mallon has written a book that will be a valuable resource to parents as well as professionals working with children she has provided an excellent book list for children on the subject of sleep and dreams and there is a very comprehensive bibliography i would recommend this book both for the subject material and the manner in which it is presented rostrum this is an enjoyable read by an author who has already written widely about children and grief helping children manage loss although the book is not directly about bereavement it will be most helpful to parents who are trying to help children disturbed by their dreams and it includes many wonderful quotations from youngsters on the subject such as they are pictures in my pillow and we dream to rewind our memory the great strength of this book however is that the author gives adults many practical and useful ways for helping children when troubled she is clear that dreams are real powerful and a part of our lives whether we remember them or not we can support our children by paying attention to their dreams and not dismissing them or brushing them aside because they are uncomfortable the compassionate friends newsletter uk an excellent book to help adults understand the fears and insecurities that can cause children to dream brenda mallon prominent in the field of dream research for more than 20 years hopes her book will enable those who care for and work with children to realise that children s deepest anxieties signal to us through dreams there are chapters on nightmare taming and the impact of illness as well as ideas on how to set up a dream sharing group this is a helpful way to let children talk about their dreams and understand why they have them the teacher dream time with children is short easy and fun to read with enough introductory information that any parent even a complete novice could use it to begin dream sharing with children at the same time the most experienced dream worker will find much of interest here a wonderful introduction to the world of children s dreams richard a russo dream time the magazine of the association for the study of dreams a fascinating and readable book using vivid examples brenda mallon explains how and why children dream and makes connections with universal dream themes and symbols she subscribes to jung s theory of multiple layers in dreams practical guidance is given on how to help children express their dreams individually or in a group she analyses harry potter s dark dreams alerting us to the signals being sent out by nightmares which can denote fear of separation abandonment or attack but she ends by reminding us how uplifting and creative dreaming can be community care children may not understand where their dreams come from especially when they experience terrifying nightmares that stop them being able to sleep and frighten them when they are awake what can an adult do to help them

world today scientist believe you cannot exceed the speed of light or
traverse vast distances between the stars in a single life time if
technology advances exponentially as it had in the past 150 years what
laws of scientific status quo will be broken in another 150 years from
today keep in mind how much more advanced today s fighter planes are
to the kitty hawk a primitive machine the wright brother s built for one of
the first flights at kill devil hills in 1903 just 106 years ago taken farther
what advances will invalidate technological laws of today in a thousand
years from now what of ten thousand years beyond even that time or a
million years if humans still exist ten million years from today would their
level of evolvment and technology be understood or even recognized by
those who came before them why not apply this paradigm to some other
evolved planetary civilization with a similar history somewhere in the
cosmos millions or billions of years ago what would be their capabilities
and philosophies to whom would they have become as gods van m lake
