introduction a life of healing a life of health a life worth living is a life of wealth i have practiced over 25 years as a chiropractor and i have learned that most people come to me to treat their pain i m sure that most doctors and therapists have the same experience people want to receive a treatment that will cure their illness as i treat my patients i m also analyzing how their problem was created i m looking at various factors like diet lack of exercise injurious repetitive movements or anything else that could provoke the problem i m trying to get the patient to take responsibility for their problem and help me with their treatment it appears that i m treating their physical illness but over the years i have come to a new realization that a person s emotional mental and spiritual side can also affect their health the reality of the situation is that we can t separate an illness into a physical emotional mental or spiritual ailment because everything works together i now understand that attitudes play an essential role in our health and wellbeing attitudes have characteristics that are physical emotional mental and spiritual in psychology attitudes are labeled as behavioral physical affective emotional and cognitive mental in this book attitudes have a spiritual side as well attitudes will have a positive spiritual value or a negative spiritual value attitudes that bring people together and unite them has an energy with a positive spiritual value and attitudes that are divisive and cause separation has a negative value if we have attitudes with a negative spiritual energy then they will cause illness physical illness mental illness and emotional illness we need to adopt attitudes with a positive spiritual energy if we want to stay healthy and grow spiritually spiritual growth is there for all of us but we have to make the effort no one can make us grow spiritually looking for someone to cure our ills is a short term proposition the long term cure is when we discover what is causing us harm and create a healthy lifestyle the 7 laws of human nature is a scientific philosophical study into the human consciousness the 7 chakras and the human aura we use theories to make sense about what we are observing in life to explain ideas and interpret facts the 1st chapter is the theory of the oneness of universal love which will present 7 hypotheses these hypotheses will present facts and suppositions of facts which will be followed up by a theory this is all happening on four energy levels physical emotional mental and spiritual life on earth has to have a reason our lives aren t an accident and this book presents a logical theory on the how and why of life this is a book on love and how love works in our lives with love and devotion to all

according to leo tolstoy s famous statement all happy families are alike each unhappy family is unhappy in its own way knud larsen in his book on human happines proves the opposite summarizing the classical and recent research in successful human adaptation adjustment and well being of the soul and body he shows the many faces of individual human happiness moreover the book opens the perspective into the directions of social cultural and biological evolution what i like most in the book is its usefulness knud has many practical pieces of advice suggesting that we can improve our well being if we try i wish anna karenina had read this well conceived well written text gyorgy csepele professor of social psychology chair of the interdisciplinary social research program of the doctoral school of the faculty of social science at elte senior research fellow of the institute of advanced studies at

Köszeg asks this unique reader friendly volume covers psychological aspects of successful living with such diversity and depth that I have not encountered hitherto it is essential reading for psychology undergraduates as well as more seasoned academics and practitioners. Howie Giles distinguished professor communication university of California Santa Barbara USA honorary professor of psychology university of Queensland Australia this book by Professor Larsen is very enjoyable reading and covers the many challenges humans face across the lifespan the focus is on positive psychology as supportive solutions are offered for the many challenges of living this is also a relatively rare book that evaluates adaptation from a socio cultural perspective since most books today emphasize cognitive aspects of coping and development I especially appreciated how Professor Larsen weaved his salient knowledge of cross cultural psychology into this important work on human adaptation in the book the author discusses the issue of adaptation in its varying aspects of human life and through the prism of cultural influence on personality and behavior. Askar Jumageldinov PhD assistant professor at Catholic University in Lyon this book uniquely ties together the author's personal experiences with in depth research on human adaptation what strikes the reader is the very personal narrative that illustrates the many points of struggling with the challenges of being human the book combines the best of classical literature along with very current and meaningful research the whole human journey is evaluated from identity and finding meaning through optimizing health in midlife to facing the final existential questions related to both death and longevity a very thoughtful book. Sven Mørch PhD professor university of Copenhagen an enlightened and enlightening story of the challenges we meet through our life course although the general reader may find useful information to the journey of life it is also a volume packed with research based information from the psychological and social sciences with implications for how we can grow as human beings and live satisfying lives together. Reidar Ommundsen professor emeritus university of Oslo I have found the work of Knud Larsen to dovetail with my own work on behalf of indigenous and third world peoples since I first became acquainted with him in the context of supporting the people of Cuba Dr Larsen as manifest in this career capping work has the ability rare among non ethnologist academics to be engaged in the inner cognitive world of people inside other cultures while viewing their society in his own unique perspective this broad and deep treatment will deepen and broaden my own view of the peoples that I have engaged with on the cognitive level it also broadens my view of the challenges of my own life and how to live a happy life. christian apologist ben smith believes that the creation account in genesis 1 can be read literally and historically as a real week of seven normal days without contradicting modern astronomy and geology regarding the age of the universe and earth many christians are divided over how to reconcile genesis with modern science and this book evaluates all of the major options ultimately concluding that the bible allows for an old universe and earth in a way that is also scientifically accurate a former young earth creationist smith now believes that the age of creation is not specified in the bible and therefore scientists are free to answer the question he believes that christians should not hide from the controversy over the age of the earth but should take a fresh look at the text and be impressed with its accuracy
