Handbook of Social Interactions in the 21st Century

2009

social interaction is a dynamic changing sequence of social actions between individuals or groups who modify their actions and reactions according to those of their interaction partner s in other words they are events in which people attach meaning to a situation interpret what others are meaning and respond accordingly social interactions can be differentiated into accidental also known as social contact not planned and likely not repeated for example asking a stranger for directions or shopkeeper for product availability repeated not planned bound to happen from time to time for example accidentally meeting a neighbour when walking on your street regular not planned but very common likely to raise questions when missed meeting a doorman or a security guard every workday in your workplace dining every day in the same restaurant etc regulated planned and regulated by customs or law will definitely raise questions when missed interaction in a workplace coming to work staff meetings playing a game etc family etc in sociological hierarchy social interaction is more advanced than behaviour action social behaviour social action and social contact and is in turn followed by more advanced concept of social relation in other words social interactions which consist of social actions form the basis for social relations this handbook presents the latest international research in the field

A Theory of Social Interaction

1988

in developing the most comprehensive theory of social interaction among humans to date the author has also constructed a general theory of micro dynamics for sociology and social psychology he does so by reviewing existing theories of the past and present synthesixing these concepts into abstract models and principles of social interaction in contrast to talcott parsons and many others the book argues that social interaction rather than action and behaviour is sociology s most basic unit of analysis this unit is conceptualized as involving three processes 1 motivational or the process of mobilizating and energizing interactive behaviour 2 interactional or the process of mutual signaling and interpreting with symbols and 3 structuring or the process of repeating and organizing social interactions in time and place for each of these three constituent processes the relevant theories are analyzed and then synthesized into composite models and general laws

Being There Together

2010-11-04

virtual environments provide places for being there together for avatars to interact with each other in computer generated spaces they range from immersive systems in which people have life size tracked avatar bodies to large scale spaces such as second life where populations of users socialize in persistent virtual worlds this book draws together research on how people interact in virtual environments what difference does avatar appearance make how do avatars collaborate and play together how do the type of system and the space affect how people engage with each other how does interaction between avatars differ from face to face interaction what can social scientists learn from experiments and other studies of how people interact in virtual environments what are the ethical and social issues in doing this research and in the uses of this technology and how do virtual environments differ from other communication technologies such as videoconferencing systems and other new media this book is a state of the art survey of research on these topics and offers a framework for understanding this technology and its future implications

Social Interaction

2017-07-05

social encounters is an approach to social psychology that is not what one might expect to find in textbooks on this subject as a companion to social interaction advocated by michael argyle and his associates it has been used by a rapidly growing number of researchers in social psychology and related aspects of ethology anthropology and linguistics the two key ideas are to study the detailed processes of social interaction at the level of the elements of interaction and to relate social behavior to its biological basis and cultural setting this work collects excellent representative studies of different aspects of social interaction as such they are important in their own right within the general approach described a range of different academic orientations are included all selections report empirical findings and most of them introduce conceptual notions as well one achievement of the volume has been to

establish the basic elements of which social interaction consists current research is concerned with finding out precisely how these elements function the contributors agree that the field consists of various signals verbal and non verbal tactile visible and audible bodily contact proximity orientation bodily posture physical appearance facial expression movements of head and hands direction of gaze timing of speech emotional tone of speech speech errors type of utterance and linguistic structure of utterance these elements can be further analyzed and divided into categories or dimensions each plays a distinctive role in social interaction social behavior is studied in natural settings or replicas of natural settings for which there are cultural rules familiar to the subjects this is a pioneering statement in sociobiology

Social Encounters

1962

christopher j jenks thoroughly analyses the interactional effects of technology and explores in detail the social and linguistic implications of communicating in second language chat rooms

Social Interaction

2014-03-17

this volume is intended as a reader for students and scholars working in the field of grammar and interaction it deals with ways in which verbal and non verbal actions are combined and linked in everyday conversation in institutional contexts and in written journalism the papers employ conversation analysis and interactional linguistics as a framework and examine data from finnish english estonian french brazilian portuguese and swedish the introduction examines fundamentals such as the understanding of the terms clause action linkage and combining in different grammatical traditions and in the present collection it also addresses open questions concerning the recognition emergence and distance of linkage and outlines what answers to these questions are provided by the contributions to the volume

Linking Clauses and Actions in Social Interaction

1992-01-01

doing more than one thing at the same time a phenomenon that is often called multitasking is characteristic to many situations in everyday and professional life although we all experience it its real time features remain understudied multiactivity in social interaction beyond multitasking offers a fresh view to the phenomenon by presenting studies that explore how two or more activities can be related and made co relevant as people interact with one another the studies build on the basis that multiactivity is a social verbal and embodied phenomenon they investigate multiactivity by using video recordings of real life interactions from a range of different contexts such as medical settings office workplaces and car driving with the companion collection interacting with objects language materiality and social activity the book advances understanding of the complex organisation and accomplishment of social interaction especially the significance of embodiment materiality participation and temporality a close

appreciation of how people use language and interact for and during multiactivity will not only interest researchers in language and social interaction communication studies and discourse analysis but will be very valuable for scholars in cognitive sciences psychology and sociology

The Meaning of Social Interaction

2018-02-14

social interaction systems is the culmination of a half century of work in the field of social psychology by robert freed bales a pioneer at the department of social relations at harvard university led by talcott parsons gordon w allport henry a murray and clyde m kluckhohn the harvard project was intended to establish an integrative framework for social psychology one based on the interaction process augmented by value content analysis bales sees this approach as a personal involvement that goes far beyond the classical experimental approach to the study of groups bales developed symlog which stands for systematic multiple level observation of groups the symlog consulting group approach was worldwide as well as interactive it created a data bank that made possible a search for general laws of human interaction far beyond anything thus far known in his daringsearch for universal features bales redefines the fundamental boundaries of the field and in so doing establishes criteria for the behavior and values of leaders and followers bales offers a new field theory an appreciation of the multiple contexts in which people live bales does not aim to eradicate differences but to understand them in this sense the values inherent in any interaction situation permit the psychologist to appreciate the sources of polarization as they actually exist between conservative and liberal individualistic and authoritarian libertarian and communitarian bales repeatedly emphasizes that the mental processes of individuals and their social interactions take place in systematic contexts which can be measured hence they permit explanation and prediction of behavior in a more exact way than in past traditions bales has offered a pioneering work that has the potential to move us into a new theoretical epoch no less than a new century his work holds out the promise of synthesis and support for psychologists sociologists and all who work with groups and organizations of all kinds

How We Influence One Another

1965

within the study of language and social interaction the concept of accountability including related concepts such as account or motive accounting and being accountable has been of longstanding interest in terms of how interactants in both ordinary and organizational contexts manage their image or reputation as well as how they achieve mutual understanding however these concepts are polysemous with different senses being rather dramatic such as accountability as moral responsibility and accountability as intelligibility even today this fact is not always remembered or fully recognized or appreciated by scholars which has arguably slowed the development of these concepts this volume brings together a collection of novel conversation analytic studies addressing accountability with the goal of re exposing its multiple senses reiterating their interrelationships and in doing so breaking new conceptual ground and exposing new pathways for future research the collection considers central theoretical issues including turn taking sequence and preference organization repair membership categorization action formation and ascription social solidarity and affiliation and the relevance of context chapters range contextually canvasing interactions between friends and family members and during talk shows broadcast news interviews airline reservations and medical visits chapters also range culturally including english japanese and korean data

Social Interaction Systems

1992-03-15

Small Groups

1986-01-01

reflecting the many contributions of muzafer sherif to social psychology during the past thirty years this volume presents selections from among sherif s most widely known essays and provides a systematic overview of his evolving interests concepts methods and research findings twenty five essays are divided into five sections according to content the theoretical and methodological problems at the heart of sherif s work the experimental model for interaction process and products problems of self and reference groups concepts attitudes and ego involvements and contributions to problems of in group and intergroup relations through experimental and field research

Social Interaction

1979

this book provides an up to date account of blind children s developing communicative abilities with particular emphasis on social cognition and language acquisition from infancy to early school age it purports to foster dialogue between those interested in the study of typically developing children and those interested in the development of children who are blind and to provide insights

and new explanations of why the development of blind children may differ from that of sighted children the book also aims to identify and examine current theoretical issues which are likely to be at the centre of developments in the fields of child language and developmental psychology language development and social interaction in blind children is also a timely book the study of blind children s development constitutes a unique opportunity to study the effect of vision on development and more specifically on the development of language and certain aspects of social cognition current interest in the development of theory of mind and perspective taking in language learning make the case of blind children crucial to our understanding of certain aspects of psychological functioning the book explores these issues challenges some widely held beliefs about the development of communication in blind children and provides a cohesive picture of our knowledge to date
