we often speak of the dignity owed to a person and dignity is a word that regularly appears in political speeches charters are promulgated in its name and appeals to it are made when people all over the world struggle to achieve their rights but what exactly is dignity when one person physically assaults another we feel the wrong demands immediate condemnation and legal sanction whereas when one person humiliates or thoughtlessly makes use of another we recognize the wrong and hope for a remedy but the social response is less clear the injury itself may be hard to quantify given our concern with human dignity it is odd that it has received comparatively little scrutiny here george kateb asks what human dignity is and why it matters for the claim to rights he proposes that dignity is an existential value that pertains to the identity of a person as a human being to injure or even to try to efface someone's dignity is to treat that person as not human or less than human as a thing or instrument or subhuman creature kateb does not limit the notion of dignity to individuals but extends it to the human species the dignity of the human species rests on our uniqueness among all other species in the book's concluding

section he argues that despite the ravages we have inflicted on it nature would be worse off without humanity the supremely fitting task of humanity can be seen as a stewardship of nature this secular defense of human dignity the first book length attempt of its kind crowns the career of a distinguished political thinker

human dignity social movements invoke it several national constitutions enshrine it and it features prominently in international human rights documents but what is human dignity why is it important and what is its relationship to human rights this book offers a sophisticated and comprehensive defence of the view that human dignity is the moral heart of human rights first it clarifies the network of concepts associated with dignity paramount within this network is a core notion of human dignity as an inherent non instrumental egalitarian and high priority normative status of human persons people have this status in virtue of their valuable human capacities rather than as a result of their national origin and other conventional features second it shows how human dignity gives rise to an inspiring ideal of solidaristic empowerment which calls us to support people s pursuit of a flourishing life by affirming both negative duties not to block or destroy and positive duties to protect and facilitate the

development and exercise of the valuable capacities at the basis of their dignity the most urgent of these duties are correlative to human rights third this book illustrates how the proposed dignitarian approach allows us to articulate the content justification and feasible implementation of specific human rights including contested ones such as the rights to democratic political participation and to decent labour conditions finally this book s dignitarian approach helps illuminate the arc of humanist justice identifying both the difference and the continuity between the basic requirements of human rights and more expansive requirements of social justice such as those defended by liberal egalitarians and democratic socialists human dignity is indeed the moral heart of human rights understanding it enables us to defend human rights as the urgent ethical and political project that puts humanity first

The Inherence of Human Dignity *2021-02-15*

dignity is humanity s most prized possession we experience the loss of dignity as a terrible humiliation when we lose our dignity we feel deprived of something without which life no longer seems worth living but what exactly is this trait that we value so highly in this important new book distinguished philosopher peter bieri looks afresh at the notion of human dignity in contrast to most traditional views he argues that dignity is not an innate quality of human beings or a right that we possess by virtue of being human rather dignity is a certain way to lead one s life it is a pattern of thought experience and action in other words a way of living in bieri s account there are three key dimensions to dignity as a way of living the first is the way i am

treated by others they can treat me in a way that leaves my dignity intact or they can destroy my dignity the second dimension concerns the way that i treat other people do i treat them in a way that allows me to live a dignified life the third dimension concerns the view that i have of myself which ways of seeing and treating myself allow me to maintain a sense of dignity in the actual flow of day to day life these three dimensions of dignity are often interwoven and this accounts in part for the complexity of the situations and experiences in which our dignity is at stake so why did we invent dignity and what role does it play in our lives as thinking and acting beings our lives are fragile and constantly under threat a dignified way of living argues bieri is humanity s way of coping with this threat in our constantly endangered lives it is important to stand our ground with confidence thus a dignified way of living is not any way of living it is a particular way of responding to the existential experience of being under threat it is also a particular way of answering the question what kind of life do we wish to live this beautifully written reflection on our most cherished human value will be of interest to a wide readership

this volume is devoted to exploring a subject which on the surface might appear to be just a trending topic in fact it is much more than a trend it relates to an ancient permanent issue which directly connects with people s life and basic needs the recognition and protection of individuals dignity in particular the inherent worthiness of the most vulnerable human beings the content of this book is described well enough by its title human dignity of the vulnerable in the age of rights certainly we do not claim that only the human dignity of vulnerable people should be recognized and protected we rather argue that since vulnerability is part of the human condition human vulnerability is not at odds with human dignity to put it simply human dignity is compatible with vulnerability a concept of human dignity which discards or denies the dignity of the vulnerable and weak is at odds with the real human condition even those individuals who might seem more skilled and talented are fragile

vulnerable and limited we need to realize that human condition is not limitless it is crucial to re discover a sense of moderation regarding ourselves a sense of reality concerning our own nature some lines of thought take the opposite view it is sometimes argued that humankind is or is called to be powerful and that the time will come when there will be no vulnerability no fragility no limits at all human beings will become like god or what believers might think god to be this perspective rejects human vulnerability as in intrinsic evil those who are frail or weak who are not autonomous or not able to care for themselves do not possess dignity in this volume it is claimed that vulnerability is an inherent part of human condition and because human dignity belongs to all individuals laws are called to recognize and protect the rights of all of them particularly of those who might appear to be more vulnerable and fragile

immanuel kant is often considered to be the source of the contemporary idea of human dignity but his conception of human dignity and its relation to human value and to the requirement to respect others have not been widely understood kant on human dignity offers the first in depth study in english of this subject based on a comprehensive analysis of all the passages

in which kant uses the term dignity as well as an analysis of the most prominent arguments for a value of human beings in the kant literature the book carefully examines different ways of construing the relationship between dignity value and respect for others it takes seriously kant s copernican revolution in moral philosophy kant argues that moral imperatives cannot be based on any values without yielding heteronomy instead it is imperatives of reason that determine what is valuable the requirement to respect all human beings is one such imperative respect for human beings does not follow from human dignity for this would violate autonomy but is an unconditional command of reason following this train of thought yields a unified account of kant s moral philosophy

from human dignity to natural law shows how the whole of the natural law as understood in the aristotelian thomistic tradition is contained implicitly in human dignity human dignity means existing for one s own good the common good as well as one s individual good and not as a mere means to an alien good but what is the true human good this question is answered with a careful analysis of aristotle s definition of happiness the natural law can then be understood as the precepts that guide us in achieving happiness to show that human dignity is a reality in the nature of things and not a mere human invention it is necessary to show that human beings exist by nature for the achievement of the properly human good in which happiness is found this implies finality in nature since contemporary natural science does not recognize final causality the book explains why living things as least must exist for a purpose and why the scientific method as currently understood is not able to deal

with this question these reflections will also enable us to respond to a common criticism of natural law theory that it attempts to derive statements of what ought to be from statements about what is after defining the natural law and relating it to human or positive law richard berquist considers aquinas s formulation of the first principle of the natural law it then discusses the love commandments to love god above all things and to love one s neighbor as oneself as the first precepts of the natural law subsequent chapters are devoted to clarifying and defending natural law precepts concerned with the life issues with sexual morality and marriage and with fundamental natural rights from human dignity to natural law concludes with a discussion of alternatives to the natural law
