outline of the operations of the british troops in scinde and  
affghanistan is a detailed account of british military  
operations in the first anglo afghan war 1839 42 and of the  
invasion in 1839 by the british east india company of the  
province of sind in present day pakistan the author george

buist 1804 60 was editor of the bombay times and the book is heavily drawn from dispatches that appeared in that newspaper and in another indian publication the monthly times buist was born in scotland and educated at saint andrews university and the university of edinburgh in addition to his newspaper work he was an accomplished amateur scientist who collected scientific data in various fields and served as secretary to the geographical society of bombay and the agri horticultural society of western india buist was highly critical of british policy both in this book and in the editorial line taken by the bombay times he writes that the anglo afghan war began as a war of aggression turned into struggle for our own defence and was transformed finally into a war of vengeance he opposed the policy of retaliation against the afghans after the kabul massacres of 1842 and argued that the war was both ruinously expensive and inimical to british interests the british objective in starting the war was to drive the ruler of afghanistan dost mohammad khan from power and to replace him with shah shuja who was thought to be more favorable to british interests and less susceptible to russian pressure or blandishment about this view buist writes the more the matter is examined the more difficult it is to discover by what process of self delusion it was that the projectors or advocates of the dooranee durrani alliance could for a moment persuade themselves that the restoration and maintenance of the shah shoojah shuja' on the throne could conduce to any one of the ends we professed ourselves anxious to attain

foundations of mathematics hence the book may be useful especially for those readers who want to have all the proofs carried out in full and all the concepts explained in detail in this sense the book is self contained the reader s ability to guess is not assumed and the author s ambition was to reduce the use of such words as evident and obvious in proofs to a minimum this is why the book it is believed may be helpful in teaching or learning the foundation of mathematics in those situations in which the student cannot refer to a parallel lecture on the subject this is also the reason that i do not insert in the book the last results and the most modern and fashionable approaches to the subject which does not enrich the essential knowledge in foundations but can discourage the beginner by their abstract form a g
