## **Story Engineering**

2011-01-27

what makes a good story or a screenplay great the vast majority of writers begin the storytelling process with only a partial understanding where to begin some labor their entire lives without ever learning that successful stories are as dependent upon good engineering as they are artistry but the truth is unless you are master of the form function and criteria of successful storytelling sitting down and pounding out a first draft without planning is an ineffective way to begin story engineering starts with the criteria and the architecture of storytelling the engineering and design of a story and uses it as the basis for narrative the greatest potential of any story is found in the way six specific aspects of storytelling combine and empower each other on the page when rendered artfully they become a sum in excess of their parts you Il learn to wrap your head around the big pictures of storytelling at a professional level through a new approach that shows how to combine these six core competencies which include four elemental competencies of concept character theme and story structure plot two executional competencies of scene construction and writing voice the true magic of storytelling happens when these six core competencies work together in perfect harmony and the best part anyone can do it

when committed agnostic gabriel stone s wife dies in an unlikely airline disaster he pours himself into the writing of a story that has haunted him since his youth a novel his devout wife had warned him never to finish inspired by a visit to the island of patmos he is fascinated with the visions beheld there by st john the divine while in political exile for his beliefs those visions included terrifying events delivered by what john described as seven thunders which he was instructed to withhold to seal up and write them not revelation 10 4 as stone becomes entrenched in his speculative interpretation of what those visions might have been an embedded code within the book of revelation itself reveals startling connections to covert operations that are about to tear the world's political landscape to shreds perhaps signaling the beginning of the prophesied end of times as stone's novel nears publication he finds himself the pawn in a war between superpowers and supernatural forces each hoping to control the book each driven by hidden agendas beyond stone's comprehension facing choices that are at once spiritual and life dependent with global stakes pivoting on his ability to accept the unbelievable and stop the unthinkable the seventh thunder is a secular thriller that stops at nothing short of our very souls hanging in the balance while ringing frighteningly relevant to today's headlines winner of the 2010 next generation indie book award for best novel in the suspense thriller category

2016-04-18

one of the most common questions new writers ask professionals is how they wrote their book what was their process for storytelling did they use an outline to plan the book or write it from the seat of their pants but really the question should be about the general principles and nature of storycraft does every part of a story have what it needs to keep readers turning the pages bestselling author and creator of storyfix com larry brooks changes the sound of the writing conversation by introducing a series of detailed criteria for novelists of every level and genre to refer to while writing regardless of their preferred writing method beginning with the broadest part of the story the early checklists help writers to ensure that their novel is based on a premise rather than an idea and gradually hones in on other elements to keep the story moving forward including dramatic tension narrative strategy scene construction readers won t know or care about the process but what brooks offers here is a chance for readers to make the most of whichever process they choose and in doing so cut years off their learning curve
