The Evolution of Modern Medicine William Osler, 2008-10 Sir William Osler, 1st Baronet (1849-1919) was a Canadian physician. He has been called one of the greatest icons of modern medicine and described as the Father of Modern Medicine. Osler was a physician, clinician, pathologist, teacher, diagnostician, bibliophile, historian, classicist, essayist, conversationalist, organizer, manager and author. After two years at the Toronto School of Medicine, he came to McGill University in Montreal where he obtained his medical degree (MDCM) in 1872. Following post-graduate training in Europe, Osler returned to McGill University as a professor in 1874. In 1884 he was appointed Chair of Clinical Medicine at the University of Pennsylvania in Philadelphia. He was a prolific author and a great collector of books and other material relevant

to the history of medicine. He was instrumental in founding the Medical Library Association in North America and served as its second President from 1901-1904. Perhaps Osler's greatest contribution to medicine was to insist that students learned from seeing and talking to patients and the establishment of the medical residency. His works include: *Aequanimitas* (1904) and *The Evolution of Modern Medicine* (1921).

The Evolution of Modern Medicine William Osler, 2021-01-18 Book Excerpt: ...BUT on that account, I say, we ought not to reject the ancient Art, as if it were not, and had not been properly founded, because it did not attain accuracy in all things, but rather, since it is capable of reaching to the greatest exactitude by reasoning, to receive it and admire its discoveries, made from a state of great ignorance, and as having been well and properly made, and not from chance. (Hippocrates, *On Ancient Medicine*, Adams edition, Vol. 1, 1849, p. 168.) THE true and lawful goal of the sciences is none other than this: that human life be endowed with new discoveries and powers. The Evolution of Modern Medicine William Osler, 2015-07-09 Excerpt from *The Evolution of Modern Medicine: A Series of Lectures Delivered at Yale University on the Silliman Foundation, in April, 1913* In the year 1883 a legacy of eighty thousand dollars was left to the President and Fellows of Yale College in the city of New Haven, to be held in trust, as a gift from her children, in memory of their beloved and honored mother, Mrs. Hepsa Ely Silliman. On this foundation Yale College was requested and directed to establish an annual course of lectures designed to illustrate the presence and providence, the wisdom and goodness of God, as manifested in the natural and moral world. These were to be designated as the Mrs. Hepsa Ely Silliman Memorial Lectures. It was the belief of the testator that any orderly presentation of the facts of nature or history contributed to the end of this foundation more effectively than any attempt to emphasize the elements of doctrine or of creed; and he therefore provided that lectures on dogmatic or polemical theology should be excluded from the scope of this

foundation, and that the subjects should be selected rather from the domains of natural science and history, giving special prominence to astronomy, chemistry, geology and anatomy. It was further directed that each annual course should be made the basis of a volume to form part of a series constituting a memorial to Mrs. Silliman. The memorial fund came into the possession of the Corporation of Yale University in the year 1901; and the present volume constitutes the tenth of the series of memorial lectures. The Evolution of Modern Medicine William Osler,2021-04-27 SAIL to the Pacific with some Ancient Mariner, and traverse day by day that silent sea until you reach a region never before furrowed by keel where a tiny island, a mere speck on the vast ocean, has just risen from the depths, a little coral reef capped with green, an atoll, a mimic earth, fringed with life, built up through countless ages by life on the remains of life that has passed away. And now, with wings of fancy, join Ianthe in the magic car of Shelley, pass the eternal gates of the flaming ramparts of the world and see his vision:

The Evolution of Modern Medicine; a Series of Lectures Delivered at Yale University on the Silliman Foundation, in April 1913 Sir William Osler,2012-08

The Evolution of Modern Medicine William Osler,2023-08-08 The manuscript of Sir William Osler's lectures on the Evolution of Modern Medicine, delivered at Yale University in April, 1913, on the Silliman Foundation, was immediately turned in to the Yale University Press for publication. Duly set in type, proofs in galley form had been submitted to him and despite countless interruptions he had already corrected and revised a number of the galleys when the great war came. But with the war on, he threw himself with energy and devotion into the military and public duties which devolved upon him and so never completed his proof-reading and intended alterations. The careful corrections which Sir William made in the earlier galleys show that the lectures were dictated, in the first instance, as loose memoranda for oral delivery rather than as finished compositions for the eye, while maintaining throughout the logical continuity and the engaging con moto which were so characteristic of his literary style. In revising the lectures for publication, therefore, the editors have merely endeavored to carry out, with care and befitting reverence, the indications supplied in the earlier galleys by Sir William himself. In supplying dates and references which were lacking, his preferences as to editions and readings have been borne in mind. The slight alterations made, the adaptation of the text to the eye, detract nothing from the original freshness of the work.
