coming out of recession so how is this affecting the construction market spon s mechanical and electrical services price book 2015 continues to be the most comprehensive and best annual services engineering price book currently available providing detailed pricing information across the full range of mechanical and electrical services together with higher level costs for a diverse range of systems and different building applications use the access code inside the front cover of the book to get set up with internet access to this 2015 edition until the end of december 2015 spon s online delivers a versatile and powerful online data viewing package the book now uses a combination of nrm1 and nrm2 as the measurement standards this year we provide a new detailed engineering feature on rics ska ratings and add cost sections for led lighting pv panels and solar thermal energy the book also gives the usual market update of labour rates and daywork rates material costs and prices for measured works and all in rates and elemental rates in the approximate estimating section

New Trends in Medical and Service Robots

2014-04-08

this volume describes new frontiers in medical and service robotics in the light of recent developments in technology to advance robot design and implementation in particular the work looks at advances in design development and implementation of contemporary surgical rehabilitation and biorobots surgical robots allow surgeons greater access to areas under operation using more precise and less invasive methods rehabilitation robots facilitate and support the lives of the infirm elderly people or those with dysfunction of body parts affecting movement these robots are also used for rehabilitation and related procedures such as training and therapy biorobots are designed to imitate the cognition of humans and animals the need to substitute humans working on delicate tiresome and monotonous tasks or working with potentially health damaging toxic materials requires intelligent high performance service robots with the ability to cooperate advanced communication and sophisticated perception and cognitive capabilities progress in this field is fast and results need to be disseminated to stimulate both practical applications and further research thus these papers are a valuable addition to existing literature

water is a vital element for agricultural production and for economic development in general however the spatial and temporal distribution of water in mexico restrains its use because of this distribution it has been necessary to build a large infrastructure to capture store and allot this element among water users around the world countries that once promoted more government involvement in irrigation management are adopting new policies that do just the opposite creating incentives for farmers to take over the management of operations and

maintenance while government agencies focus on improving the management of water at the main system level is this just another management fad or will the pendulum that is now swinging toward greater management control by farmers soon swing back the other way toward greater state control this volume reports on four countries where the state's role in irrigation management has undergone fundamental change and where the result has been a much greater management role for farmers these studies address the political antecedents of participatory irrigation management policies the process of implementing the policies and the second generation challenges of sustaining them these experiences will prove useful to policymakers and irrigation professionals who are facing similar challenges in their own countries
