sixteen papers by foremost american canadian and english historical geographers examine the sources of imagery of the american and canadian great plains the processes of image formation and the behavioral implications of various kinds of images the papers deal with exploratory images of the plains resource evaluation in the prefrontier west governmental appraisal of the western frontier real and imagined climatic hazards the desert and garden myths and adaptations to reality

## **American Aviation 1946**

the extent of available pre judgment asset preservation relief is widely regarded as a unique characteristic of english law and one of the key factors attracting international commercial litigation to the english courts by taking a novel view of the theoretical foundations of a freezing injunction this book challenges the long established view that such an injunction is an in personam form of relief whose sole purpose is to prevent unscrupulous defendants from making themselves judgment proof dr Šaranović combines historical and comparative perspectives to identify several theoretical flaws in the court s jurisdiction to grant this popular form of interim relief the book demonstrates that the current application of private international law rules in this field leads to inequality among litigants and illegitimate encroachment upon the sovereignty of foreign states it proposes a range of possible solutions to alleviate concerns about the scope of freezing injunctions both in the domestic and international arena

## **The SAS Encyclopedia 1996**

predictions about where different species are where they are not and how they move across a landscape or respond to human activities if timber is harvested for instance or stream flow altered are important aspects of the work of wildlife biologists land managers and the agencies and policymakers that govern natural resources despite the increased use and importance of model predictions these predictions are seldom tested and have unknown levels of accuracy predicting species occurrences addresses those concerns highlighting for managers and researchers the strengths and weaknesses of current approaches as well as the magnitude of the research required to improve or test predictions of currently used models the book is an outgrowth of an international symposium held in october 1999 that brought together scientists and researchers at the forefront of efforts to process information about species at different spatial and temporal scales it is a comprehensive reference that offers an exhaustive treatment of the subject with 65 chapters by leading experts from around the world that review the history of the theory and practice of modeling and present a standard terminology examine temporal and spatial scales in terms of their influence on patterns and processes of species distribution offer detailed discussions of state of the art modeling tools and descriptions of methods for assessing model accuracy discuss how to predict species presence and abundance present examples of how spatially explicit data on demographics can provide important information for managers an introductory chapter by michael a houston examines the ecological context in which predictions of species occurrences are made and a concluding chapter by john a wiens offers an insightful review and synthesis of the topics examined along with guidance for future directions and cautions regarding misuse of models other contributors include michael p austin barry r noon alan h fielding michael goodchild brian a maurer john t rotenberry paul angermeier pierre r vernier and more than a hundred others predicting species occurrences offers important new information about many of the topics raised in the seminal volume wildlife 2000 university of wisconsin press 1986 and will be the standard reference on this subject for years to come its state of the art assessment will play a key role in guiding the continued development and application of tools for making accurate predictions and is an indispensable volume for anyone engaged in species management or conservation
