diversity has become a key term in contemporary social politics and is often used as both a description of complex social realities and a normative prescription for how those realities should be valued influenced by the politics of multiculturalism and by social movements asserting the right to be different diversity has emerged as an open fluid discourse that challenges reductive visions of legitimate identities and human possibilities it is this apparent acceptance of diversity as a fact and value that this book looks at in several ways it offers a countervailing assessment of diversity seeing it less as a unifying social imaginary and more as a cost free form of politics attuned to the needs of late capitalist consumer societies the essays collected here are developed from a research seminar entitled diversity human rights and participation organised by the partnership on youth between the council of europe and the european commission the studies gathered here are embedded in 10 different national contexts they track dimensions of diversity in education social services jurisprudence parliamentary proceedings and employment initiatives and assess their significances for the social actors who must negotiate these frameworks in their daily experience
