management of traumatic brain injury

Organizational Stress 2023-03-29 this book represents a comprehensive review of relevant research into sources and consequences of work stress enabling leaders researchers and practitioners to implement interventions that address these outcomes and to engage in preventative initiatives in the workplace in order to bring benefits to individuals and organizations

Husserl and the A Priori 2021-06-09 this book presents a systematic discussion of the development of husserl s concept of the a priori from his early and through his later writings the chapters contained herein analyze the different phases and aspects of husserl s phenomenology of the a priori in light of his twofold notion of reason construed as both ontological and transcendental starting from the assessment of the introduction of the notion of a priori knowledge in the context of the logical investigations this text uniquely explores its development during the göttingen years it is at this time during his work on the crisis of european sciences that husserl comes to see the a priori as a criterion to interpret the history of philosophy notably modern philosophy this book sheds light upon such concepts as essence and eidos ideation eidetic attitude and eidetic reduction as well as formal and material innate and contingent a priori the author argues that the a priori becomes for husserl the expression of an ontological form of rationality i e the rationality immanent to being this book appeals to students and researchers working on husserl and phenomenology

Local Government in the Soviet Union 2024-04-12 local government in the soviet union 1987 analyses the soviet union s limited success in improving local government between in the 1960s to 1980s as the country made a drive toward centralized policy control it examines the institutional framework and changes in crucial policy areas and argues that a fragmented vertical power structure involving the three bureaucracies of party ministries and the city and regional soviets was unproductive it shows how group interests moulded and adapted policies and how the party s initiative in centralizing policy was thwarted it also outlines the significance of the industrial base in determining local budgets and the provision of amenities as opposed to overtly political factors

The Physics of the Mind and Brain Disorders 2017-12-01 this book covers recent advances in the understanding of brain structure function and disorders based on the fundamental principles of physics it covers a broad range of physical phenomena occurring in the brain circuits for perception cognition emotion and action representing the building blocks of the mind it provides novel insights into the devastating brain disorders of the mind such as schizophrenia dementia autism aging or addictions as well as into the new devices for brain repair the book is aimed at basic researchers in the fields of neuroscience physics biophysics and clinicians in the fields of neurology neurosurgery psychology psychiatry

Wind Resource Assessment and Micro-siting 2015-09-15 covers all the key areas of wind resource assessment technologies from an engineer s perspective focuses on wind analysis for wind plant siting design and analysis addresses all aspects from atmospheric boundary layer characteristics to wind resource measurement systems uncertainties in measurements computations and analyses to plant performance covers the basics of atmospheric science through to turbine siting turbine responses and to environmental impacts contents can be used for research purposes as well as a go to reference guide written from the perspective of a hands on engineer topic is of ongoing major international interest for its economic and environmental benefits

Nonverbal Behavior and Communication 2014-01-02 first published in 1987 an attractive feature of nonverbal communication as a research area is that it has captured the interest of scholars of different disciplinary backgrounds psychologists linguists anthropologists psychiatrists and sociologists with each discipline bringing to the area its peculiar theoretical and methodological perspectives and biases each of these disciplines also tend to have a favorite topic or problem area within the general domain of nonverbal communication along with the varying yet overlapping topical concerns that the different disciplines bring to the area of nonverbal communication are major differences in methodology the sections into which the book is divided roughly organize the chapters in terms of their concerns with the bodily structures and zones that are involved in nonverbal behavior

Alcohol, Other Drugs, and Behavior 2010 excellent text for covering alcohol and other drugs of abuse

Chiropractic History 1982 the articles included in this volume originate from contributions to the international conference on philosophy and science in phenomenological perspective held in buffalo in march 1982 the occasion had been to honor the late professor marvin farber a long time distinguished member of the department of philosophy state university of new york at buffalo and the founding editor of the journal philosophy and phenomenological research many of the papers were subsequently rewritten expanded or otherwise edited to be published in the series phaenomenologica the articles by professor frings and professor rotenstreich had not been presented at the conference although they were originally invited

papers we regret that not all papers submitted to the conference including comments could be accommodated in this volume nonetheless our sincere gratitude is due to all participants who have made the conference a memorable and worthy event nt of philosophy state university of new york at the departme buffalo as the sponsor of the conference wishes to acknowledge the grants from the conferences in the disciplines program conversations in the disciplines program and the international studies of the state university of new york at buffalo as well as for a grant from the national endowment for the humanities the international phenomenological society with professor roderick chisholm succeeding marvin farber as its president co sponsored the conference

Philosophy and Science in Phenomenological Perspective 2012-12-06 this volume commemorates the centenary of logical investigations by subjecting the work to a comprehensive critical analysis it contains new contributions by leading scholars addressing some of the most central analyses to be found in the book

One Hundred Years of Phenomenology 2013-04-17 this updated second edition provides the state of the art perspective of the theory practice and application of modern non invasive imaging methods employed in exploring the structural and functional architecture of the normal and diseased human brain like the successful first edition it is written by members of the functional imaging laboratory the wellcome trust funded london lab that has contributed much to the development of brain imaging methods and their application in the last decade this book should excite and intrigue anyone interested in the new facts about the brain gained from neuroimaging and also those who wish to participate in this area of brain science represents an almost entirely new book from 1st edition covering the rapid advances in methods and in understanding of how human brains are organized reviews major advances in cognition perception emotion and action introduces novel experimental designs and analytical techniques made possible with fmri including event related designs and non linear analysis

Human Brain Function 2004-01-26 labs on chip principles design and technology provides a complete reference for the complex field of labs on chip in biotechnology merging three main areas fluid dynamics monolithic micro and nanotechnology and out of equilibrium biochemistry this text integrates coverage of technology issues with strong theoretical explanations of design techniques analyzing each subject from basic principles to relevant applications this book describes the biochemical elements required to work on labs on chip discusses fabrication microfluidic and electronic and optical detection techniques addresses planar technologies polymer microfabrication and process scalability to huge volumes presents a global view of current lab on chip research and development devotes an entire chapter to labs on chip for genetics summarizing in one source the different technical competencies required labs on chip principles design and technology offers valuable guidance for the lab on chip design decision making process while exploring essential elements of labs on chip useful both to the professional who wants to approach a new field and to the specialist who wants to gain a broader perspective

Labs on Chip 2018-09-03 a complete thorough and pragmatic guide to clinical assessment this authoritative book meets a key need for both students and practitioners t mark harwood larry e beutler gary groth marnat and their associates describe how to construct a moving picture of each patient by integrating data from a variety of sources included are detailed systematic reviews of widely used instruments together with strategies for selecting the best methods for particular referral questions readers learn to conduct integrated assessments that take the complexities of the individual personality into account serve as the basis for developing an effective treatment plan and facilitate meaningful reporting and client feedback new to this edition incorporates the latest research findings and assessment treatment planning tools chapters on the personality assessment inventory and the neo pi r and neo pi 3 a new extended case example runs throughout the chapters critically evaluates the recently published mmpi 2 rf

Integrative Assessment of Adult Personality 2012-11-15 about the book indian passenger car industry is considered as the mother industry for many other industries industries like rubber pain glass electrical and electronics industries get lot of demand from the passenger car industry and thereby they prosper or suffer along with car industry the growth of indian car industry can be associated with the fact that the india s strong engineering base and expertise in the manufacturing of low cost fuel efficient cars has resulted in the expansion of manufacturing facilities of several multinational automobile giants like bmw mercedes benz hyundai nissan toyota volkswagen and maruti suzuki also it should be noted that the new generation of employees who constituted the major chunk of the indian middleclass exhibited more sending orientation rather than saving orientation the car was once considered as a luxury item but slowly people started treating it as a facility the indian car buyers are price conscious and also expect less maintenance expense and low running cost therefore the people always has to think whether to go for petrol or diesel car since the petrol car is cheaper in terms of initial purchase price and low maintenance cost but on the other hand a diesel car is cheaper in terms of higher mileage and also cheaper fuel price until now the book focuses on the study that aimed at finding out the change in buying behavior of

customers towards purchase of cars and their perception towards petrol and diesel cars this book would be handy to researchers undergraduate and postgraduate students belonging to management studies commerce economics and sociology disciplines to understand the buying behavior through a real world case study

Male Car Owners' Perception and Buying Behaviour 2015-03-03 new trends in mental healthcare practice and a rapid increase in the aged population are causing an explosion in the fields of clinical gerontology and geropsychology today this comprehensive second edition handbook offers clinicians and graduate students clear guidelines and reliable tools for assessing general mental health cognitive functioning functional age psychosocial health comorbidity behavior deficits and more psychopathology behavioral disorders changes in cognition and changes in everyday functioning are addressed in full and a wide range of conditions and disorders common to this patient population are covered each chapter provides an empirical review of assessment instruments assessment scales in their totality a review of how these instruments are used with and adapted for different cultural groups illustration of assessments through case studies and information on how to utilize ongoing assessment in treatment and or treatment planning this combination of elements will make the volume the definitive assessment source for clinicians working with elderly patients the most comprehensive source of up to date data on gerontological assessment with review articles covering psychopathology behavioral disorders changes in cognition and changes in everyday functioning consolidates broadly distributed literature into single source saving researchers and clinicians time in obtaining and translating information and improving the level of further research and care they can provide chapters directly address the range of conditions and disorders most common for this patient population i e driving ability mental competency sleep nutrition sexual functioning demntias elder abuse depression anxiety disorders etc fully informs readers regarding conditions most commonly encountered in real world treatment of an elderly patient population each chapter cites case studies to illustrate assessment techniques exposes reader to real world application of each assessment discussed

Handbook of Assessment in Clinical Gerontology 2010-08-20 focusing on the how what and why of creative learning this book seeks to explore new theoretical practical and methodological directions for engaging with it

Creative Learning 3-11 and how We Document it 2008 we shall be concemed in the following pages with some issues common to the systems of both kant and husserl given the structured nature of philosophical systems however the topics cannot be isolated from the systems in which they function imbuing them in each case with a specific direction an examination of the basic concept of anschauung will indicate the difference between the two systems to be sure anschauung points in both to the visual aspect of knowledge an element inherent in the classical concept of theoria which is related to the word horao to see in kant however the visual aspect is not the highest component of cognition since it is related to sensuality anschauung belongs to the synthesis and not the summit of knowledge it is given before thinking and is present in the ongoing search for relations between data in kant s understanding pure reason can be related to data only through the medium of understanding in this sense we could say that anschauung being a variation of schau is that which can be perceived with the eyes in kant s system it points to the presence of that which is given and thus to reception whereas knowledge proper is a synthesis of reception and spontaneity

Synthesis and Intentional Objectivity 2013-04-17 18

2024-04-28 speech a dynamic process takes readers on a rigorous exploratory journey to expose them to the inherently dynamic nature of speech the book addresses an intriguing question based only on physical principles alone can the exploitation of a simple acoustic tube evolve into an optimal speech production system comparable to the one we possess in the work presented the tube is deformed step by step with the sole criterion of expending minimum effort to obtain maximum acoustic variations at the end of this process the tube is found divided into distinctive regions and an acoustic space emerges capable of generating speech sounds attaching this tube to a model an inherently dynamic and efficient system is created in the resulting system optimal primitive trajectories are seen to naturally exist in the acoustic space and the regions defined in the tube correspond to the main places of articulation for oral vowels and plosive consonants all this implies that these speech sounds are inherent properties of not only the modeled acoustic tube but also of the human speech production system this book stands as a valuable resource for accomplished and aspiring speech scientists as well as for other interested persons in search for an

introduction to speech acoustics that takes an unconventional path

Speech: A dynamic process 2017-04-24 anton marty schwyz 1847 prague 1914 contributed significantly to some of the central themes of austrian philosophy this collection contributes to assessing the specificity of his theses in relation with other austrian philosophers although strongly inspired by his master franz brentano marty developed his own theory of intentionality understood as a sui generis relation of similarity moreover he established a comprehensive philosophy of language or semasiology based on descriptive psychology and in which the utterer's meaning plays a central role anticipating grice's pragmatic semantics the present volume including sixteen articles by scholars in the field of the history of austrian philosophy and in contemporary philosophy aims at exposing some of marty's most important contributions in philosophy of mind and language but also in other fields of research such as ontology and metaphysics as archive material the volume contains the edition of a correspondence between marty and hans cornelius on similarity this book will interest scholars in the fields of the history of philosophy in the 19th and 20th centuries historians of phenomenology and more broadly contemporary theoretical philosophers

Mind and Language - On the Philosophy of Anton Marty 2017-11-07 understanding consciousness is the major unsolved problem in biology one increasingly important method of studying consciousness is to study disorders of consciousness e.g. brain damage and disease states leading to vegetative states coma minimally conscious states etc many of these studies are very much in the public eye because of their relationship to controversies about coma patients e.g. terry schiavo case in the us recently and the relationship to one of the major philosophical sociological political and religious questions of humankind this is the first book to summarize our current understanding of the neuroanatomical and functional underpinnings of human consciousness by emphasizing a lesional approach offered via the study of neurological patients the selected contributors are all outstanding authors and undisputed leaders in their field new chapters on the neuroanatomical basis of consciousness functional intrinsic brain activity anesthesia as well as expanded coverage of the unresponsive wakefulness syndrome vegetative state and the minimally conscious state the first comprehensive authoritative collection to describe disorders of consciousness and how they are used to study and understand the neural correlates of conscious perception in humans includes revised and new chapters from the top international researchers in the field

The Neurology of Consciousness 2011-04-28 a completely revised and updated preparation guide for the new computerized usmle step 2 includes detailed analysis as well as all new study and test taking strategies for the new computer based testing cbt format

IADVL's Concise Textbook of Dermatology 2019-07-31 every chapter has been updated to reflect current thought and research in the field chapters devoted to specialized tests in neuropsychology have been updated to reflect new editions of these popular instruments special topic chapters have been added such as working in pediatric coma rehabilitation using the planning attention sequential simultaneous theory of neuropsychological processes additions on adhd and more appear written by the leading experts and practitioners in these fields to reflect the demands of current practice in clinical child neuropsychology

First Aid for the USMLE Step 2 2003 the wiley handbook of personality assessment presents the state of the art in the field of personality assessment providing a perspective on emerging trends and placing these in the context of research advances in the associated fields explores emerging trends and perspectives in personality assessment building on current knowledge and looking ahead to the future landscape of the field discusses emerging technologies and how these can be combined with psychological theories in order to enhance the real world practice of assessing personality comprehensive sections address gaps in current knowledge and collate contributions and advances from diverse areas and perspectives the chapter authors are eminent scholars from across the globe who bring together new research from many different countries and cultures

Handbook of Clinical Child Neuropsychology 2009-01-13 evidence based information on the care of children from birth through adolescence in an easy to use find it now presentation current diagnosis treatment pediatrics 21e delivers concise up to date and clinically relevant coverage of how to assess and treat common disorders in children known as the on the go guide to pediatrics the book features the easy to follow large current outline presentation which consists of problem essentials of diagnosis and treatment clinical features treatment prognosis written by experienced pediatricians to ensure that every chapter reflects the needs and realities of day to day practice this is an essential resource for pediatricians family practitioners physician assistants nurses and nurse practitioners and the critical care unit emphasizes the clinical aspects of pediatric care while also covering important underlying principles provides a quick authoritative guide to the diagnosis understanding and treatment of a wide range of pediatric medical conditions includes detailed description of diseases as well as the diagnostic and therapeutic procedures organized by general topics as well as by organ systems presented in time saving large current outline format problem essentials of diagnosis typical features clinical findings differential diagnosis treatment prognosis delivers concise overviews of important pediatric health concerns including childhood nutrition and

eating disorders substance abuse psychiatric disorders child abuse oral medicine and dentistry immunization and emergencies and injuries

The Wiley Handbook of Personality Assessment 2016-02-23 evolution of the human brain from matter to mind volume 250 in the progress in brain research series documents the latest developments and insights about the origin and evolution of the human brain and mind specific sections in this new release include evolution and development of the human cerebral cortex functional connectivity of the human cerebral cortex lateralization of the human cerebral cortex life history strategies and the human cerebral cortex evolution of the modern human brain on the nature and evolution of the human mind origin and evolution of human cognition origin and evolution of human consciousness and more presents insights on molecular and cellular mechanisms of human brain evolution provides a better understanding of the origin and evolution of the human mind includes information of the neural organization and functional connectivity of the cerebral cortex

CURRENT Diagnosis and Treatment Pediatrics, Twenty-First Edition 2012-06-22 textbook of pediatric infectious diseases is a comprehensive guide to the diagnosis and management of infectious diseases in children and adolescents beginning with a general introduction and diagnosis the following sections discuss different types of infections systemic bacterial viral protozoal parasitic and fungal and newly emerging diseases a separate chapter is dedicated to vaccines and immunisation written by a recognised author and editor team which includes contributors from the usa and switzerland this practical textbook includes numerous clinical photographs detailed illustrations and tables key points comprehensive guide to diagnosis and management of infectious diseases in children and adolescents covers all types of infections separate chapter on vaccines and immunisation includes contributions from experts in the usa and switzerland features nearly 200 clinical photographs illustrations and tables

Evolution of the Human Brain: From Matter to Mind 2019-11-06 the handbook of the criminology of terrorism features a collection of essays that represent the most recent criminological research relating to the origins and evolution of along with responses to terrorism from a criminological perspective offers an authoritative overview of the latest criminological research into the causes of and responses to terrorism in today s world covers broad themes that include terrorism s origins theories methodologies types relationship to other forms of crime terrorism and the criminal justice system ways to counter terrorism and more features original contributions from a group of international experts in the field provides unique insights into the field through an exclusive focus on criminological conceptual frameworks and empirical studies that engage terrorism and responses to it

Textbook of Pediatric Infectious Diseases 2013-05-30 this issue of critical care clinics focuses on psychiatric aspects of critical care medicine editor jose maldonado has assembled an expert team of authors on topics such as psychiatric aspects of organ transplantation in critical care medical complications of psychiatric treatment psychiatric and palliative care in the icu psychiatric aspects of heart and lung disease in critical care alcohol withdrawal syndromes assessment and management substance abuse and withdrawal in the critical care setting mood disorders and the outcome of suicidal thoughts and attempts anxiety disorders and the outcomes of trauma assessment and management of toxidromes in the critical care unit neuropsychiatric consequences of trauma and head injury detection and management of pre existing cognitive impairment in the critical care unit delirium pathophysiology diagnosis and treatment neuropsychiatric aspects of infectious processes

The Handbook of the Criminology of Terrorism 2016-11-30 winner of the 2015 sugiyama meiko award publication award of the behaviormetric society of japandeveloped by the authors generalized structured component analysis is an alternative to two longstanding approaches to structural equation modeling covariance structure analysis and partial least squares path modeling generalized structured componen

Psychiatric Aspects of Critical Care Medicine, An Issue of Critical Care Clinics, E-Book 2017-06-23 the philosophy of action an anthology is an authoritative collection of key work by top scholars arranged thematically and accompanied by expert introductions written by the editors this unique collection brings together a selection of the most influential essays from the 1960s to the present day an invaluable collection that brings together a selection of the most important classic and contemporary articles in philosophy of action from the 1960 s to the present day no other broad ranging and detailed coverage of this kind currently exists in the field each themed section opens with a synoptic introduction and includes a comprehensive further reading list to guide students includes sections on action and agency willing and trying intention and intentional action acting for a reason the explanation of action and free agency and responsibility written and organised in a style that allows it to be used as a primary teaching resource in its own right

Generalized Structured Component Analysis 2014-12-11 this work written by a practising medical doctor looks at the phenomenon known as the irritable heart of soldiers this condition characterised by chest pains palpitations breathlessness fatigue syncope and exercise intolerance first became an issue in the american civil war where it incapacitated

thousands of troops in this study the author brings to bear his expertise as a historian professor of medicine and a former soldier to analyse the condition and to trace the changing medical and social attitudes to it by viewing the condition through the dual lenses of history and modern medical knowledge this work provides a unique perspective on one of the pioneering areas of anglo american cardiology

Philosophy of Action 2015-02-17 this atlas covers the entire spectrum of brain disease as studied with ultrasound illustrated throughout with superb quality images it is aimed at neonatologists and radiologists confronted with everyday clinical questions on the neonatal ward most newborn brain disorders can be identified with ultrasound this book will therefore be particularly useful in settings with limited mri facilities prenatal ultrasound specialists will also find it valuable as a postnatal reference in their field of interest suggestions for differential diagnosis accompany all the sonographic findings guiding the clinician in proceeding from an abnormal image to a diagnosis this second edition of the atlas has been brought up to date to include the many advances in technique and interpretation that have been made in the past decade the images have been replaced with new ones of higher quality and all the line artwork has been standardised and improved readership neonatologists radiologists neuroradiologists with an interest in neonatal ultrasound from reviews of the first edition this is the most challenging and comprehensive book on this theme and is an essential reference for clinicians to make a correct diagnosis satoshi takada brain and development this can be little doubt that this title represents the definitive work on neonatal cranial ultrasound the authors have had extensive experience in the use of ultrasound scanning the neonatal brain for almost as long as ultrasound has been used to investigate intracranial pathology on the neonatal unit their combined experience is most impressive malcolm leven archives of disease in childhood
