workshop on graph structured data bases gdb 2011 the first international workshop on spatial information modeling management and mining sim3

2011 the international workshop on flash based database systems flashdb 2011 the second international workshop on social networks and social media mining on the snsmw 2011 the first international workshop on data management for emerging network infrastructures damen 2011 and the fourth international workshop on data quality in integration systems dqis 2011

United Arab Emirates Yearboook 2006 2006

this volume contains papers from the ifac workshop on real time programming the aim of the workshop was to bring together academic practitioners and industrialists involved in this important and expanding area of interest in order to exchange experiences on recent advances in this field contents include dependability and safety for real time systems real time programming techniques software requirement engineering control systems design software design software engineering and complex engineeringsystems

Mining for Strategic Competitive Intelligence 2012-03-06

the biometric computing recognition registration presents introduction of biometrics along with detailed analysis for identification and recognition methods this book forms the required platform for understanding biometric computing and its implementation for securing target system it also provides the comprehensive analysis on algorithms architectures and interdisciplinary connection of biometric computing along with detailed case studies for newborns and resolution spaces the

strength of this book is its unique approach starting with how biometric computing works to research paradigms and gradually moves towards its advancement this book is divided into three parts that comprises basic fundamentals and definitions algorithms and methodologies and futuristic research and case studies features a clear view to the fundamentals of biometric computing identification and recognition approach for different human characteristics different methodologies and algorithms for human identification using biometrics traits such as face iris fingerprint palm print voiceprint etc interdisciplinary connection of biometric computing with the fields like deep neural network artificial intelligence internet of biometric things low resolution face recognition etc this book is an edited volume by prominent invited researchers and practitioners around the globe in the field of biometrics describes the fundamental and recent advancement in biometric recognition and registration this book is a perfect research handbook for young practitioners who are intending to carry out their research in the field of biometric computing and will be used by industry professionals graduate and researcher students in the field of computer science and engineering
