the social and natural sciences as well the essays in this volume reflect that range this volume presents insightful discussions about the nature and legitimacy of the human sciences as sciences and the unique character of the social sciences it will be of interest not just as a matter of historical scholarship but also and above all as an important contribution to phenomenology and to the philosophy of science and the sciences as such it deserves attention by scholars from any philosophical tradition interested in thinking about the foundations of their disciplines and a philosophy of science that includes but is not limited to the natural sciences law is an institution that has evolved and flourished throughout its six thousand year history tracing this history in complex societies from the ancient middle east to the contemporary world this book poses the following question can international law become an effective instrument of social control among nations in the emerging world society to develop effective international law will require minimal standards of inclusiveness and mutual responsibility international law must be limited in its scope and its powers it must also meet the fundamental requirement of an effective legal system a widespread belief in its justice and fairness how has that kind of respect for the law come about in earlier societies and how can it be fostered in the evolution of a world legal order st pierre miquelon business law handbook strategic information and basic laws universalising international law is one of the most urgent tasks awaiting those who wish to advance the discipline though all the world acknowledges its universal nature it has long been confined in a largely monocultural mould indeed a tendency is sometimes discernible for international law to be compartmentalised and to function within a close cabinet of technical rules little known to those outside the ranks of specialists this volume looks initially

at some general aspects of universalisation it thereafter adopts a universalist approach to some of the sources of international law and it deals with peace the bedrock of international law which likewise requires a universalist approach it is hoped that these studies will highlight the imperative need that now exists for extending the conceptual framework of international law thereby buttressing its moral authority and widening its appeal at a time when universal acceptance of international law is one of the most pressing demands of the international system this book examines administrative law in asia exploring the profound changes in the legal regimes of many asian states that have taken place in recent years political democratization in some countries economic change more broadly and the forces of globalization have put pressure on the developmental state model wherein bureaucrats governed in a kind of managed capitalism and public private partnerships were central in their stead a more market oriented regulatory state model seems to be emerging in many jurisdictions with emphases on transparency publicity and constrained discretion this book analyses the causes and consequences of this shift from a socio legal perspective showing clearly how decisions about the scope of administrative law and judicial review have an important effect on the shape and style of government regulation taking a comparative approach individual chapters trace the key developments in the legal regimes of major states across asia including china japan korea malaysia taiwan hong kong indonesia singapore the philippines thailand and vietnam they demonstrate that in many cases asian states have shifted away from traditional systems in which judges were limited in terms of their influence over social and economic policy towards regulatory models of the state involving a greater role for judges and law like processes the book also

considers whether judiciaries are capable of performing the tasks they are being given and assesses the profound consequences the judicialization of governance is starting to have on state policy making in asia in terms of the south african constitution of 1996 there is a general need for an introduction to comparative law and one that covers what is technically known as applied comparative law more particularly applied comparative law that involves a study of the bills of rights in other countries clear and concise a landmark publication in the teaching of international law from one of the world s leading international lawyers 2011 updated reprint updated annually germany investment and trade laws and regulations handbook regime accommodation in international law human rights in international economic law and policy provides an analysis of multidimensional conflict between two specialized regimes the author examines how decision makers at different stages of international economic policy making can address and accommodate human rights in a better way forty years ago amartya sen introduced to the world a novel approach to the idea of equality the notion of basic capability as a morally relevant dimension and the claim that we should focus upon equality of basic capabilities a person being able to do certain basic things these ideas as developed by sen and martha c nussbaum have launched an academic armada now proceeding under the flag of the capability approach ca while that flag has ventured far and wide and engaged many areas of inquiry this volume of essays is the first to explore how ca might shed light upon labour law the capabilities approach can illuminate our understanding of labour law across three dimensions part i looks at the nature of the basic relationship between ca and labour law do they share common ground or disagree about what is important can the ca provide a normative foundation for labour law part ii goes further by

examining the relationship of the ca and other well established perspectives on labour law including economics history critical theory restorative justice and human rights part iii examines the possible relevance of the ca to a range of specific labour law issues such as freedom of association age discrimination in the workplace trade employment policy and sweatshop goods studies the extent to which common law notions have taken root in hong kong and answers the most fundamental question about hong kong law today do the people of hong kong want to preserve this system after 1997 this thought provoking introduction to the study of comparative law provides in depth analyses of all major comparative methodologies and theories and serves as a common sense guide to the study of foreign legal systems it is written in a lively and accessible style and will prove indispensable reading to students of the subject it also contains much that will be of interest to comparative law scholars offering novel insights into commonplace methodological and theoretical questions and making a significant contribution to the field
