

traction avant 1934 the tub 1939 citroën s first front wheel drive utility van that was succeeded by the h and hy vans 1947 the deux chevaux 1948 and last but not least the ds 1955 from 1923 to 1931 lefebvre also designed several highly original and outstanding competition cars and record breaking automobiles for voisin he even drove some these cars in races and record attempts it is obvious that during his 16 years with gabriel voisin he was very much influenced by the ideas of this illustrious aviation pioneer and car manufacturer the experience gained during that period gave him the self confidence to persuade his successive bosses at citroën that his unorthodox approach to automobile design was what the company needed first he convinced andré citroën later pierre michelin then pierre jules boulanger and finally robert puiseux and pierre bercot his oeuvre for citroën alone earns him a place of honour among the great automobile designers of the past century the fact that most present day cars still carry the dna of his design philosophy makes him stand out above other automotive pioneers and innovators that is why it is amazing that so little is known about this fascinating and brilliant engineer this book was written in order to remedy that and to pay tribute to andré lefebvre the passionate pioneer who left car enthusiasts around the world such an important heritage there has been nothing published outside of russia concerning the activities of its motor industry by 1937 the soviets had become the largest producers of motor vehicles in europe albeit with the help of henry ford the author decided to concentrate on the work of the pioneers in czarist russia for their efforts were more diverse than those of their counterparts in the soviet era however one soviet motor car which was an indigenous product has been included to illustrate how the industry might have evolved if henry ford had not been approached this is a comprehensive overview of all facets of vehicle production from the early days to the final demise of the soviet union all the manufacturers of motor vehicles certain accessories military machines and even aero engines are recorded in this unique book a guide for collectors discusses the history of die cast toy cars of the 1950s and 1960s and surveys the companies that manufactured the toys around the world including such major names as dinky toys corgi toys solido tekno and tootsietoy it took a great deal of determination on the part of women to sweep aside male resistance from the inner circles of the motoring world a veritable saga with a wealth of illustrations spanning almost a century of motor racing over forty unique portraits of daring brave women who took part in speed records events rallies and grand prix races the origin and subsequent history of the 3 litre ferrari sports cars which the famed italian firm designed and built to contest the various versions of the world sports car championship between 1969 and 1973 this series of cars started with the v12 engine and progressed to using the flat 12 ferrari engine from the then current grand prix car a small investment in this book could save you a fortune with the aid of this book s step by step expert guidance you ll discover all the information you need to know about the alfa romeo giulia gt coupe you want to buy unique this book describes the full development and production history of a modern classic covering available models in all the major markets year by year and including limited editions the data is supported by contemporary illustrations sourced from the factory plus in depth appendices the 924 carrera was a homologation model built to qualify the 924 model to race in group 4 one of the great supercars of the 1980s the 924 carrera was considered by many to have better handling characteristics than porsche s flagship 911 the book features interviews with many of those involved with the car at the time together with race stories statistics and a unique exposé of component failures during racing this book describes the birth development and rallying career of the bmc mini cooper mini cooper in the 1960s providing a compact and authoritative history of where when and how it became so important to the sport britain s has a long distinctive history producing farm model tractors for collectors young and old around the world this book is the first comprehensive fully illustrated guide for collectors of the model and toy tractors produced by britain s in the ten years since it transferred all production to china the book describes all the model tractors released in north america and europe since 1998 as well as general releases it includes details and photographs of prototype and rare models this is complemented by a catalogue describing the main features differences issue dates and codes of each model produced each is illustrated with six color photographs showing the model from different angles and the issue packaging british commercial manufacturers played a prime role in boosting britain s economy during the 1960s especially as many vehicles were exported worldwide british lorries were therefore considered as being the workhorses of the world performing a wide range of duties from heavy haulage to general goods delivery this highly visual study of british lorries of the 1960s captures in 120 illustrations this often understated but very necessary work which was undertaken day and night 365 days a year the
