giant leap right on the horizon today s small scale software programs are about to be joined by vast public software works that will revolutionize computing and transform society as a whole one such vast program is the mirror world imagine looking at your computer screen and seeing reality an image of your city for instance complete with moving traffic patterns or a picture that sketches the state of an entire far flung corporation at this second these representations are called mirror worlds and according to gelernter they will soon be available to everyone mirror worlds are high tech voodoo dolls by interacting with the images you interact with reality indeed mirror worlds will revolutionize the use of computers transforming them from mere handy tools to crystal balls which will allow us to see the world more vividly and see into it more deeply reality will be replaced gradually piece by piece by a software imitation we will live inside the imitation and the surprising thing is this will be a great humanistic advance we gain control over our world plus a huge new measure of insight and vision in this fascinating book part speculation part explanation gelernter takes us on a tour of the computer technology of the near future mirror worlds he contends will allow us to explore the world in unprecedented depth and detail without ever changing out of our pajamas a hospital administrator might wander through an entire medical complex via a desktop computer any citizen might explore the performance of the local schools chat electronically with teachers and other mirror world visitors

plant software agents to report back on interesting topics decide to run for the local school board hire a campaign manager and conduct the better part of the campaign itself all by interacting with the mirror world gelernter doesn't just speculate about how this amazing new software will be used he shows us how it will be made explaining carefully and in detail how to build a mirror world using technology already available we learn about disembodied machines trellises ensembles and other computer components which sound obscure but which gelernter explains using familiar metaphors and terms he tells us that a mirror world is a microcosm just like a japanese garden or a gothic cathedral and that a computer program is translated by the computer in the same way a symphony is translated by a violinist into music mirror worlds offers a lucid and humanistic account of the coming software revolution told by a computer scientist at the cutting edge of his field

intriguing tale of mystery adventure and courage early readers have sometimes had nightmares but yet the king of trash is ultimately redeemed by its heart it begins with a newspaper reporter setting out to interview a former school mate who s now become one of the world greatest scientists and one of its richest men before long though we are enmeshed in a web of awful and expedient facts building to a twenty first century morality tale in which no one can escape the hard and bitter decisions of the real world and yet at the end we learn is the one central truth the only remnant left to sustain willerton s fascinating and vivid characters and all the rest of us alive on earth as well

## **Beyond Worship 2022-10-20**

beyond worship started as a digital zine published fort washington collegiate church s website with only a few contributors under the direction of minister james admans they them and funded by the calvin institute of christian worship the zine beyond worship sought to collect any written material by lgbtqia authors that could be shared in a worship space the goal was to not only demonstrate that lgbtqia members of the church are accepted but part of the community and have something to contribute when publisher lori perkins a member of fort washington read the zine she was immediately inspired to expand upon the idea of belonging in a community not just to lgbtqia members of fort washington but any lgbtqia person
