from the introduction this inquiry is concerned with the themes of praxis and action in four philosophic movements marxism existentialism pragmatism and analytic philosophy it is rare that these four movements are considered in a single inquiry for there are profound differences of emphasis focus terminology and approach represented by these styles of thought many philosophers believe that similarities among these movements are superficial and that a close examination of them will reveal only hopelessly unbridgeable cleavages while respecting the genuine fundamental differences of these movements this inquiry is undertaken in the spirit of showing that there are important common themes and motifs in what first appears to be a chaotic babble of voices i intend to show that the concern with man as an agent has been a primary focal point of each of these movements and further that each contributes something permanent and important to our understanding of the nature and context of human activity

this volume presents the work of maurice merleau ponty a great philosopher and social theorist of mid twentieth century as a viable alternative to both modernism and postmodernism douglas low argues that merleau ponty s philosophy offers explanations and solves problems that other philosophies grapple with but do not resolve given their respective theoretical presuppositions and assumptions low brings the work of merleau ponty into critical contact with important thinkers including sartre heidegger derrida and marx he highlights merleau ponty s connection to the early hegel especially with regard to the criticism of modernism s representational consciousness and its subsequent skepticism with regard to our being in the world merleau ponty made a concerted effort to solve the problems that come about due to a wide variety of western dualisms body and mind perception and conception self and other etc he frequently does so by demonstrating the connection between these disparate terms the connection of

perception with affect and interest fact with value and a
broadened view of science with moral and philosophical judgment
merleau ponty s unique contribution is his focus on the lived
through perceiving body and its relationship to abstract thought
and language in his detailed analysis of the work of merleau ponty
low brings attention to a twentieth century master capable of
altering the landscape of modern and social philosophy in the
twenty first century

french philosopher henri bergson criticized the usual connection between time and space and established a new way of understanding time as duration *durée* whereas zeno presented an objectivist understanding of time bergson emphasized its subjectivist meaning both contradictory positions seem incompatible referring to pure intellect zeno on the one hand or pure sensation bergson on the other looking at hegel s phenomenology this book shows that the outer and inner consciousness of time became crucial to his principle of movement and change in his view time is an integral part of dialectical processes that are historically substantiated hegel sought to subordinate pure concepts and ideas so that they would become indispensable moments of the self knowing spirit cassirer appreciated the idealism of coming into being but rejected hegel s concept of the absolute instead he established his philosophy of symbolic forms in which the development of different perceptions and conceptions of time from situational affective experience to the mathematical system of relations determines the direction of the symbolic formation process in the end the sensitive concept of time is replaced by the relational concept of natural numbers in which all here and now experiences are embedded finally bourdieu attempts to reintegrate symbolic forms into social processes the book reflects on the concepts mentioned here by discussing their pros and cons in order to shed more light on the relationship between time and movement in european thought
