hugh p possingham landscape scale conservation planning is coming of age in the last couple of decades conservation practitioners working at all levels of governance and all spatial scales have embraced the care principles of conservation planning comprehensiveness adequacy representativeness and efficiency hundreds of papers have been written on this theme and several different kinds of software program have been developed and used around the world making conservation planning based on these principles global in its reach and influence does this mean that all the science of conservation planning is over that the discovery phase has been replaced by an engineering phase as we move from defining the rules to implementing them in the landscape this book and the continuing growth in the literature suggest that the answer to this question is most definitely no all of applied conservation can be wrapped up into a single sentence what should be done the action in what place at what time using what mechanism and for what outcome the objective it all seems pretty simple what where when how and why however stating a problem does not mean it is easy to solve
