politics women s rights and the civil rights movement by looking at the use of proverbial phrases mieder demonstrates how one traditional phrase can take on numerous expressive roles over time and how they continue to play a key role in our contemporary moment making the right choice unravels the entangled relationship between marriage morality and the desire for modernity as it plays out in the context of middle class status concerns and aspirations for upward social mobility within the sinhala buddhist community in urban sri lanka by focusing on individual life histories spanning three generations the book illuminates how narratives about a gendered self and narratives about modernity are mutually constituted and intrinsically tied to notions of agency the book uncovers how becoming modern in urban sri lanka rather than causing inter generational conflict is a collective aspiration realized through the efforts of bringing up educated and independent women capable of making right choices the consequence of this collective investment is a feminist conundrum agency does not denote the right to choose but the duty to make the right choice hence agency is experienced not as a sense of freedom but rather as a burden of responsibility the most important characteristics of human rights are enumerated in a clear and concise discussion that analyzes the problem of making human rights real not just hypothetical worldwide building on definitions of human rights used by the united nations and other international bodies and without being sidetracked by nettlesome discussions of specific troubling cases of rights abuses the author describes the main characteristics of the system of human rights he focuses on universality interdependence differences between types of rights absolute or limited rights the subjects of rights individuals or groups and the links between rights and the judicial system and between rights and democracy he then discusses some of the instruments we can use to promote respect for human rights the means by which we might make these rights real for a greater portion of humanity along the way he analyzes some of the related controversies regarding sovereignty versus international intervention globalization and questions of cultural imperialism as they bear upon human rights when do we have a right to impose rights or to defend ourselves from intervention this systematic discussion presents a complex and difficult topic in an understandable framework accessible to the general public and will stand as a useful foundation for readings of more specialized scientific legal and philosophical works where most human rights books for the nonspecialist focus on specific instances of rights abuses this work provides a more general approach focused on the logic in the system of human rights rights camera action offers professionals in the audiovisual industry guidance on how to use intellectual property protection to generate business opportunities the reader is taken through the different stages from securing finance to distribution to ensure a successful audiovisual production with practical advice and enriching case studies from developing countries rights camera action will help individual filmmakers and distributors monetize their creative content with the growing capabilities of artificial intelligence governments are integrating ai technologies into administrative and even judicial decision making aiding and in some cases even replacing human decision makers predictive policing automated benefits administration and automated risk assessment in criminal sentencing are but a few prominent examples of a general trend while the turn towards governmental automated decision making promises to reduce the impact of human biases and produce efficiency gains reducing the human element in governmental decision making also entails significant risks this book analyses these risks through a comparative constitutional law and human rights lens examining us law german law and international human rights law it also highlights the structural challenges that automation poses for legal systems built on the assumption of exclusively human decision making special attention is paid to the question whether existing law can adequately address the lack of transparency in governmental automated decision making its discriminatory processes and outcomes as well as its fundamental challenge to human agency building on that analysis it proposes a path towards securing the values of human dignity and agency at the heart of democratic societies and the rule of law in an increasingly automated world this book will be of interest to researchers and scholars focusing on the evolving relationship of law and technology as well as human rights scholars further it represents a valuable contribution to the debate on the regulation of artificial intelligence and the role human rights can play in that across a plethora of different academic disciplines despite this explosion of interest there is one group critical legal scholars that has devoted little if any attention to human dignity this book argues that these scholars should attend to human dignity a concept rich enough to support a whole range of progressive ambitions particularly in the field of international law it synthesizes certain liberal arguments about the good of self authorship with the critical legal philosophy of roberto unger and the capabilities approach to agency of amartya sen to formulate a unique conception of human dignity the author argues how human dignity flows from an individual s capacity for self authorship as defined by the set of expressive capabilities s he possesses and the book demonstrates how this conception can enrich our understanding of international human rights law by making the amplification of human dignity its fundamental orientation making human rights news balancing participation and professionalism explores the impact of new digital technology and activism on the production of human rights messages it is the first collection of studies to combine multidisciplinary approaches citizen witness challenges to journalism ethics and expert assessments of the liberating role of the internet addressing the following questions 1 what can scholars from a wide range of disciplines including communication studies journalism sociology political science and international relations studies add to traditional legal and political human rights discussions exploring the impact of innovative digital information technologies on the gathering and dissemination of human rights news 2 what questions about journalism ethics and professionalism arise as growing numbers of untrained citizen witnesses use modern mobile technology to document claims of human rights abuses 3 what are the limits of the liberating role of the internet in challenging traditional sources of authority and credibility such as professional journalists and human rights professionals 4 how do greater internet access and human rights activism interact with variations in press freedom and government censorship worldwide to promote respect for different categories of human rights such as women s rights and rights to health this book was originally published as a special issue of the journal of human rights it s a common complaint the united states is overrun by rules and procedures that shackle professional judgment have no valid purpose and serve only to appease courts and lawyers charles r epp argues however that few americans would want to return to an era without these legalistic policies which in the 1970s helped bring recalcitrant bureaucracies into line with a growing national commitment to civil rights and individual dignity focusing on three disparate policy areas workplace sexual harassment playground safety and police brutality in both the united states and the united kingdom epp explains how activists and professionals used legal liability lawsuit generated publicity and innovative managerial ideas to pursue the implementation of new rights together these strategies resulted in frameworks designed to make institutions accountable through intricate rules employee training and managerial oversight explaining how these practices became ubiquitous across bureaucratic organizations epp casts today s legalistic state in an entirely new light why do great powers accommodate the rise of some challengers but contain and confront others even at the risk of war when right makes might proposes that the ways in which a rising power legitimizes its expansionist aims significantly shapes great power responses stacie e goddard theorizes that when faced with a new challenger great powers will attempt to divine the challenger s intentions does it pose a revolutionary threat to the system or can it be incorporated into the existing international order goddard departs from conventional theories of international relations by arguing that great powers come to understand a contender s intentions not only through objective capabilities or costly signals but by observing how a rising power justifies its behavior to its audience to understand the dynamics of rising powers then we must take seriously the role of legitimacy in international relations a rising power s ability to expand depends as much on its claims to right as it does on its growing might as a result when right makes might poses significant questions for academics and policymakers alike underpinning her argument on the oft ignored significance of

public self presentation goddard suggests that academics and others should recognize talk s critical role in the formation of grand strategy unlike rationalist and realist theories that suggest rhetoric is mere window dressing for power when right makes might argues that rhetoric fundamentally shapes the contours of grand strategy legitimacy is not marginal to international relations it is essential to the practice of power politics and rhetoric is central to that practice this report literature review provides an overview of academic writing on the role ip has played in innovation policy making over the last two decades in the last six decades one of the most striking developments in international law is the emergence of a massive body of legal norms and procedures aimed at protecting human rights in many countries though there is little relationship between international law and the actual protection of human rights on the ground making human rights a reality takes a fresh look at why it s been so hard for international law to have much impact in parts of the world where human rights are most at risk emilie hafner burton argues that more progress is possible if human rights promoters work strategically with the group of states that have dedicated resources to human rights protection these human rights stewards can focus their resources on places where the tangible benefits to human rights are greatest success will require setting priorities as well as engaging local stakeholders such as nongovernmental organizations and national human rights institutions to date promoters of international human rights law have relied too heavily on setting universal goals and procedures and not enough on assessing what actually works and setting priorities hafner burton illustrates how with a different strategy human rights stewards can make international law more effective and also safeguard human rights for more of the world population there has been an enormous expansion of individual employment rights in britain but their practical impact in terms of delivering fairer workplaces can be questioned taking as its starting point the widespread acknowledgement of problems with the major enforcement mechanism the employment tribunals this collection brings together experts from law sociology and employment relations to explore a range of alternative regulatory and non regulatory approaches to enforcement and to securing compliance and to consider factors affecting variation in the extent to which legal rights have meaning and impact at the workplace thus this book addresses issues key to contemporary policy and academic debate chapters discuss the growth in employment rights and their enforcement mechanisms gillian morris problems with the employment tribunal system and the current and potential role of alternative dispute resolution linda dickens reflect on the long experience of enforcement of equality rights bob hepple and agency enforcement of health and safety legislation under the better regulation agenda steve tombs and david whyte evaluate the potential of various reflexive law mechanisms including corporate governance simon deakin colm mclaughlin and dominic chai and of procurement christopher mccrudden as strategies for delivering fairness at the workplace factors influencing how statutory rights shape workplace practice are illuminated further in chapters on trade unions and individual legal rights trevor colling the management of employment rights john purcell and regulation and small firms paul edwards the opening chapter dickens makes the case for addressing issues of enforcement and compliance in terms of adverse treatment at work while the final chapter dickens considers why successive governments have been reluctant to act and outlines steps which might be taken were there sufficient political will to do so to help make employment rights effective in promoting fairer workplaces containing all the current decisions of the courts of record of new york state namely court of appeals supreme court new york superior court new york common pleas superior court of buffalo city court of new york city court of brooklyn and the surrogates courts varies slightly moving beyond previous scholarship he gives us a locke as much concerned with the effective functioning of government as with the roots of its moral legitimacy book jacket

The Intersection of Intellectual Property Rights and Innovation Policy Making - A Literature Review

2015-05-28

in the last six decades one of the most striking developments in international law is the emergence of a massive body of legal norms and procedures aimed at protecting human rights in many countries though there is little relationship between international law and the actual protection of human rights on the ground making human rights a reality takes a fresh look at why it s been so hard for international law to have much impact in parts of the world where human rights are most at risk emilie hafner burton argues that more progress is possible if human rights promoters work strategically with the group of states that have dedicated resources to human rights protection these human rights stewards can focus their resources on places where the tangible benefits to human rights are greatest success will require setting priorities as well as engaging local stakeholders such as nongovernmental organizations and national human rights institutions to date promoters of international human rights law have relied too heavily on setting universal goals and procedures and not enough on assessing what actually works and setting priorities hafner burton

illustrates how with a different strategy human rights stewards can make international law more effective and also safeguard human rights for more of the world population
