during the past two decades there has been a resurgence of interest in issues of land reform in developing and transitional countries this has been initiated by the large scale redistributive activities in former communist countries and by the growing number of claims by displaced indigenous population groups to restore their rights to land this book provides a timely and clear overview of the historical and theoretical context of current land reform and tenure issues illustrated with global case studies from europe asia africa and latin america key sections explore land and rights to land property land tenure and reform and land registration beginning by discussing the need to demarcate space by creating invisible lines which give certainty to what extent authority over land can be established the book then explores legal and theoretical definitions of land and property and looks at the various different policies and forms of land tenure one of the most recent developments in land reform policy has been to look to traditional forms of access to land and of resource conservation the book argues that while such policies on land property rights have great potential they are best being adopted in a long term incremental way it also shows how land policy reforms must be embedded in institutional and general policy reforms complemented by rural development and educational opportunities for beneficiaries the book summarises the main principles of land reform activities and practices and argues that the perception of land tenure security is the most critical factor of success to land reform

excerpt from english land and english landlords an enquiry into the origin and character of the english land system with proposals for its reform with in index the present volume treats of the historical growth the distinctive features and the prospective development of the english land system it does not purport to deal with the scotch or irish land systems in so far as they differ from the english except where these differences may be significant for purposes of illustration nor does it purport to describe fully the land systems of foreign countries though i have thought it well to introduce a concise review of the more important among these in order to exhibit in stronger relief the unique character of the agrarian constitution established in england by the joint operation of law and custom the peculiar essence of that constitution is to be found in the marked separation of the agricultural community into three classes landlords farmers and labourers of these classes the first is at once the most powerful and the most typical product of the english land system i have therefore associated english land with english landlords in the title of a work chiefly designed to set forth the reciprocal influence of social and agricultural relations in the past the present and the future about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks.com this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
