collegechemistrynotes.com offers general chemistry notes which is an all in one combined lecture notes textbook material substitute that helps undergraduate general chemistry students instantly reduce their study time while increasing their lecture grade in the course general chemistry notes is the only product written by actual chemistry professors that is designed to combine both a student's lecture notes and textbook materials into one easy to read and easy to understand format so stop spending an hour per page trying to read your complicated textbook additionally general chemistry notes removes the largest distraction that every student faces during lecture taking notes our notes are the only complete set of undergraduate general chemistry notes proven to be so effective that it has been featured in academic magazines and presented at hundreds of science education seminars in the united states prior to its release and distribution the contents of general chemistry notes were used exclusively by the contributing authors while they were teaching their own general chemistry courses at some of the top universities in the country the contributing professors of general chemistry notes noticed that regardless of which university they were teaching at and regardless of which textbook they were using their lecture notes never changed this inspired the professors members of the aapt and acs to develop and write general chemistry notes now that the notes are available to all undergraduate chemistry students they are the only system of their kind to be labeled the perfect companion to chemistry students who want perfect notes fact 95 of all general chemistry courses and general chemistry textbooks are the same this fact is exemplified by the thousands of chemistry students from hundreds of different colleges throughout the u.s who have used our notes to earn a grades in their general chemistry courses the enormous popularity of general chemistry notes would not be possible unless they were widely applicable to any undergraduate general chemistry course and any college level general chemistry textbook go online and google any university's general chemistry course number 1st or 2nd semester it doesn't matter and examine the course syllabus invariably the syllabus will look almost identical to your own this is why college transfer credit for general chemistry is so freely granted to students who transfer from one educational institution to another how quickly will you benefit from reading general chemistry notes our notes instantly reduces the quantity of material that you must read study and learn by 34.7 with years of chemistry teaching experience at the university level the authors of general chemistry notes have been able to pinpoint exactly which material is essential and which material is completely irrelevant an average chapter in your textbook is 41.53 pages the average section in our notes is only 14.41 pages a reduction of 34.7 and remember those 14.41 pages include the topics and contents of both your textbook and your lecture notes combined into a highly optimized easy to understand format every major topic is covered in great detail while topics never seen on exams are omitted one particular student was studying chemistry an average of 10 hours week or 160 hours semester before he received general chemistry notes immediately after purchasing our notes he was able to reduce his chemistry study time to 3.5 hours week or 56 hours semester while earning better scores on his quizzes and midterm exams how much money would you pay to save yourself 6.5 hours of studying per week without sacrificing your grade if time is money you will earn back your investment in a matter of days so stop writing we've already taken your notes

excerpt from lecture notes for chemical students embracing mineral and organic chemistry i have often noticed with regret the great amount of labour which an earnest student expends in noting down the reactions and the names and formulae of substances which are presented to his notice in the lecture theatre he is thus greatly interrupted in following the arguments and explanations of the speaker and he often loses more important generalizations in securing a record of details one of my chief objects in the preparation of this book has been to relieve him from such distractions for this purpose very full lists of names and formulae are given and a comparatively large amount of space is devoted to equations expressing the reactions occurring in the formation and decomposition of the substances treated of such being the chief objects of the book it would obviously have been impossible to give in all or even in many cases the reasons which have induced me to adopt such views of the

constitution of both mineral and organic compounds as are either novel or not generally recognized thus I am aware that the atomicity which is assigned to many of the elements may be called in question but it is hoped that in thus giving for the first time a thorough and consistent scheme of the combining powers of atoms about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks.com this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

unlike some other reproductions of classic texts 1 we have not used ocr optical character recognition as this leads to bad quality books with introduced typos 2 in books where there are images such as portraits maps sketches etc we have endeavoured to keep the quality of these images so they represent accurately the original artefact although occasionally there may be certain imperfections with these old texts we feel they deserve to be made available for future generations to enjoy
