New York Magazine 1986-09-08 most people understand that regulations have a direct bearing on their access to things such as clean air and water and safe working environments however in the united states few people make the connection between how legal services are regulated and how difficult it is for them to access legal services indeed on the question of affordable and accessible civil justice the world justice project ranks the us 94th out of 113 countries behind albania belarus myanmar and russia for decades academics and others have debated whether the legal profession is self regulated and if it is whether it should be but is it the right debate self regulation or not does not obviate the need for effective regulation independent accountable and transparent regulatory bodies effective oversight of those bodies the genuine engagement of citizens in the regulatory process evidence based research to fully assess the impact of regulation and an approach to regulation that is proportionate and targeted to actual risks are essential for effective regulation through the lens of the adoption of alternative structures this book explains how england wales and australia have by embracing these essential elements successfully modernized their regulatory environments for legal services and how canada has taken firm steps down its own path to the same in contrast by rejecting these elements the united states remains paralyzed in an unproductive regulatory environment for legal services this book provides a blueprint for how the us can take inspiration from its common law sisters to breathe new life into its regulatory environment for legal services ultimately modernization will require more and better regulation that is financed publicly through equitable progressive revenue sources
