when the first edition of urban wildlife management was published two years ago it provided conservationists ecologists and wildlife professionals with a welcome shift in the way that interactions between humans and wildlife were viewed and managed instead of focusing on ways to evict or eradicate wildlife encroached on by urban development this unique work took a holistic ecosystems approach gathering information from more than five hundred academic sources and the popular media this book educated us on the complete nature of the problem see what s new in the second edition new information garnered from secondary data sets added contributions from an extended list of leading wildlife specialists original research conducted by the authors and their students new chapters on urban soils urban waters and zoonotic diseases more perspective essays and case studies single species profiles in each chapter that focus on management issues numerous tables examining trends by species and by region through discussions of past and present approaches in the united states the book explores the changing landscape of wildlife management and future approaches urban habitats and hazards are defined in terms of green and gray spaces sociopolitical issues are discussed in terms of wildlife management stakeholder responsibilities and legal considerations and wildlife are viewed as adaptive inhabitants of an evolving ecosystem rather than as interlopers in a humans only world the author maintains a blog exploring wildlife in our own backyard good qualitative research can help sport management researchers and industry professionals solve difficult problems and better understand their organisations stakeholders and performance now in a fully revised and extended new edition this book is a user friendly introduction to qualitative methods in sport management covering the full research process from research planning to reporting results this edition includes expanded coverage of cutting edge areas including digital and social media research critical realism and social network analysis the book examines the reflective and interrogative processes required for developing effective qualitative research questions and includes a deeper discussion of ontology and epistemology in the light of today s rapidly changing society it takes the reader step by step through essential and emerging qualitative methods from actor network theory and ethnography to computer assisted data analysis and sampling typologies every chapter includes examples of real qualitative research including shorter research briefs and extended case studies reflecting the exciting qualitative research that is currently occurring in sport business and management and highlighting the links between research and sport management practice this is essential reading for courses in sport management sport business sport policy sport marketing sport media and communications it provides students researchers and practitioners with the knowledge and skills to undertake qualitative research while deepening their understanding of how the social world can be perceived and interpreted through a particular theoretical lens useful online materials include recommended readings and powerpoint slides nematodes represent a unique challenge to agricultural research in that they combine the potential for serious reductions in growth and yield in a wide range of crop plants often with rather non specific and easily mis diagnosed symptoms development of the concept of pest management and their implementation have led to a greater appreciation of the need for a wide range of tactics for nematode control the present book nematode management in plants provides an authoritative review of many aspects of nematode control and progress in the field of nematode management programme the volume contains eighteen articles covering application of cropping sequences plant products and botanicals latex bioagents and biological control practices for the management of nematode pests topics covering use of azotobacter bacillus thuringiensis and vam fungi for reducing nematode pests have been specially included to project their role in the present century information on integrated nematode management have been included with special emphasis on biocontrol management practices this book will be useful to plant pathologist nematologist research and extension workers teachers and students written by an expert author team this engaging textbook builds upon the traditional frameworks of brand strategy to analyse the emotional and cultural impact real world brands have on contemporary consumers research methods courses have become a compulsory component of most degree programs in sport management this is the first introductory research methods textbook to focus exclusively on sport management through the use of examples cases and data taken from the real world of sport management it opens up a traditionally dry area of study helping the student to understand the vital importance of sound methodology in their studies and subsequent professional practice the book covers the full range of quantitative and qualitative methods across the whole span of the research process from research design and the literature review to data analysis and report writing every chapter contains a range of useful features to aid student learning including summaries discussion questions and guides to further resources as well as examples drawn from contemporary sport around the world research methods for sport management is an essential course text for all sport management students and an invaluable reference for any sport management professional involved in operational research contains evaluations and analyses of programs and management at federal departments and agencies this book examines the effectiveness of corporate takeovers the dominant ideologies of corporate takeovers include synergistic gains and its managerial disciplinary role these

dominant themes are being undermined by the challenges of costly acquisitions the uk takeover code is a regulatory response to the role of managers of target companies only also the regulatory framework for takeovers in the united states is largely focused on target companies the book demonstrates that managements can influence the role of takeovers thereby undermining its synergistic and disciplinary values presenting an identification and evaluation of the limits of current regulatory and judicial control over the role of management during takeovers in the uk and the us delaware it will identify the relevance of institutional control as an effective mechanism for addressing the challenges of managerial influence over takeover functions it will also identify how the role of managements can be addressed with the complementary benefit to shareholder and employee interests thereby challenging the shareholder stakeholder primacy debate in corporate law particularly in relation to takeovers this book will be essential reading for scholars and students interested in the market for corporate control corporate law and company law a comprehensive guide to effective hardwood forest management extending 235 000 square miles from new york to georgia and from virginia to missouri the central hardwoods region harbors the most extensive concentration of deciduous hardwoods in the world as harvests in the pacific northwest decline and timber prices rise the maturing stands of mixed species in this central u s region are a rich and valuable resource that is increasingly vulnerable to exploitation this timely book examines all of the key ecological social and economic management considerations essential to utilize and sustain these vital woodlands effectively first it develops the background necessary to understand what makes the hardwood eco system function with a thorough examination of the physiography geology soils and climate of the region and a historical overview of its evolution and development from pre european settlement to the present then species by species the book details the silvical characteristics of 34 important tree species next it offers expert recommendations for effective forest treatment and management from specific concerns such as timber production pollution and financial planning to broader issues including the role of the natural resource manager and the biological potential of the entire region generously supplemented with graphs and photos ecology and management of central hardwood forests is important reading for foresters natural resource managers regional planners environmental scientists governmental officials everyone with a stake in the future of this critical living resource clinically focused text discusses diagnosis timing of treatment initiation and treatment regimen options detailed tables on neurologic disorders are provided to assist in differential diagnoses guidance is provided on how to best manage initial occurrence of ms and relapses with case study examples treatment of symptoms and medical problems that often accompany ms is discussed along with prognostic indications high quality seed is essential for healthy crops and greater agricultural productivity at the same time advances in breeding technology require equivalent advances in seed technology in order to ensure food security it is crucial to develop seeds that are high yielding and resistant to drought heat cold and insects gathering the latest research in seed sciences the book includes contributions on seed production in crops such as legumes sugar rice wheat and other cereals it discusses a range of topics like the effect of climate change on seed quality production and storage seed rouging seed certification for different crop species seed biology and seed pathologies and their effective management integrating basic and applied research this compendium provides valuable insights for researchers and students in agricultural and life sciences professionals involved in seed certification and those working in quarantine laboratories as well as plant pathologists this offers stimulating and profitable reading for both existing drucker disciples and those new to his writing this collection of thirty five finely balanced articles and essays plus an interview and afterword has variations on one unifying theme the challenges of tomorrow that face the executive today an academically focused collection of papers highlighting the successes and challenges of a move from disaster to risk management in responding to drought the book passes on the experiences gained from australia s trail blazing new policy introduced in 1992 this manual is the ultimate guide to pest management for strawberries whether you re a commercial grower or a home gardener this manual is for you using this manual you ll learn how to prevent and diagnose causes of damage identify pests and key natural enemies establish an ipm program for your field manage problems related to irrigation nutrition and the growing environment and determine when direct control actions are necessary this revised manual also includes chapters on strawberry transplant production and managing pests in home garden strawberries volume 2 of this 4 volume set tackles the problems presented by diseases in vegetable crops that can reduce yield and quality the effective management of plant diseases involves a detailed study of the disease symptoms causal agents disease cycles and epidemiology written by nationally known scientists in their respective fields the chapters incorporate the experience and knowledge of the authors the chapters provide an introduction along with plant disease symptoms causal organisms disease cycles epidemiology and effective management solutions for diseases of economically important vegetables some of the vegetables addressed include brinjal or eggplant chili cole crops such as broccoli brussels sprouts cabbage cauliflower collards kale and kohlrabi cucurbits gourds garlic green peas potatoes and more the volumes provide an abundance of information for understanding and managing plant diseases with emphasis on diagnostic techniques the collection includes volume 1 fruit crops volume 2 vegetable crops volume 3 ornamental plants and spice crops volume 4 important plantation crops medicinal crops and mushrooms this book provides the practicing physician with a practical approach to the diagnosis evaluation and management of headache disorders

based on lessons learned from real life headache patients internationally well known headache experts present cases from their own practice and discuss the evaluation and management of each case step by step the clearly structured chapters cover initial evaluation and diagnostic work up imaging differential diagnosis interpretation of findings of further work up treatment options and response and key points a wide spectrum of headache types is covered including both primary and secondary headache disorders the reader will learn how to diagnose and manage different headache disorders directly from the clinical experience of experts case based diagnosis and management of headache disorders will be of value for neurologists and a wide range of physicians from those in other specialties to primary care gives the government budget should be the financial mirror of society s choices yet most people view budgeting as the epitome of eye glazing subjects rarely explained in a way that is understandable to the non specialist and too often presented without adequate consideration of a country s governance and institutional capacity government budgeting and expenditure management fills a gap in the literature to redress these failings and does so in comparative international perspective this book provides a comprehensive but pithy and easy to understand treatment of public financial management taking into account a variety of special issues including budgeting in post conflict situations at subnational government levels for military security expenditures and in countries with large extractive revenues distilling the lessons of budgeting reform in countries at different levels of income and administrative capacity each chapter gradually progresses from the basic principles to the more technical aspects and then on to implementation issues using concrete examples and illustrations from around the globe government budgeting and expenditure management is ideally suited as the primary text for advanced undergraduate or graduate courses in government budgeting or public financial management or as a supplementary text for courses in public finance public economics economic development public administration or comparative politics with its attention to practical implementation aspects the book will also be of direct interest to practitioners policy makers and government employee training organizations the theory of symbolic management reveals a pervasive pattern of symbolic decoupling a separation between appearances and reality at every level of the governance system at each level the processes of governance are less efficient or effective than they appear from interpersonal relations within organizations such as those between ceos and directors top managers and lower level employees to relations between firm leaders and external stakeholders such as journalists and security analysts there is even a separation between appearances and reality at the level of the governance system itself in this book james westphal and sun hyun park develop symbolic management into a major theoretical perspective on governance not only does symbolic management provide a compelling behavioral alternative to economic perspectives such as agency theory but it subsumes economic theory agency theory is reconceived as a historically contingent institutional logic that became taken for granted among corporate stakeholders for a period of time and eventually replaced by a new logic of governance through a body of extensive empirical research westphal and park demonstrate how the symbolic management activities of firm leaders have contributed to this historical shift in prevailing logics of governance and present a warning to regulators investors and the general public bryant white steven a williams kyle d johnson oklahoma department of wildlife conservation journal of wildlife management this up to date reference on the nutrition management of inherited metabolic diseases imd covers a wide range of these disorders including phenylketonuria and other aminoacidopathies organic acidemias urea cycle disorders fatty acid oxidation disorders galactosemia and glycogen storage diseases guidance is also provided on laboratory evaluations and biochemical testing and monitoring topics such as newborn screening for imd as well as nutrition management during pregnancy and transplantation are addressed the book is based on 7 years of lectures delivered through metabolic university an interactive didactic program designed to provide training to dietitians who work with individuals with imd this book provides the basic information required to manage nutrition care and is a resource for clinicians new to this complex field this book provides an overall introduction to the medical management of dementia with chapters dedicated to specific topics such as pain epilepsy vascular risk factors in dementia and review of medication which are often not addressed in books on the subject and thereby filling a gap in the field chapters are supplemented with cases to highlight key concepts and treatment approaches and to provide the reader with the possibility to reflect on management options and the readers own current practice this book is aimed at clinicians of different specialties mainly neurology psychiatry geriatric medicine and general practice family medicine who manage patients with dementia on a regular basis and thus provides useful guidance to be used in the clinic
