european communism the recent and ongoing international economic collapse and the devastating blow to catholic credibility in the public sphere represented by the widespread and senior coverup of clergy child sex abuse interdisciplinary in nature the essays seek to reground theological thinking in a fresh way to draw out traditions that have been lost in the midst of political and cultural struggle and to focus on specific instances of social need in doing this they tease out emerging tensions between ecclesiastical rhetoric and the church s institutional capacity and skills to match words to deeds the essays also reflect on specific instances of public engagement and theology which have both helped and hindered advocacy for a common good hopeful in tone the collection is mission centred comprising contributions from those who are leading figures in all of their fields catholic social conscience will be of particular interest to all christians who have believed that the catholic social teaching tradition up to now had something to offer the christian community as a whole by way of resources to navigate the call to civic and social action it will appeal to catholic parish council members charity workers activists catechists religious seminarians and academics indeed it should inspire those seeking to reflect on the future of catholic social thought and action in an era when the traction of the social encyclical tradition in the face of economic crisis and the legitimacy of the church s frontline figures in the aftermath of the abuse crisis has never been more being an important part of keeping this knowledge alive and relevant how we teach ethics has been an ambiguous instructional area for many years in religious schools it is left to the work of the religion teacher and in public schools it is often incorporated into a civics course across the curriculum there are multiple points at which we can incorporate the study of ethics in interdisciplinary ways in this volume we will focus on how educators in high schools grades 9 12 can incorporate the teaching of ethics effectively across all disciplines sciences humanities arts math and technology the introduction of the book will be a foundational description of ethics what it means to study ethics and to be an ethical person in 1830 the dominant social outlook of the early victorians was a paternalism that looked to property the church and local justices of the peace to govern society and deal with its ills by 1860 however the dominant social outlook had become a vision of a laissez faire society that relied on economic laws self reliance and the vigorous philanthropy of voluntary societies this book describes and analyzes these changes which arose from the rapid growth of industry towns population

and the middle and working classes paternalism did not entirely fade away however just as a laissez faire vision had long antedated 1830 both were part of a social conscience also defined by a revived philanthropy a new humanitarianism and a grudging acceptance of an expanded government all of which reflected a strong revival of religion as well as the growth of rationalism the new dominance of a laissez faire vision was dramatically evident in the triumph of political economy by 1860 only a few doubted the eternal verities of the economists voluminous writings few also doubted the verities of those who preached self reliance who supported the new poor law s severity to persons who were not self reliant and who inspired education measures to promote that indispensable virtue if economic laws and self reliance failed to prevent distress the philanthropists and voluntary societies would step in such a vision proved far more buoyant and effective than a paternalism whose narrow and rural anglican base made it unable to cope with the downside of an industrial urban britain but the vision of a laissez faire society was not without its flaws its harmonious economic laws and its hope in self reliance did not prevent gross exploitation and acute distress and however beneficent were its philanthropists they fell far short of mitigating these evils this vision also found a rival in an expanded government two powerful ideas the idea of a paternal government and the idea of a utilitarian state helped create the expansion of government services a reluctant belief in governmental power thus joined the many other ideas that defined the victorian s social conscience authorities pages 361 372 these volumes make new contributions to the history of psychiatry and society in three ways first they propose a theory of values and ideology influencing the evolution of psychiatry and society in recurring cycles and survey the history of psychiatry in recent centuries in light of this theory second they review the waxing prominence and waning of community mental health as an example of a segment of this cyclical history of psychiatry third they provide the first biography of erich lindemann one of the founders of social and community psychiatry and explore the interaction of the prominent contributor with the historical environment and the influence this has on both we return to the issue of values and ideologies as influences on psychiatry whether or not it is accepted as professionally proper this is intended to stimulate self reflection and the acceptance of the values sources of ideology their effect on professional practice and the effect of values based ideology on the community in which psychiatry practices the books will be of interest to psychiatric teachers and practitioners health planners and socially responsible citizens excerpt from social conscience or homocracy versus monocracy in story verse and essay the reading of this book may well be commenced in the middle or toward the end as its several parts are separate compositions they were written at various intervals and present different topics in divers keys and forms hence each part so to speak craves for a hearing or a reading of its own unity in the work however is not entirely lacking there are connecting strains throughout close twilled cord and loose flying tassel of ideas and ideals all running into one pattern even as all sprung from the selfsame social conscience this accounts for the primary title of the volume the secondary title is clearly postulated in part six and part eight but for reasons already stated it is not necessary to read these first esteemed reader you may safely and justly turn to the division which by its superscription mould or subject matter
