a new edition of the bestselling classic published with a special introduction to mark its 10th anniversary this pioneering account sets out to understand the structure of the human brain the place where mind meets matter until recently the left hemisphere of our brain has been seen as the rational side the superior partner to the right but is this distinction true drawing on a vast body of experimental research iain mcgilchrist argues while our left brain makes for a wonderful servant it is a very poor master as he shows it is the right side which is the more reliable and insightful without it our world would be mechanistic stripped of depth colour and value

uncle abner the mystery solving west virginian
backwoodsman is the best known literary
creation of melville davisson post uncle abner
solved the mysteries that confronted him in a
backwoods west virginia community immediately
prior to the american civil war and before the
infant nation had any proper police system he
had two great attributes for his self imposed
task a profound knowledge of and love for the
bible and a keen observation of human actions
one example of uncle abner s keen deductive
skills is his showing a deaf man had not
written a document because a word in it was
phonetically misspelt the first one of these
tales the angel of the lord is perhaps the
very first work in the historical mystery
genre melville davisson post 1869 1930 was an
american author born in west virginia although
his name is not immediately familiar to those
outside of specialist circles many collections
of detective fiction include works by him post
s best known character is the mystery solving
justice dispensing west virginian backwoodsman

a social history of ai that finally reveals its roots in the spatial computation of industrial factories and the surveillance of collective behaviour what is ai a dominant view describes it as the quest to solve intelligence a solution supposedly to be found in the secret logic of the mind or in the deep physiology of the brain such as in its complex neural networks the eye of the master argues to the contrary that the inner code of ai is shaped not by the imitation of biological intelligence but the intelligence of labour and social relations as it is found in babbage s calculating engines of the industrial age as well as in the recent algorithms for image recognition and surveillance the idea that ai may one day become autonomous or sentient as someone thought of google s lamda is pure fantasy computer algorithms have always imitated the form of social relations and the organisation of labour in their own inner structure and their purpose remains blind automation the eye of the master urges a new literacy on ai for scientists journalists and new generations of activists who should recognise that the mystery of ai is just the automation of labour at the highest degree not intelligence per se
