JUnit 97 2011-11-28

JUnit is a Java-based testing framework for testing individual units or components of a software application. It is designed to be used with the Java Development Kit (JDK) and the Java Virtual Machine (JVM). JUnit is a simple and easy-to-use framework that allows developers to write and execute tests for their code. It is a popular choice for testing Java applications and is widely used in the industry.
