challenge white notions of second class citizenry a newly minted west point lieutenant in 1876 he requested posting to george armstrong custer s 7th cavalry just days after the general s death at the battle of the little bighorn he accompanied the brother of general philip sheridan to recover the remains of custer and the other officers from the battlefield at the little bighorn in 1877 he met and befriended most of the important plains indians as well as figures like buffalo bill cody general phil sheridan frederick remington and others he met the idol of the 7th cavalry captain frederick benteen modeled his own style of command after benteen and remained friends with him until the latter s death fluent in indian sign language a true friend to native americans probably no white man of his time was better at communicating with and gaining the trust of the tribes with which he worked than hugh lenox scott during his time in the west he more than once turned down assignments to more desirable posts to remain working with the tribes of his fellow white citizens he wrote there is an inborn racial fear of the indian in our minds due to our ignorance of his thought enhanced by the the ideas that animate nationalism influence whether it causes or calms conflict with nationalism on the rise around the world many worry that nationalistic attitudes could lead to a surge in deadly conflict to combat this trend federations like the european union have tried to build inclusive regional identities to overcome nationalist distrust and inspire international cooperation yet not all nationalisms are alike nationalisms in international politics draws on insights from psychology to explore when nationalist commitments promote conflict and when they foster cooperation challenging the received wisdom about nationalism and military aggression kathleen powers differentiates nationalisms built on unity from those built on equality and explains how each of these norms give rise to distinct foreign policy attitudes combining innovative us experiments with fresh analyses of european mass and elite survey data she argues that unity encourages support for external conflict and undermines regional trust and cooperation whereas equality mitigates militarism and facilitates support for security cooperation nationalisms in international politics provides a rigorous and compelling look at how different forms of nationalism shape foreign policy attitudes and raises important questions about whether transnational identities increase support for cooperation or undermine opposition to the vietnam war was driven largely by college students and elite intellectuals while supposedly reactionary blue collar workers largely supported the war effort in hardhats hippies and hawks penny lewis challenges this collective memory of class polarization through close readings of archival documents popular culture and media accounts at the time she offers a more accurate counter memory of a diverse cross class opposition to the war in southeast asia that included the labor movement working class students soldiers and veterans and black power civil rights and chicano activists lewis investigates why the image of antiwar class division gained such traction at the time and has maintained such a hold on popular memory since identifying the primarily middle class culture of the early antiwar movement she traces how the class interests of its first organizers were reflected in its subsequent forms the founding narratives of class based political behavior lewis shows were amplified in the late 1960s and early 1970s because the working class in particular lacked a voice in the public sphere a problem that only increased in the subsequent period even as working class opposition to

analyzing moments in which history is re presented in commemorative events documentary films museum design and educational programming geoffrey m white shows that the memorial to the pearl harbor bombing is not a fixed or singular institution rather it has become a site in which many histories are performed validated and challenged in addition to valorizing military service and sacrifice the memorial has become a place where japanese veterans have come to seek recognition and reconciliation where japanese americans have sought to correct narratives of racial mistrust and where native hawaiians have challenged their ongoing erasure from their own land drawing on extended ethnographic fieldwork white maps these struggles onto larger controversies about public history museum practices and national memory in the 1960s geoffrey grigson travelled around england writing the story of the secret landscape that is all around us if only we take the time to look and see the result is a book that will take you on an imaginative journey revealing hidden stories unexpected places and strange phenomena from green men ice scratches cross legged knights and weathercocks to rainbows clouds and stars from place names and poets to mazes dene holes and sham ruins via avenues dewponds and village greens the shell country alphabet will help you discover the world that remains just off the motorway geoffrey grigson resurrected the minor the provincial and the parochial he was an erudite and unrivalled topographer ardent in promoting informed awareness of the distinctiveness of place toby barnard an anthologist of genius p j kavanagh the genesis of israel and egypt examines the earliest phase of historical consciousness in the ancient near east looking in particular at the mysterious origins of egypt s civilization and its links with mesopotamia and the early hebrews the book takes a radically alternative view of the rise of high civilization in the near east and the forces which propelled it the author emmet sweeney finds that the early civilizations developed amidst a background of massive and repeated natural catastrophes events which had a profound effect upon the ancient peoples and left its mark upon their myths legends customs and religions ideas found in all corners of the globe concepts such as dragon worship pyramid building and human sacrifice are shown by sweeney to have a common origin in the cataclysmic events of the period termed the eruptive age by legendary english explorer percy fawcett terrified and traumatized by the forces of nature people all over the world began to keep an obsessive watch on the heavens and to offer blood sacrifices to the angry sky gods these events which are fundamental to any understanding of the first literate cultures have nonetheless been completely effaced from the history books and an official history of mankind which is little more than an elaborate fiction now graces the bookshelves of the world s great libraries starting with clues unearthed by history sleuth immanuel velikovsky and others emmet sweeney takes the investigation further while the near eastern civilizations are generally considered to have taken shape around 3300 bc about 2 000 years before those of china and the new world ages in alignment demonstrates that they had no 2 000 year head start all the ancient civilizations arose simultaneously around 1300 bc in the wake of a terrible natural catastrophe recalled in legend as the flood or deluge sweeney points out that the presently accepted chronology of egypt is not based on science but on

venerated literary tradition this chronology had already been established in its present form by the third century bc when jewish historians utilizing the history of egypt by the hellenistic author manetho sought to tie in egypt s history with that of the bible apparent gaps and weird repetitions resulted improbable feats like the construction of major cut stone engineering projects before the advent of steel tools or pythagorean geometry point to the weaknesses of the traditional view taking a more rigorous approach and pointing to solid evidence emmet sweeney shows where names overlap and where one and the same group is mistaken for different peoples in different times volume 1 the genesis of israel and egypt looks at the archaeological evidence for the flood evidence now misinterpreted and ignored this volume examines the rise of the first literate cultures in the wake of the catastrophe and goes on to trace the story of the great migration which led groups of early mesopotamians westward toward egypt where they helped to establish egyptian civilization this migration recalled in the biblical story of abraham provides the first link between egyptian and hebrew histories the next link comes a few generations later with imhotep the great seer who solved the crisis of a seven year famine by interpreting pharaoh djoser s dream imhotep is shown to be the same person as joseph son of jacob why mexico matters to canada now more than ever and how we can leverage our strategic relationship the unfinished business of the civil rights movement failure of america s public schools to properly educate its african american student populations by frank simpkins the unfinished business of the civil rights movement failure of america s public schools to properly educate its african american student population vividly describes the current crisis of america s inability to properly educate its african american students many of the details and cited statistics indicate alarming illiteracy rates and high dropout rates for disadvantaged black and latino students across the country these rates stand in sharp contrast to those of their white peers and the black white academic achievement gap continues to widen the author mentions other problems that afflict the black community including the horrendous incarceration rates of young black males the shocking rates of black abortions and the precarious and implosive condition of the black family in america he contends that the core of these problems lay with america s failure to properly educate its black students these alarming figures are more than just statistics they have widespread consequences upon american society the author highlights a proven and scientifically tested dialect reading program that showed promising results for black functionally illiterate inner city students in grades 7 12 he urges that a second civil rights movement is needed to gain equal quality educational opportunities for all of america s children we cannot deny these rights to some children without disparaging all children and the nation about the author frank simpkins co authored the book between the rhetoric and reality with his brother gary simpkins he has served a number of years in the k 12 system and as director of educational opportunities programs and services at barstow community college district a world list of books in the english language the hour of our nation s agony offers a revealing look into the life of a confederate soldier as he is transformed by the war through these literate perceptive and illuminating letters readers can trace it william cowper nelson s evolution from an idealistic young soldier to a battle hardened veteran nelson joined the army at the age of nineteen leaving behind a close knit family in holly springs mississippi he served for much of the war in the third corps of robert e lee s army of northern virginia by the end of the conflict nelson had survived many major battles including fredericksburg chancellorsville gettysburg and the wilderness as well as the long siege of petersburg in his correspondence nelson discusses in detail the soldier s life religion in the ranks his love for and heartbreak at being separated from his family and southern identity readers will find his reflections on slavery religion and the confederacy particularly revealing seeing and participating in the slaughter of other human beings overpowered nelson s romantic idealism he had long imagined war as a noble struggle of valor selflessness and glory but the sight of wounded men with blood streaming from their wounds dying slow lonely deaths showed nelson the true nature of war nelson s letters reveal the conflicting emotions that haunted many soldiers despite his bitter hatred of the ruthless invaders of our beloved south the sight of wounded union prisoners moved him to compassion nelson s ability to write about irreconcilable moments when he felt both kindness and cruelty toward the enemy with introspection candor and sensitivity makes the hour of our nation s agony more than just a collection of missives jennifer ford places nelson squarely in the middle of the historiographic debate over the degree of disillusionment felt by civil war soldiers arguing that nelson like many soldiers was a complex individual who does not fit neatly into one interpretation jennifer w ford is head of special collections and associate professor at the j d williams library at the university of mississippi where the where the collection containing it nelson s letters and other family documents is held

the genesis of israel and egypt examines the earliest phase of historical consciousness in the ancient near east looking in particular at the mysterious origins of egypt s civilization and its links with mesopotamia and the early hebrews the book takes a radically alternative view of the rise of high civilization in the near east and the forces which propelled it the author emmet sweeney finds that the early civilizations developed amidst a background of massive and repeated natural catastrophes events which had a profound effect upon the ancient peoples and left its mark upon their myths legends customs and religions ideas found in all corners of the globe concepts such as dragon worship pyramid building and human sacrifice are shown by sweeney to have a

common origin in the cataclysmic events of the period termed the eruptive age by legendary english explorer percy fawcett terrified and traumatized by the forces of nature people all over the world began to keep an obsessive watch on the heavens and to offer blood sacrifices to the angry sky gods these events which are fundamental to any understanding of the first literate cultures have nonetheless been completely effaced from the history books and an official history of mankind which is little more than an elaborate fiction now graces the bookshelves of the world s great libraries starting with clues unearthed by history sleuth immanuel velikovsky and others emmet sweeney takes the investigation further while the near eastern civilizations are generally considered to have taken shape around 3300 bc about 2 000 years before those of china and the new world ages in alignment demonstrates that they had no 2 000 year head start all the ancient civilizations arose simultaneously around 1300 bc in the wake of a terrible natural catastrophe recalled in legend as the flood or deluge sweeney points out that the presently accepted chronology of egypt is not based on science but on venerated literary tradition this chronology had already been established in its present form by the third century bc when jewish historians utilizing the history of egypt by the hellenistic author manetho sought to tie in egypt s history with that of the bible apparent gaps and weird repetitions resulted improbable feats like the construction of major cut stone engineering projects before the advent of steel tools or pythagorean geometry point to the weaknesses of the traditional view taking a more rigorous approach and pointing to solid evidence emmet sweeney shows where names overlap and where one and the same group is mistaken for different peoples in different times volume 1 the genesis of israel and egypt looks at the archaeological evidence for the flood evidence now misinterpreted and ignored this volume examines the rise of the first literate cultures in the wake of the catastrophe and goes on to trace the story of the great migration which led groups of early mesopotamians westward toward egypt where they helped to establish egyptian civilization this migration recalled in the biblical story of abraham provides the first link between egyptian and hebrew histories the next link comes a few generations later with imhotep the great seer who solved the crisis of a seven year famine by interpreting pharaoh djoser s dream imhotep is shown to be the same person as joseph son of jacob
