**Modern Philosophy** 1877 the leading edge of computer science research is notoriously ckle new trends come and go with alarming and unfailing regularity in such a rapidly changing eld the fact that research interest in a subject lasts more than a year is worthy of note the fact that after ve years interest not only remains but actually continues to grow is highly unusual as 1998 marked the fth birthday of the international workshop on agent theories architectures and languages atal it seemed appropriate for the organizers of the original workshop to comment on this remarkable growth and re ect on how the eld has developed and matured the rst atal workshop was co located with the eleventh european conference on arti cial intelligence ecai 94 which was held in amsterdam the fact that we chose an ai conference to co locate with is telling at that time we expected most researchers with an interest in agents to come from the ai community the workshop which was planned over the summer of 1993

attracted 32 submissions and was attended by 55 people atal was the largest workshop at ecai 94 and the clear enthusiasm on behalf of the community made the decision to hold another atal workshop simple the atal

94 proceedings were formally published in january 1995 under the title intelligent agents and included an extensive review article a glossary a list of key agent systems and unusually for the proceedings of an academic workshop a full subject index the high scienti cand production values embodied by the atal 94 proceedings appear to have been recognized by the community and resulted in atal proceedings being the most successful sequence of books published in springer verlag s lecture notes in arti cial intelligence series

The Law of Contracts 1873 learn to find the happiness that is natural to you and enjoy better relationships better health more success and a longer life the peculiar thing about us humans is we spend a lot of time working to find people and things that will make us happy in fact we seem to spend the majority of our time doing this however there is no guarantee that any of this effort will work there are lots of people who have hordes of people around them and who have lots of things but have been unable to make themselves happy the truth is happiness can be had with little effort have you ever been happy for no reason at all of course you have without anything changing in life happiness just appears we see it in young children all the time in fact we expect to see it in children if you happen to ask a smiling child why he or she is so happy at best the answer may be because for an adult this may be an unsatisfying answer but for the child it is the truth happiness exists just because as we age we seem to lose touch with happiness for no reason at all we see a world where everyone is striving for stuff striving for popularity striving striving the natural fount of happiness we once enjoyed disappears as we join them however that happiness is not gone all that happened is we lost our connection to it this book is about recovering that connection we all grow up believing that if we work hard and if we are good people we will enjoy good relationships with others good health success and a long life obviously this is not true there are a lot of rich old people who are not happy what we have what we do and the other circumstances of our lives do not provide authentic happiness instead happiness comes from inside of us and all by itself enables us to have secure relationships good health more success and longer lives so what is the secret of being happy being happy is a little like flipping a switch when it s on you are happy and when it s off you are not it s so easy how else can you explain being happy for no reason what you need to do is learn to turn it on and keep it turned on this book discusses seven practices that help you do that there is a lot of wisdom available about how to be happy most of it is thousands of years old but some is quite new the seven practices we will look at incorporate this wisdom to help you

learn how to turn on happiness in your life this kind of happiness does not require changing anything in your life all you have to do is learn to turn it on
