the purpose of this book is to give a coherent account of the different perspectives on science and technology that are normally studied under various disciplinary heads such as philosophy of science sociology of science and science policy it is intended for students embarking on courses in these subjects and assumes no special knowledge of any science it is written in a

direct and simple style and technical language is introduced very sparingly as various perspectives are sketched out in this book the reader moves towards a consistent conception of contemporary science as a rapidly changing social institution that has already grown out of its traditional forms and plays a central role in society at large it will appeal to students in a wide range of scientific disciplines and complement well professor ziman s earlier books

An Introduction to Science Studies
