Plant Biotechnology 2002 and Beyond

2013-06-29

the 10th iapct b congress plant biotechnology 2002 and beyond was held june 23 28 2002 at disney s coronado springs resort in orlando florida usa it was attended by 1 176 scientists from 54 countries the best and brightest stars of international plant biotechnology headlined the scientific program it included the opening address by the president of the iapct b 14 plenary lectures and 111 keynote lectures and contributed papers presented in 17 symposia covering all aspects of plant biotechnology more than 500 posters supplemented the formal program the distinguished speakers described discussed and debated not only the best of science that has been done or is being done but also how the power of plant biotechnology can be harnessed to meet future challenges and needs the program was focused on what is new and what is exciting what is state of the art and what is on the cutting edge of science and technology in keeping with the international mandate of the iapct b 73 of the 125 speakers were from outside the united states representing 27 countries from every region of the world the 10th iapct b congress was a truly world class event the iapct b founded in 1963 at the first international conference of plant tissue culture organized by philip white in the united states currently has over 1 500 members in 85 countries it is the largest oldest and the most comprehensive international professional organization in the field of plant biotechnology the iapct b has served the plant biotechnology community well through its many active national chapters throughout the world by maintaining and disseminating a membership list and a website by the publication of an official journal formerly the newsletter and by organizing quadrennial international congresses in france 1970 the united kingdom 1974 canada 1978 japan 1982 the united states 1986 2002 the netherlands 1990 italy 1994 and israel 1998 in addition the iapct b has a long tradition of publishing the proceedings of its congresses individually these volumes have provided authoritative quadrennial reports of the status of international plant biotechnology collectively they document the history of plant biotechnology during the 20th century they are indeed a valuable resource we are pleased to continue this tradition by publishing this proceedings volume of the 10th iapct b congress regrettably we are not able to publish seven of the lectures in full only their abstracts are included the american and canadian chapters of the iapct b the plant section of the society for in vitro biology and the university of florida hosted the 10th iapct b congress the congress was a true partnership between academia and industry and was generously supported by both groups see list of donors sponsors on back cover a number of prominent international biotechnology companies and publishers participated in the very successful science and technology exhibit see accompanying list of exhibitors the iapct b awarded 84 fellowships to young scientists from 31 countries see accompanying list of fellowship recipients to support their participation in the congress

La mia Bibbia degli oli essenziali

2019-11-08

con la nuova edizione di questa guida speciale aggiornata e ampliata danièle festy ci presenta le scoperte scientifiche più recenti sull'aromaterapia nell'opera più esaustiva mai pubblicata una guida unica la più completa e pratica che permette di conoscere i 79 oli essenziali più efficaci: albero del tè, arancio, eucalipto, ylang ylang. ognuno con le sue proprietà da ingerire, respirare, diffondere, applicare sulla pelle attraverso compresse, massaggi o bagni. utilizzare le modalità di somministrazione più efficaci, individuare le zone del corpo su cui intervenire con i diversi massaggi grazie a illustrazioni chiare e dettagliate. crearvi il vostro kit personalizzato per avere ogni giorno a portata di mano i vostri oli indispensabili per i bambini, le future mamme, gli anziani. a ciascuno il suo: oltre 200 trattamenti su misura per contrastare malattie e disturbi, tenere sempre in borsa gli oli essenziali per le emergenze, contro il mal di testa e per favorire la digestione, menta oppure antistress, camomilla. in più tanti consigli per sfruttare al meglio gli oli essenziali per rinfrescare la vostra casa, rendere più profumati e digeribili i vostri piatti e come cosmetici. 100 naturali. edizione italiana a cura di luca fortuna.

Biology of Plant Volatiles

2020-05-19

plant volatiles compounds emitted from plant organs to interact with the surrounding environment play essential roles in attracting pollinators and defending against herbivores and pathogens. plant signaling and abiotic stress responses. biology of plant volatiles with contributions from leading international groups of distinguished scientists in the field explores the major aspects of plant scent biology. responding to new developments in the detection of the complex compound structures of volatiles. this book details the composition and biosynthesis of plant volatiles and their mode of emission. it explains the function and significance of volatiles for plants as well as insects and microbes whose interactions with plants are affected by these compounds. the content also explores the biotechnological and commercial potential for the manipulation

of plant volatiles features combines widely scattered literature in a single volume for the first time covering all important aspects of plant volatiles from their chemical structures to their biosynthesis to their roles in the interactions of plants with their biotic and abiotic environment takes an interdisciplinary approach providing multilevel analysis from chemistry and genes to enzymology cell biology organismal biology and ecology includes up to date methodologies in plant scent biology research from molecular biology and enzymology to functional genomics this book will be a touchstone for future research on the many applications of plant volatiles and is aimed at plant biologists entomologists evolutionary biologists and researchers in the horticulture and perfume industries

Cumulated Index Medicus

1972

plant breeding reviews presents state of the art reviews on plant genetics and the breeding of all types of crops by both traditional means and molecular methods many of the crops widely grown today stem from a very narrow genetic base understanding and preserving crop genetic resources is vital to the security of food systems worldwide the emphasis of the series is on methodology a fundamental understanding of crop genetics and applications to major crops

Plant Breeding Reviews, Volume 46

2023-02-07

the aim of this special issue is to review understand and evaluate new and exciting opportunities from the field on regenerative medicine biomaterials and stem cell research for the bioengineering of human liver grafts that can be applied for transplantation and personalized treatment of end stage liver disease the development of culture conditions for long term expansion of Igr5 intestinal stem cells as crypt villus structures demonstrated the feasibility of deriving complex organ like structures in vitro from primary adult tissues including the liver moreover human pluripotent stem cells hpscs can be applied to generate functionally matured liver and bile duct epithelial cells in this special issue we welcome reviews and original papers focussing on hepatic cell sources including adult hepatic stem cells organoids fetal and induced pluripotent stem cells and primary cells i e hepatocytes cholangiocytes and endothelial cells and how these cells can be applied in tissue engineering strategies to generate implantable and personalized liver grafts potential topics include but are not limited to the following liver tissue engineering liver regeneration graft repair liver stem cells and organoids bio scaffolds and 3d printing we invite you to contribute original research papers as well as comprehensive reviews aligned with these themes to advance and improve the actual state of the art in liver bioengineering and providing new opportunities for the imminent medical problem of organ and tissue shortage for transplantation

2003-03

emphasis is placed on the elaborate cuticular matrices in insects and crustaceans spider and insect silks sialomes of phytophagous and blood feeding arthropods as well as on secretions of male and female accessory glands focus is placed largely on insects due to the extensive body of published research that in part is the result of available whole genome sequences of several model species in particular drosophila melanogaster and accessible ests for other species such advances have facilitated fundamental insights into genomic proteomic and molecular biology based physiology this new volume contains comprehensive contributions on extracellular composite matrices in arthropods the building blocks of such matrices are formed in and secreted by single layered epithelial cells into exterior domains where their final assembly takes place additionally the unique mechanical properties of natural biocomposites like chitin chitosan the crustacean mineralized exoskeleton the pliant protein resilin or insect and spider silks have inspired basic and applied research that yield sophisticated biomimetics and structural biocomposite hybrids important for future industrial and biomedical use in summary this book provides an invaluable vast source of basic and applied information for a plethora of scientists as well as textbook for graduate and advanced undergraduate students
