## **Psychology of the Image**

2012-12-06

psychology of the image outlines a theoretical framework bringing together the semiotic concepts developed by charles peirce the sociological insights of erwin goffman and the psychoanalytic ideas of jacques lacan image studies in fashion advertising photography film studies and psychology have been influenced by these theorists in significant ways the framework presented helps the reader understand how these ideas relate to the study of different domains of the image the internal imagery of dreams external images such as the photograph and image processes which span both contexts e g images we have about ourselves the topics discussed are organised into three themes the first considers mental imagery including sound and dreams the second addresses the interdependent nature of internal and external images e g the gendered self and social identity in the third theme attention turns to external images including television film photography the computer and the internet psychology of the image will be of interest to undergraduates postgraduates lecturers and researchers in the fields of psychology media studies and sociology

## **Ahsen's Image Psychology**

1994

kosslyn makes an impressive case for the view that images are critically involved in the life of the mind in a series of ingenious experiments he provides hard evidence that people can construct elaborate mental images search them for specific information and perform such other internal operations as mental rotation

## **Image and Mind**

1980

provides a current and comprehensive review of the literature on imagery in psychology and traces the evolution of the topic from ancient to modern times

## **Imagery in Psychology**

2004-05-30

this revolutionary new book the way of the image brings us the foundation for an incredibly rich and profound approach to the

psyche one based on objective knowledge of how to translate the meaning of images dream images fantasy images images from film literature art and even the latest newspaper headlines into language we can all use to understand ourselves and our world readers will discover the stunning viewpoint brought to us by one of the greatest psychologists of our era and a whole new vista of the human psyche will open up the revolutionary propositions in this book have astounding implications everyone who is interested in knowing about themselves about their dreams about how therapy can and should work and about the way the world of our psyche works will find this fascinating book to be a guide for the rest of their life

## **Magic Power of Self Image Psychology**

1987-12-02

that painting is at least in part an expression of the painter s personality is obvious from the differences between very impulsive and very controlled painters between the paintings of a picasso for example and a piet mondriaan but these differences have not been looked at in a controlled setting in this book machotka sets out to understand the images produced by a broad sample of students and to connect them to the students inner lives to their interpersonal relations their wishes and fears their impulses and inhibitions their image making was followed in detail and their personality was studied in a long clinical interview producing a rich individual picture of the style and substance of the inner life of each then the images were grouped into seven types by cluster analysis the personal data were found to fit the image clusters closely for example images with little form and much narration were produced by people with strong compensatory longings while dense collaged images were made by participants who exercised relentless control over one major issue in their life other individuals had a strong need to integrate their lives and produced well formed well composed images as expected no single motive explained all artistic activity but the style of the images such as their inhibited formality abstractness or fluid boldness reflected what could be called the map of each participant s interpersonal world

## **The Way of the Image**

2009

this book based on a conference in seoul korea in 2004 examines the image research in 3 parts under the theory of brand attachment the 3 parts are theories of image country image and individual and celebrity source image

## **The Magic Power of Self Image Psychology**

2002

moving jungian psychology from types to images to an image based archetypal psychology is james hillman s concern in this volume this volume leads from hillman s principal essay on typology egalitarian typologies versus the perception of the unique to his expansive inquiry into image hillman instigates an active re visioning re imagining of psychology as a self generative activity of the soul an image is given by the imagining perspective and can only be perceived by an act of imagining

## **Creating Images and the Psychology of Marketing Communication**

2006-08-15

this long awaited work by prominent harvard psychologist stephen kosslyn integrates a twenty year research program on the nature of high level vision and mental imagery image and brain marshals insights and empirical results from computer vision neuroscience and cognitive science to develop a general theory of visual mental imagery its relation to visual perception and its implementation in the human brain it offers a definitive resolution to the long standing debate about the nature of the internal representation of visual mental imagery kosslyn reviews evidence that perception and representation are inextricably linked and goes on to show how quasi pictorial events in the brain are generated interpreted and used in cognition the theory is tested with brain scanning techniques that provide stronger evidence than has been possible in the past known for his work in high level vision one of the most empirically successful areas of experimental psychology kosslyn uses a highly interdisciplinary approach he reviews and integrates an extensive amount of literature in a coherent presentation and reports a wide range of new findings using a host of techniques a bradford book

## **From Types to Images**

2021-07-19

serving to bridge the gap between differing approaches to psychology this new text provides some of the most compelling evidence yet for the subjective presence and objective efficacy of the mental image in this day and age of dissociation between physiological psychologists and other psychologists between cognitive scientist and mentalist between researchers and practitioners mental imagery and its psychophysiology pose some intellectually sticky problems and some promising resolutions that should bind together differing disciplines within psychology

## **Image and Word in Ahsen's Image Psychology**

2000

the fifth volume of imagery emanates from the matrix of presentations offered after the conventions of the american association for mental imagery for the years 1987 and 1988 the first meeting was held in toronto the second at yale university an overview of the presentations covered such a variety of subjects that we thought the subtitle would be most appropriately current perspectives for the first time in five volumes two contributions are related to anthropological imagery by caughey and brink john caughey whose book imaginary social worlds pioneered the social psychology approach to the silent inner imagination offers a fine chapter in anthropological imagery of his own experiences with sufi mystics in pakistan and micronesians in the western pacific compared to middle class americans nicholas brink follows with a chapter on the healing powers of the native american medicine wheel theoretical studies with interesting experimental designs are presented by hunecutt fa functional analysis of imagined interaction activity in everyday life by kuzendorf and hoyle on auditory percepts mental images and hypnotic hallucinations similarities and differences in auditory evoked potentials and by giambia and grodsky on task unrelated images and thoughts while reading the relationship between creativity and mental imagery is presented by h rosenberg and w trusheim entitled creative transformations how visual artists musicians and dancers use mental imagery in their work and colalillo kates discusses dreamjournes using guided imagery and transformational fantasy with children

## **The Function and Nature of Imagery**

1972

image and brain attempts what is rarely seen in cognitive neuroscience the big picture to be sure it is kosslyn s big picture but that is probably the best there is irving biederman william m keck professor of cognitive neuroscience university of southern california this long awaited work by prominent harvard psychologist stephen kosslyn integrates a twenty year research program on the nature of high level vision and mental imagery image and brain marshals insights and empirical results from computer vision neuroscience and cognitive science to develop a general theory of visual mental imagery its relation to visual perception and its implementation in the human brain it offers a definitive resolution to the long standing debate about the nature of the internal representation of visual mental imagery kosslyn reviews evidence that perception and representation are inextricably linked and goes on to show how quasi pictorial events in the brain are generated interpreted and used in cognition the theory is tested with brain scanning techniques that provide stronger evidence than has been possible in the past known for his work in high level vision one of the most empirically successful areas of experimental psychology kosslyn uses a highly interdisciplinary approach he reviews and integrates an extensive amount of literature in a coherent presentation and reports a wide range of new findings using a host of techniques a bradford book

## **Psychologists in Word and Image**

1995

image and sensing have been underrated in western thought but have come into their own since the romantic movement and have always been valued by poets and mystics images come in all shapes and sizes and give expression to our felt sense of life we say we are made in the image of god yet god has no image what kind of image do we mean an impalpable image carrying impalpable sense an ineffable sense permeates and takes us beyond the five senses creating infinities within everyday life some people report experiencing colour and sound when they write or hear words sensing mediates the feel of life often giving birth to image in this compelling book the author leads us through an array of images and sensing in many dimensions of experience beginning with a sense of being born all through life psychosis mystical moments the body the pregnancy of no shame his session with andre green and his thoughts related to james grotstein wilfred bion and marion milner

1968

over 5 000 high school students of different social religious and national backgrounds were studied to show the effects of family experience neighborhoods minority groups etc on their self image and response to society originally published in 1965 the princeton legacy library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of princeton university press these editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions the goal of the princeton legacy library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by princeton university press since its founding in 1905

## **The Image and Appearance of the Human Body**

2013-11-05

this book collects some of the most exciting pioneering work in perceptual and cognitive psychology the authors quantitative approach to the study of mental images and their representation is clearly depicted in this invaluable volume of research which presents interprets evaluates and extends their work the selections are preceded by a thorough review of the history of their experiments and all of the articles have been updated with reviews of the current literature the book s first part focuses on mental rotation the second includes other more complex transformations and sequences of transformations a third part describes work on rotational transformations in the context of the perceptual illusion of apparent motion roger n shepard is

professor of psychology stanford university lynn a cooper is professor of psychology university of arizona a bradford book

## ***Image And Brain***

1996-08-26

emotional image therapy eit is a new method of psychotherapy belonging to its psychodynamic direction this method addresses any chronic negative emotional states underlying the psychological or psychosomatic problems of the individual the means of analyzing the causes of these states are images of these states spontaneously represented by the client and the means of their correction are emotional and semantic influences about 30 methods that the client himself implements in relation to these images this allows surprisingly quickly solve many psychological and psychosomatic problems among them are phobias anxieties emotional dependencies psychosomatic pains allergies asthma neurodermatitis thyroid gland diseases and much more the author of the emotional image therapy professor of the moscow institute of psychoanalysis nikolay linde provides a theoretical basis of eit and methods of practical work the book contains numerous examples 153 from the author s personal practice in which readers can find analogies with problems from their own lives or those of their acquaintances or clients a set of imaginative exercises developed by the author allows to expand our ideas about ourselves and the laws of psychology the book also provides a dictionary of interpretations of images of fantasies or dreams of clients this book is intended for psychologists practitioners psychotherapists students of psychological and medical universities but it can also be useful to all people who are interested in practical psychology and the possibilities of providing psychological help to themselves and others

## **The Psychophysiology of Mental Imagery**

1990

this book lays the foundation to the author s widely acclaimed theory of social representations a theory that re defines the field of social psychology its problems concepts and their symbolic and communicative functions and that formulates a profoundly interactive study of complex social phenomena

## **Imagery**

1990-03-31

does a proper respect for science require psychologists to view man as an impotent reactor whose responses are completely determined by his physical constitution and the forces impinging upon him in this wise and well argued book isidor chein

invites his readers to lift their eyes from experimental research for a time to consider the relationship between science and the image of man few psychologists even the most gifted and dedicated among them pause to consider the philosophical underpinnings of their work it is almost as though the humanist secretly lurking in each of them is fearful of the bad news he might finally be forced to accept that man is essentially an exquisitely complicated robot this fear is misplaced and harmful it is largely responsible for the disturbing fact that scientific psychology has produced in chern's estimate so little that is relevant to the humanities so little as he puts it that has lived up to psychology's promise to itself what must be more widely understood is that it does not follow that behavioral law is reducible to physiological law or that physiological law is reducible to physical law with an uncompromising commitment to scientific method chern shows that when closely analyzed there is actually no need to assume an unbridgeable gap between scientific psychology and psychoanalytic humanistic psychology this is a lucid and powerful theoretical work of importance for scholars in all fields sharing the belief that the proper study of mankind is man the science of behavior and the image of man is written by the most intellectually stimulating and respected representative of scientific humanistic psychology robert b holt professor of psychology graduate school of arts and sciences new york university

## ***The Magic Power of Self-image Psychology***

1964

a companion volume to art and illusion the image and the eye provides a comprehensive and intriguing overview of art and our perception of it in a series of papers and lectures professor gombrich presents his thoughts and arguments on subjects as diverse as photography's tricks with perspective the problems of expressing emotion through art and how pictorial representation can alter the way in which we see the real world like all professor gombrich's works these masterly pieces display a lively curiosity and an infectious enthusiasm for understanding the challenges presented by art copyright libri gmbh all rights reserved

## **Image and Brain**

1994-01-01

mental imagery has been a controversial topic in psychology the major problem has been the inherently private nature of mental images this book summarises the arguments and positions puts them in context and shows how modern neuroscientific methods can illustrate the representational nature of mental imagery

## **Image, Sense, Infinities, and Everyday Life**

2016

body image psychological predictors social influences and gender differences opens with a presentation of results of a study on sport active and sport inactive adolescents their perception of body image and their associated eating habits and sport participation motives following this the authors examined the association between feminist beliefs empowerment and positive body image through an online sample of 302 british women additionally the authors examine adolescent boys body image and its relationship to their subjective well being as well as the effect of the parent adolescent relationship on body image and their subjective well being the penultimate chapter discusses research findings regarding body image issues in men of color risk factors associated with body dissatisfaction in men of color are explored including a discussion of cultural and race related factors that may impact the development of body image issues the allocentric lock model of eating disorders is explored in the concluding chapter providing a rich conceptual framework for elucidating the source of body image disturbance and factors causing patients with eating disorders to be locked in a body that they detest

## ***Society and the Adolescent Self-Image***

2015-12-08

perception of pixelated images covers the increasing use of these images in everyday life as communication socialization and commerce increasingly rely on technology the literature in this book is dispersed across a wide group of disciplines from perception and psychology to neuroscience computer science engineering and consumer science the book summarizes the research to date answering such questions as what are the spatial and temporal limits of perceptual discrimination of pixelated images what are the optimal conditions for maximizing information extracted from pixelated images and how does the method of pixelation compromise or assist perception integrates research from psychology neuroscience computer science and engineering explains how the process of perception works for pixelated images identifies what assists and hinders perception including the method of pixelation discusses the limits of perception of pixelated images

## ***Mental Images and Their Transformations***

1982

healing images the role of imagination in health details the function and capacity of imagination in health this work consists of 22 chapters and discusses theory research and clinical applications presented is a brief history of the use of imagery for healing in both eastern and western traditions a review of research that deals with the physiological consequences of imagery

and related approaches and an explanation of how images lead to such bodily changes healing images covers the latest theory and research on the relationship between imagery cerebral laterality and healing an attempt is also made to integrate modern systems theory with concepts of information and energy which disclose the role of imagery and love in health imagery and music in health are also discussed

after reading this book you ll never be able to hear humphrey bogart s famous quote here s looking at you kid without a thousand thoughts racing through your head that will undoubtedly put a smile on your face and make everyone else wonder what you know that they don t

## **Psychoanalysis**

2008-02-19

when discussion began four years ago about launching the american association for the study of mental imagery there was still a great deal of skepticism on the part of many academic and clinical psychologists they held to the gradually diminishing view that mental imagery was too idiosyncratic a subject for intensive study however there were sufficient visionaries to recognize the undeniable importance of imagery for the functioning of life in memory and the transmission of information through the valiant efforts of these pioneers in psychology art and movement therapy and others in the field of human relations the organization has grown and flourished even more important is the burgeoning of knowledge about the ubiquitous nature of imagery and its impact on life the third annual meeting of aasmi was held in 1981 at yale university under the sponsorship of president elect jerome l singer sixty five persons presented papers workshops and theoretical studies this volume represents the broad array of topics and approaches offered at the conference while it is informative and stimulating to read and study the articles in this volume they can convey only a fraction of the excitement and the knowledge available to those who attended the conference the reader will reap a two fold benefit from this volume for not only does it cover a vast array of topics related to imagery but it also offers the strong possibility that the results of these works can be included in one s daily work as a clinician and or researcher

## **The Science of Behavior and the Image of Man**

2017-07-05

combining detailed case material and over 80 examples of patients work the author describes how the symbolic image and the style in which it is represented often relate to a particular stage in the integration of painful experiences as the image and the style change so does the individual who discovers previously untapped sources of creativity and inner strength drawing on theoretical insights of jung balint milner winnicott and others r m simon brings to life the different ways in which patients experience art therapy and the shifting role of the therapist responding to their needs

## **Psychology of the TV Image**

1980

michael tye untangles the complex web of empirical and conceptual issues of the newly revived imagery debate in psychology between those that liken mental images to pictures and those that liken them to linguistic descriptions he also takes into account longstanding philosophical issues to arrive at a comprehensive up to date view and an original theory that provides answers to questions raised in both psychology and philosophy drawing on the insights of stephen kosslyn and the work on vision of david mart tye develops a new theory of mental imagery that includes an account of imagistic representation and also tackles questions about the phenomenal qualities of mental images image indeterminacy the neurophysiological basis of imagery and the causal relevance of image content to behavior tye introduces the history of philosophical views on the nature of mental imagery from aristotle to kant he examines the reasons for the decline of picture theories of imagery and the use of alternative theories the reemergence of the picture theory with special reference to the work of stephen kosslyn and the contrasting view that mental images are inner linguistic descriptions rather than pictorial representations he then proposes his own theory of images interpreted as symbol filled arrays in part like pictures and in part like linguistic descriptions addresses the issue of vagueness in some features of mental images and argues that images need not have qualia to account for their phenomenological character tye concludes by discussing the questions of how images are physically realized in the brain and how the contents of images can be causally related to behavior
