*A key role for veterinary authorities and animal health practitioners in preventing and controlling neglected parasitic zoonoses*

2021-12-02 the regional offices of the food and agriculture organization of the united nations fao the world organisation for animal health oie and the world health organization who in asia and the pacific region regional tripartite have a longstanding and successful partnership in promoting and facilitating a one health approach to address challenges at the human animal environment interface the regional tripartite has agreed to collaborate to enhance multisectoral partnerships at country level ensuring that necessary multisectoral interventions reach all the affected populations in need including hard to reach vulnerable populations and to accelerate control and elimination of neglected parasitic zoonoses across the asia and the pacific region prevention and control of infection in animals is one of the critical means to reduce the burden of zoonoses in humans therefore the animal health sector has a very important role to play however awareness and knowledge are often limited among veterinary authorities public health practitioners animal health practitioners and animal owners this handbook focuses on interventions that the animal health sector can implement to prevent human and animal disease caused by these parasites it aims to provide up to date information in a concise form and is expected to encourage the relevant stakeholders to take actions to control and prevent neglected parasitic zoonoses although the handbook was written

primarily for asia and the pacific region the information is relevant in many other regions

A key role for veterinary authorities and animal health practitioners in preventing and controlling neglected parasitic zoonoses

2021-12-02 neglected parasitic zoonoses such as cysticercosis and echinococcosis are a group of zoonoses that continue to impose a significant burden and affect livelihoods of the vulnerable populations that typically have limited access to adequate sanitation basic living conditions health and veterinary services and awareness recognising the disease burden and importance of a multisectoral approach to controlling and eliminating neglected parasitic zoonoses in 2018 the regional tripartite jointly organised a regional workshop on neglected foodborne parasitic zoonoses to control zoonoses in an efficient effective and sustainable way it is important to understand the transmission cycle of each disease and to implement strategic interventions at key stages via multisectoral participation from public health animal health environmental health and food safety prevention and control of infection in animals is one of the critical means to reduce the burden of zoonoses in humans therefore the animal health sector has a very important role to play however awareness and knowledge are often limited among veterinary authorities public health practitioners animal health practitioners and animal owners this handbook focuses on interventions that the animal health sector can implement to prevent human and animal disease caused by these parasites

it aims to provide up to date information in a concise form and is expected to encourage the relevant stakeholders to take actions to control and prevent neglected parasitic zoonoses although the handbook was written primarily for asia and the pacific region the information is relevant in many other regions we hope you find this handbook useful and practical

**Foodborne Illness: Latest Threats and Emerging Issues, an Issue of Infectious Disease Clinics**

2013-09-25 food borne illness is a common costly yet preventable public health problem this issue of the infectious disease clinics covers the most common food borne pathogens along with articles that include indentifying diagnosing and treating food borne illness the issue also covers food borne illness in special populations as well as long term complications associated with food borne illness

**Emerging Infectious Diseases** 2018 l autore raccoglie in questo libro una serie di aneddoti che fanno ben capire in che modo le persone alcune volte anche istruite rare volte anche addetti ai lavori inciampino in bias che conducono i loro ragionamenti altrove rispetto a quella che invece è l attuale conoscenza scientifica ogni capitolo tematico racconta una storia quella di federica per esempio mamma di elena che ama informarsi e documentarsi sulla salute della figlia tuttavia perennemente soggiogata dalla suocera e dalla sua frase preferita si è sempre fatto così ogni storia diventa un pretesto per parlare di temi che interessano la nostra

salute e la salute di chi ci sta accanto una piccola storia dove il bias su cui puntualmente si inciampa viene sottolineato e smentito sempre con il supporto di fonti medico scientifiche

Non è mai morto nessuno

2024-04-30T00:00:00+02:00 this book provides detailed information on the impact of climate change on gastrointestinal and liver health and disease patterns on the african continent it also discusses the adaptation measures required to mitigate these impacts and highlights the complex interplay between climate change and various forms of gut diseases ranging from the spread of infectious diseases to emerging parasites this volume is intended for both public health researchers climate epidemiologists gastroenterologists hepatologists and tropical medicine physicians seeking to develop a comprehensive understanding of the links between climate change and disease patterns in africa the ideas and findings covered in this book contribute to un sustainable development goal 3 good health and well being and sdg 13 climate action

**Impact of Climate Change on Health in Africa**

2023-12-05 this book is the first scientific publication on diseases caused by agents circulating in natural environments independently from humans covering the whole territory of the russian federation it contains diverse and multifaceted information both in textual and cartographic form the book focuses on the historical and current distribution of natural focal diseases in
